The terms “Item(s)”, “PO”, “Seller”, and “Buyer” as used herein, have the same meaning as the terms “Work”, “Contract”, “SELLER”, and “LOCKHEED MARTIN”, respectively.

Questions regarding this Appendix QX or the applicability of this Appendix QX shall be addressed to Buyer’s Supplier Quality Engineer located at: http://www.lockheedmartin.com/us/aeronautics/materialmanagement.html > Quality Requirements > Information.

Buyer-unique documents (e.g., Q2A, Q30, TMS-MC-015, etc.) referenced in this PO are available from Buyer or Buyer’s website at: http://www.lockheedmartin.com/us/aeronautics/materialmanagement.html.
Copies of Aerospace Standards (AS/EN documents) from the Society of Automotive Engineers may be obtained at: www.sae.org.

* **1.0 Quality Requirements:** Seller shall meet the applicable requirements of the latest revision of Appendix QX in effect as of the date of the Request for Proposal (RFP), unless otherwise amended by Buyer and Seller prior to PO issuance. Seller shall:
a. ensure all applicable QX requirements herein and other quality requirements in this PO are imposed upon Sellers, its agents and subcontractors at all tiers working on Buyer’s product; and

b. have and maintain Internet access for obtaining requirements of this PO; and

c. ensure its quality system is third party registered by an accredited registrar listed in the “On line Aerospace Supplier Information System” (OASIS) and meets the Quality System Requirements identified in this Appendix QX, and

d. comply with the additional quality requirements contained in Table 1, as applicable.

* 1.1 Quality System Changes and Customer Findings:

a. Seller shall notify Buyer’s Supplier Quality Engineer, in writing, within 10 days of any of the following:
   1. change in its quality system status; or
   2. loss of third party registrar’s certification status; or
   3. change in Seller’s quality organization, processes or procedures that are known to affect or could potentially affect conformity of any Item; or
   4. adverse action taken by Seller's customer, a US Government entity (e.g. FAA, CAA, OSHA, DoD, EPA, etc.), Third Party Registrar, International Government Agencies, or Nadcap to include, but is not limited to, any of the following:
      i. Issuance of any Level II or Level III Corrective Action Request (“CAR”) associated with Buyer Items, Quality Management System or processes associated with Buyer Items
      ii. Issuance of a major finding by a Third Party Registrar
      iii. Suspension of Government Source Inspection (“GSI”)

b. Seller shall provide actions taken or planned actions related to any events listed in 1.1.a.1 through 1.1.a.4 above with the written notification.

** c. Seller shall provide within 30 days of the written notification the approved corrective actions taken in response to any adverse actions reported in 1.1.a.4 above.

* 1.2 Sale, Relocation, Closure or Transfer of Manufacturing Operations: Seller shall notify Supplier Quality Engineer and Buyer, in writing, at least 90 days in advance of any sale, relocation, closure, or transfer of Seller’s manufacturing operations (subject to any legal or regulatory restrictions). Seller shall include the following, as a minimum, in the written notification:
   • purpose of the relocation,
   • address of the new location(s),
   • assessment of actual or potential impact to current POs,
   • risk mitigation plan to ensure compliance to existing requirements,
   • plan defining the identification, storage, protection, retrieval and retention of records,
   • master schedule and timeline of relocation activities, and
   • relocation Coordinator/Point of Contact

1.3 Language: Upon request by Buyer, Seller shall provide all Seller records, reports, specifications, drawings, inspection and test results and other documentation in English.
1.4 Counterfeit Parts / Materials Prevention: Seller shall establish and maintain a Counterfeit Prevention and Control Plan (CPCP) using AS-5553 and/or AS6174 (Ref. elements of Section 3) to ensure that Counterfeit Work is not delivered to Buyer. The purpose of Seller’s Plan shall be to document a robust, risk-based process to prevent the delivery of and to control counterfeit or suspect counterfeit parts/materials. Seller’s CPCP shall document the processes used to prevent, detect, mitigate, disposition, and report suspected or confirmed counterfeit parts / materials or assemblies containing same.

