

HALOGENSM

HALOGENSM Unconventional Intelligence for the 21st Century

THE HALOGENSM SOLUTION

ANALYTICAL CORE

Composed of a seasoned cadre of analysts, the HALOGENSM team's analytical core fuses information from a variety of resources. The core focuses on issues affecting a specifically designated geographic region or theme, such as the identification and analysis of human networks and their key components, to include leaders, facilitators, and influencers, as well as the threats and opportunities created by them.

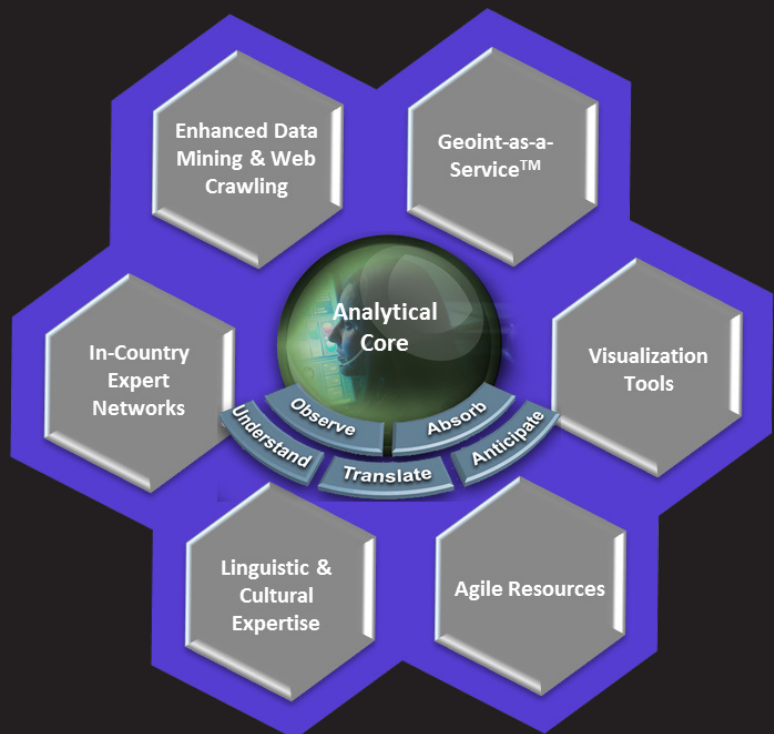

CUTTING-EDGE TOOLS AND TECHNOLOGIES

HALOGENSM analysts use tools and technologies to collect, manage, and analyze open source data and convert it into clear assessments of potential threats. LM WISDOMTM is the state-of-the-art open source monitoring and analytics tool that identifies emerging topics, trends and sentiments.

IN-COUNTRY EXPERT NETWORKS

Lockheed Martin has unparalleled access to networks of local nationals in countries throughout the world and at all levels of society. From top-level decision makers in the national government to local tribe leaders and business owners, this network provides granular insight into local politics and sentiments.

HALOGENSM analysts conduct in-depth research through unclassified information to generate intelligence in areas that traditional intelligence is challenged to obtain from other sources.

HALOGENSM offers a complete package of Analysts, Tools and Tradecraft

OUR ANALYSTS ARE HIGHLY SKILLED PROFESSIONALS

CAPABILITIES

- Multiple analytical methodologies
- Linguists
- Cultural expertise
- Proficiency with big data tools

OUR TOOLS OFFER UNRIVALED SCOPE OF ACCESS AND SPEED OF DELIVERY

CAPABILITIES

- Ingest massive volumes of data
- Sentiment analysis
- Monitor global trends and highlight emerging crises
- Georeferenced data and ready to visualize, map, model, and forecast
- Tools evolve to keep up with changes in technology

OUR PROFESSIONAL INTELLIGENCE TRADecraft DEMONSTRATES EXPERTISE

CAPABILITIES

- Geospatial visualization of data using maps, GEOINT software, and commercial imagery
- Conduct web searches in target language
- Techniques for recovering deleted files from internet
- Validation of information through use of in-country expert networks
- Proper handling of U.S Person data in accordance with Intelligence Oversight

VALUE OF HALOGENSM

Comprehensive, Mature Solution: We leverage years of experience developing methodologies, best practices, and lessons learned, coupled with cutting-edge tools and technology, to gather and analyze information critical to understanding our client's complete operating environment.

Subject Matter Experts: Built upon a robust core composed of our expert analysts all specifically selected based on technical, cultural, and regional understanding of the country or location of interest. This expertise, combined with in-country resources, ensures that the information we gather and the reports we produce are accurate, timely, and relevant.

Tailored Reports: Intelligence reports are specifically tailored to address the specific needs of the client. Clients' requests for information are answered completely and within the clients' latest time of value.

Forward Looking Analysis: Intelligence reports include predictive analysis to inform clients of emerging factors, threats, and trends to provide more complete information for decision making and crisis management.

Globally Scalable Solution: Our solution is designed to be globally scalable with the resources, expertise, and capacity to address questions in all regions of the world as dictated by clients' interest and requirements.
