

Mission Ready – Delivering More Readiness at Less Cost

Lockheed Martin. Your Mission is Ours.®

24 hours a day. 7 days a week. 365 days a year.

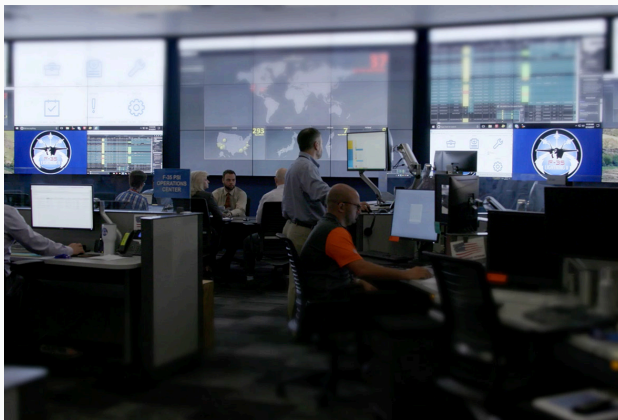

At Lockheed Martin, the Flight Line is the Center of Gravity™ – it's where we are delivering integrated sustainment capabilities to ensure our customers' aircraft are mission ready anytime and anywhere.

THE FLIGHT LINE IS THE CENTER OF GRAVITY™

Lockheed Martin's SUSTAINMENT SUCCESS SYSTEM - S3™ is our premiere delivery method to meet mission critical performance and operational objectives around the world. Through S3™, we're Engineering for Sustainment by providing the right systems approach, sustainment talent, processes, tools and technology, underpinned by partnerships, to ensure more readiness at less cost.

F-35 is leading the way as we harness unparalleled engineering and logistics expertise and emerging technologies to bring 5TH GENERATION SUSTAINMENT™ capabilities at 4th Generation cost. Beyond F-35, 5TH GENERATION SUSTAINMENT™ for the flight line of the future will drive increased readiness for legacy platforms.

From field level support technicians partnering with customers to data analysts diagnosing an aircraft's health, we provide end-to-end solutions to sustain fleets spanning the globe – because minutes matter in sustainment.

YOUR MISSION IS OURS – PARTNERS FOR LIFE

Customer partnerships, innovation and purpose are built into everything we do. Together, we increase aircraft availability, reduce costs, and ensure the relevancy and supportability of an aircraft for life.

Partnering does not end after aircraft delivery. We are partners through field support, training, sustainment engineering, engine work, and modernization. Relationships with a global supply chain create affordable solutions that only Lockheed Martin, with our industry partners, can provide.