a. For purposes of this clause, Work consists of those parts/materials delivered under this Contract that are the lowest level of separately identifiable items (e.g., articles, components, standard hardware, goods, raw materials and assemblies). “Counterfeit Work” means Work that is or contains unlawful or unauthorized reproductions, substitutions, or alterations that have been knowingly mismarked, misidentified, or otherwise misrepresented to be an authentic, unmodified part from the original manufacturer, or a source with the express written authority of the original manufacturer or current design activity, including an authorized aftermarket manufacturer. Unlawful or unauthorized substitution includes used Work represented as new, or the false identification of grade, serial number, lot number, date code, or performance characteristics. “Suspect Counterfeit Work” means Work for which credible evidence (including, but not limited to, visual inspection or testing) provides reasonable doubt that the Work part is authentic.

b. Seller shall only purchase parts/materials to be delivered to Buyer as Work directly from authorized sources of supply. Authorized sources of supply include the Original Component Manufacturer (OCM), the Original Equipment Manufacturer (OEM), the OCM/OEM authorized distributor chain, and sources with the express written authority of the OCM/OEM or current design activity, including original raw material and/or hardware manufacturers, authorized aftermarket manufacturers, approved suppliers, authorized resellers, authorized suppliers, and the manufacturer-authorized distributors.

Seller’s processes shall include the means to provide supply chain traceability to the OCM/OEM, including the name and location of all the supply chain intermediaries from the manufacturer to the direct source of the parts/materials for Seller. If traceability is not obtainable, prior to delivery, Seller shall provide written notice to the Supplier Quality Engineer and Buyer that includes records of evidentiary tests and inspections performed and conformance of the parts/materials to specified acceptance criteria that assures authenticity.

Seller shall only acquire Work from independent distributors or brokers in cases of Diminishing Material Supply (DMS) or obsolescence if Buyer has provided advanced written approval. Such acquisitions shall be subject to a screening process appropriate to the parts/materials in accordance with Seller’s CPCP.

Seller is not required to provide written notice to Buyer for raw material or standard hardware purchased from independent distributors or brokers, but Seller must provide to the Buyer traceability to the Original Manufacturer, including mills and foundries.

c. Seller shall notify the Supplier Quality Engineer and buyer of the pertinent facts of a nonconformance in accordance with QX Para 2.2, if Seller becomes aware or suspects that it has furnished Counterfeit Work. Suspect counterfeit parts/materials shall be treated as Nonconforming Items as they relate to the Seller notification process in accordance with QX Para 2.2.
Seller shall provide to the Supplier Quality Engineer and buyer, upon request, the supply chain traceability to the Original Manufacturer or authorized distributor chain. The supply chain traceability shall identify the name and location of all supply chain intermediaries from the parts/materials manufacturer to Seller’s direct source of the parts/materials.

Sellers eligible for utilization of the Government-Industry Data Exchange Program (“GIDEP”) shall utilize the GIDEP process to alert the industry of encountered counterfeit parts/materials.

d. Seller shall include this clause or equivalent provisions in lower tier subcontracts for the delivery of parts/materials that will be included in or furnished as Work to Buyer.

* 1.5 Certificate of Conformance: Seller shall:
  a. prepare a certificate of conformance (“CoC”) to assert the Items contained with the shipment are in compliance with all applicable requirements of this PO; and
  b. annotate in the delivery package any exceptions, e.g. variances, Supplier Quality Assurance Report (“SQAR”), Advanced Engineering Authorization (“AEA”), etc; and
  c. ensure the CoC is signed by a Seller’s quality representative; and
  d. include a copy of the CoC inside the shipping container and with shipping documents.

Provision for Alternate Acceptance DD250 Process:

When authorized in writing by Buyer’s customer, Seller shall ship with a Certificate of Conformance any supplies for which the contract would otherwise require government inspection at source. The CoC shall be in the format outlined in FAR 52.246-15

* 1.6 Records:
  a. Seller shall:
    1. maintain complete records of the following:
      • all manufacturing, inspection, test, CoC, and shipping; and
      • process capability or tooling controlled per TMS-MC-015, if applicable; and
      • all nonconforming material, dispositions, assignable causes, corrective and preventive actions, and effectiveness of corrective actions; and
    2. make such records available for at least three (3) years after completion of this PO or for longer periods if specified elsewhere in this PO; and
    3. maintain records of all QCS-001 “Work” performed and/or procured in accordance with 2.5 for at least seven (7) years after completion of this PO or for longer periods if specified elsewhere in this PO; and
    4. upon Buyer’s request, forward records to Buyer at no additional cost, price, or fee to Buyer.

