First Combat Strike

195
Aircraft Delivered
(186 production; 9 EMD)
2012
Last production F-22 delivered

8,000 Hour
Structural Service Life
Ready wherever needed for as long as needed

First Operational 5th-Gen Aircraft

Ushered in new era of combat air with unprecedented capabilities

Collier-Award Winning

Awarded in 2006 for performance in Exercise Northern Edge

First Combat Aircraft with Open Systems Architecture

Enabling enhanced connectivity across domains

Recent Milestones

- In partnership with the U.S. Air Force, we recently completed successful F-22 flight test demonstrations for advanced sensors, a key milestone to extending the Raptor's sight and enabling next-gen sensor technology for future air combat.
- The F-22 fleet reached 500,000 flight hours this June. We celebrated every flight hour as an investment for the future and thanked the entire industry and Air Force team for making this milestone possible.