  b. Dissolution of Business – In the event of dissolution of business between the Buyer and Seller, Seller shall notify Buyer’s Supplier Quality engineer within ten (10) business days.
    1. Companies that remain in business but are no longer a Lockheed Martin Aeronautics supplier shall maintain records in accordance with Appendix QX.
    2. Companies ceasing business operations shall contact their assigned Supplier Quality Engineer so arrangements can be made to transfer the following Buyer records to Lockheed Martin Aeronautics Company:
      • First Article data
      • Interchangeability/Replacement Parts (I/R)
• Fracture Critical Data / Safety of Flight Data
• Serialized Parts Data
• Qualification Testing Data
• Traceability Data
• Acceptance Test Data

3. The address for shipping such records is available at: http://www.lockheedmartin.com/us/aeronautics/materialmanagement.html under Quality Requirements > Information.

1.7 Government/Industry Data Exchange Program (“GIDEP”) Membership – If Seller is eligible for GIDEP membership, Seller is required to be a member of GIDEP.

1.8 Buyer-Certified Materials: Seller shall establish and maintain controls to prevent the use of non-certified materials when Buyer-certified materials (e.g. Engineering Materials and Approved Products [EMAPs]) are required.

1.9 Calibration: Seller shall maintain a documented calibration system for the calibration and maintenance of tools, jigs, inspection and test equipment. Seller shall have and maintain a calibration system compliant to ISO 17025, or ISO10012-1.

* 1.10 Buyer-Furnished, Seller-Manufactured or Seller-Owned Tooling:
   a. Seller shall include in its documented quality system written procedures for the control, maintenance, and calibration of special tooling, jigs, inspection and test equipment, and other devices used in manufacturing processes.
   b. Seller shall comply with the requirements of Buyer’s tooling manual (TMS-MC-015) for Buyer-Furnished, Seller-Manufactured or Seller-Owned tooling.

** 1.11 QUALITY SYSTEM REQUIREMENTS – Seller shall have a current third party certification from an accredited registrar listed in the “On line Aerospace Supplier Information System” (OASIS) per the following criteria. For all products AS/EN9100 is required, except as defined below:
   a. AS/EN9120 is required for suppliers performing as Distributors. Suppliers acting as non-value added distributor with AS9100 certification must have a Scope of Approval that includes Distribution if AS9120 certification is not held
   b. AS9110 is required for suppliers performing Alternate Repair Activity on non-OEM product. Suppliers with AS9100 certification must have a Scope of Approval that includes MRO activity if AS9110 certification is not held
   c. ISO-9001, as a minimum, is required for suppliers providing ground support or manufacturing support equipment

*Table 1 Definitions:

- **Maintenance, Repair and Overhaul Centers¹** - An organization that performs maintenance, overhaul, repair, or modification of an aircraft or an aircraft component/article that is performed after completion of manufacturing and initial airworthiness certification by the applicable Authority; and for Original Equipment Manufacturer (OEM) organizations with maintenance, repair and overhaul operated autonomously or that are substantially different from their manufacturing/production operations.
- **Distributors²** – This standard is for use by organizations that procure parts, materials and assemblies and resells these products to a customer in the aviation, space and defense industries. This includes organizations that procure products and split them into smaller quantities including those that coordinate a customer controlled service on the product.
* 2.0 **Point of Acceptance:** The point of acceptance is indicated on each PO issued.

When this PO requires Buyer Accept at Source, Buyer acceptance can involve periodic surveillance by Buyer of Seller’s quality system, manufacturing processes or physical Item, including work at Seller’s sub-tiers. Based on Seller’s performance, Buyer acceptance activities may result in the requirement for full-time oversight of Seller’s and/or Seller’s agents and subcontractors.

The location of performance of Buyer acceptance, prior to shipment, shall be the Seller’s facility address referenced on Buyer’s PO. If Seller’s Item manufacture, acceptance and/or shipment will be at or from a location other than the contracted PO address, Seller shall:

a. provide Buyer’s Supplier Quality Engineer with Seller’s written plan at least 30 days prior to manufacturing activities that, as a minimum, contains the following:
   - name and location of Seller’s agents and subcontractors,
   - how Seller will be performing acceptance of product from agents’ and subcontractors’ locations and/or manufacturing sites,
   - upon request, example of Seller’s purchase order to validate appropriate flow down of Buyer’s requirements,
   - date that manufacturing activity will begin,
   - assessment of actual or potential impact to current POs, and
   - risk mitigation plan to ensure compliance to existing requirements, and

b. obtain Buyer's Supplier Quality Engineer written concurrence, prior to any manufacturing activity.

c. reflect Seller’s contracted Supplier name and location, regardless of the point of final acceptance or delivery, in Seller’s shipping document and CoC.

2.0.1 – Prior to shipment of Items designated “BUYER ACCEPT AT SOURCE”, Seller shall:

a. obtain final acceptance from Buyer’s Supplier Quality Engineer, or
b. request and obtain authorization from Buyer’s Supplier Quality Engineer for shipment, or

c. sign and/or stamp and date Seller’s shipping document to indicate acceptance of Item(s) by Seller’s quality assurance personnel, when Buyer has delegated end item acceptance to Seller.

2.0.2 – Prior to shipment of Items designated “BUYER AND GOVT ACCEPT AT SOURCE”, Seller shall comply with 2.0.1 and obtain final acceptance from the assigned Government representative.

2.0.3 – When Buyer has not provided Seller with prior written authorization to act on Buyer’s behalf, Seller shall notify Buyer’s Supplier Quality Engineer normally servicing Seller’s facility, not more than five (5) days after receipt of this PO, when PO calls for “BUYER ACCEPT AT SOURCE” or “GOVT & BUYER ACCEPT AT SOURCE”. Seller’s notification shall include PO number, date of scheduled shipment and any special security clearance required to perform Buyer activities.

2.0.4 – When Buyer has not provided Seller with prior written authorization and/or electronic notification to act on Buyer’s behalf, Seller shall notify Buyer’s Supplier Quality Engineer a
minimum of two (2) working days prior to Items being ready for shipment, when this PO calls for “BUYER ACCEPT AT SOURCE” or “BUYER AND GOVT ACCEPT AT SOURCE”.

2.0.5 – Seller shall not claim entitlement to an increase in the PO price, cost, or fee based upon an assertion that “BUYER ACCEPT AT SOURCE” or “GOVT & BUYER ACCEPT AT SOURCE” imposes additional cost(s) or task(s) on Seller.

* 2.1 Facility Access:
  a. Regardless of Buyer’s or Buyer's Customer Point of Acceptance on this PO or whether Buyer's Customer has issued a delegation for this PO, Seller shall provide or obtain for Buyer, Buyer's customers and regulatory agency personnel, access to any and all facilities where work is being performed or is scheduled to be performed, including those facilities of Seller’s agents and subcontractors, in order to perform Item inspections, surveys or system/process surveillance as part of verification of conformance to the requirements of this PO. Seller’s denial of any such access may result in inactivation of Seller’s approval. Seller shall include the provisions of this facility access requirement in its POs with its agents and subcontractors, for this PO.
  b. Seller shall provide the following, at no increase in price, cost or fee to Buyer, Buyer’s customers or regulatory agencies:
     i. suitable facilities at Seller and Seller’s subcontractors’ manufacturing locations for Buyer, Buyer’s Supplier Quality Engineer, Buyer’s customer and regulatory agency representatives to perform Item inspections, surveys or system/process surveillance, and
     ii. high speed internet access for Buyer’s Supplier Quality Engineer.

* 2.2 Corrective Action, Preventive Action, Request and Reporting: Seller shall:
  a. ensure effective corrective and preventive action is taken (including repetitive non-conformances dispositioned “Use-As-Is” or “Repair” by Buyer’s or Seller’s Material Review Board [“MRB”] actions) to prevent, minimize, or eliminate non-conformances; and
  b. evaluate each nonconformance for its potential to exist in previously produced Items and notify Buyer, in writing, by submitting a Supplier Disclosure Letter on Items in transit or delivered to Buyer in accordance with the following:
     i. within 24 hours of the Seller’s discovery of a potential or verified non-conformances impacting flight safety
     ii. within 5 working days of Seller’s discovery of all other potential or verified non-conformances, and
  c. utilize the instructions located at http://www.lockheedmartin.com/us/aeronautics/materialmanagement.html under Quality Requirements > Corrective Action to submit a Supplier Disclosure Letter, and
  d. provide effective corrective and preventive action upon request by Buyer and, when requested by Buyer, provide trend data; and
  e. assess all Buyer-identified non-conformances, whether or not Item(s) was/were returned to Seller, and take appropriate actions to ensure causes of non-conformance are corrected;
  f. perform the following actions when Seller has tested any returned Item and Seller cannot verify a Buyer reported non-conformance:
     i. notify Buyer’s Supplier Quality Engineer of such conditions, and
     ii. not return non-verified failure Items unless authorized by Buyer’s Supplier Quality Engineer.
2.3 **Control of Nonconforming Product / Material Review Process**,

2.3.1 – Buyer and Buyer’s customers have the right to refuse to accept any and all Seller nonconformances.

2.3.2 – Seller shall ensure Seller’s quality system has capability to report nonconformance(s) on CSI in full compliance with Defense Federal Acquisition Regulation Supplement (“DFARS”) 252.246-7003.

* 2.3.3 – When Buyer’s customer has delegated oversight/surveillance of Buyer’s work to a cognizant Government representative at Seller’s facility, Seller shall submit all material review dispositions for Buyer-related work to the cognizant Government representative for concurrence when requested by the Government representative.

2.3.4 – Buyer has the right to limit or eliminate Material Review processing on work defined by this PO.

* 2.3.5 – Seller Material Review (MR) for Seller designed or Buyer-designed Items is not applicable to Buyer-Furnished Equipment (BFE).

* Seller shall request Buyer MR disposition of nonconforming BFE in accordance with Buyer instructions located on Buyer’s website at: [http://www.lockheedmartin.com/us/aeronautics/materialmanagement.html](http://www.lockheedmartin.com/us/aeronautics/materialmanagement.html) > Quality Requirements > Supplier Quality Management System. Seller shall identify equipment or Items as BFE within the request. A User Guide is available from Buyer’s website. BFE is equipment or Items provided to Seller from Buyer and therefore not procured or built by Seller. Seller’s continued processing is not allowed pending Buyer’s disposition.

2.3.6 – For Seller-designed Items, Material Review dispositions are limited to non-conformances that do not affect a parameter controlled by Buyer drawing or specification, where form, fit or function, interchangeability, Critical Safety Characteristic (CSC) related to Critical Safety Item (CSI) service life or reliability is affected. Seller shall submit requests for recommended disposition of non-conformances, if any, affecting any such parameter(s) to Buyer for Major Variance approval as defined in this PO.

2.3.7 – For Buyer-designed Items, Seller Material Review processing is limited to scrapping of Items, eliminating the nonconformance by rework to engineering, or returning to vendor. Seller shall request repair or Use-as-Is disposition from Buyer’s MRB. Seller’s continued processing shall be limited to subsequent operations that do not hide, alter or limit the ability to inspect, disposition or repair Item unless Seller has received written approval from Buyer.

* When Buyer has delegated MR to Seller for Buyer-designed Items, Seller’s process shall be limited to the scope provided in the MR delegation, and Seller shall comply with the terms of paragraph 2.3.3 as stated herein.

Seller’s request for Buyer MR disposition of Seller or Buyer-designed Items shall be submitted in accordance with Buyer instructions located at: [http://www.lockheedmartin.com/us/aeronautics/materialmanagement.html](http://www.lockheedmartin.com/us/aeronautics/materialmanagement.html) > Quality Requirements > Supplier Quality Management System.

2.3.8 – When requested by Buyer, Seller shall provide Buyer’s Supplier Quality Engineer with Seller’s MRB disposition information related to Buyer’s Item(s).
2.4 QCS-001 Requirements for Buyer-Designed Items:

2.4.1 - QCS-001 sets forth both the process sources and the processes that require Buyer approval, prior to use for Items delivered to Buyer. QCS-001 is located at [http://www.lockheedmartin.com/us/aeronautics/materialmanagement.html](http://www.lockheedmartin.com/us/aeronautics/materialmanagement.html) under Quality Requirements > Supplier Quality Management System. For those special processes that are not covered by QCS-001 the Seller shall have a system for approving special process sources. Seller is not required to utilize QCS-001 sources or provide QCS-001 Quarterly Usage Reports when processing the following:

- standard hardware (nuts, bolts, washer, etc.) ordered to military, federal or industry specifications or standards (e.g., MS, AN, NAS, etc.), or
- metallic raw material (plate, sheet, bar, extrusion, etc.), or
- perishable tooling and Tool Service Requirements List (“TSRL”) Items.

2.4.2 – Seller, its agents and subcontractors at all tiers working on Buyer’s product shall meet all requirements of the latest version of Appendix QJ in effect as of the date of the Request for Proposal (RFP), unless otherwise amended by Buyer and Seller prior to PO issuance, when Seller, its agents and subcontractors are performing any Buyer-controlled process identified in QCS-001.

2.4.3 – Seller’s utilization of Buyer-approved or Nadcap accredited sources does not relieve Seller from the obligations to ensure subcontracted sources are in full compliance with applicable process specifications and to deliver conforming Items. Upon request by Buyer, Seller shall provide objective evidence that such compliance was attained and that such conforming Items were delivered.

2.4.4 – Buyer authorizes Seller to use Nadcap accredited sources for Industry Standard processes controlled by QCS-001. Seller may access Nadcap approved sources at [http://www.pri.sae.org](http://www.pri.sae.org) or [http://www.eauditnet.pri.sae.org](http://www.eauditnet.pri.sae.org). Buyer shall have the right to validate any Nadcap approved source or process using normal survey practices, and shall have the right to disapprove Seller’s use of any such source in connection with this PO.

2.4.5 – Seller shall be responsible for providing special process source with the appropriate revision level of the process standards/specifications prior to performing processing.

2.4.6 – Seller shall ensure all Seller sub-tier purchase orders and/or associated purchase order documents for Buyer-controlled processes include the following data elements.

- Seller’s unique LM Aero identification number (“vendor code”), and
- all QCS-001 controlled specifications including revision for which processing which will be performed, and
- LM Aero unique “process codes” for each Buyer-controlled process to be performed, and
- applicable program Finish Specification and revision, and
- a statement with the words, “Processing to be accomplished in performance of this purchase order is directly related to a Lockheed Martin Aeronautics Company purchase order and must be accomplished in accordance with process specification(s) on this purchase order and Lockheed Martin Aeronautics Company Appendix QJ”, and
• a statement that Seller’s sub-tier must file and maintain a copy of all purchase orders containing the above statement and make these available for review by Buyer, upon request, and
• a statement that Seller’s sub-tier must submit a Certificate of Conformance ("CoC") with a unique certification number which contains the elements listed in QJ, and
• fracture durability classification or serialization, when required, and
• a statement to ensure Seller’s sub-tiers suitably wraps, boxes or racks parts to guard against shipping damage and to apply rust or corrosion protection.

2.4.7 – Seller shall maintain special processing activity data on each Buyer-approved process performed for Buyer including processes performed by Seller on Buyer Items, or any QCS-001 Source utilized, and Seller shall compile a quarterly Usage Report of this activity data and submit it to Buyer from the link at https://sqm.lmaeronautics.com/QCS001/QCS001Menu.aspx.

Seller shall also include in this Usage Report all special processing activity accomplished. Seller shall submit the Quarterly Usage Report within fifteen (15) calendar days after the end of each calendar quarter, even if no QCS-001 sources were utilized during a calendar quarter. Usage Reports shall not be input prior to the end of each calendar quarter. Seller’s Usage Report shall consist of processing activity accomplished in the following activity categories:

• Seller subcontracting special processing activity to QCS-001 or Nadcap approved sources, or
• Seller performing special processes on LM Aero Items for other LM Aero suppliers, or
• Seller performing special processes on LM Aero Items the Seller manufacturers, or
• Seller’s sub-tier manufacturing source(s) who subcontract special processing activity to QCS-001 or Nadcap approved sources.

Note: Usage Reporting is not required when Seller is performing QCS-001 processes for non-LM Aero contracts.

* 2.5 QCS-001 Requirements for Seller-Designed Items: Seller has the authority and responsibility to approve and control its special processing sources including in-house processes. Seller is not required to use those sources or specifications listed in QCS-001.
