Lockheed Martin. Your Mission is Ours.

Lockheed Martin (NYSE: LMT) solves the world’s toughest technology challenges. More than 70 nations rely on Lockheed Martin employees, products and technologies to help them protect and connect their citizens and advance scientific discovery. In a time of growing unpredictability and evolving threats, innovation and performance are at the center of everything we do.

All data from 2017

People

- 100,000 total employees
- 7,200+ international employees
- 49,000 engineers, scientists and information technology professionals

Footprint

400+ facilities globally

- Headquarters: Bethesda, Maryland
- Space Headquarters: Denver, Colorado
- Rotary and Mission Systems Headquarters: Washington, D.C.
- Missiles and Fire Control Headquarters: Grand Prairie, Texas
- Aeronautics Headquarters: Fort Worth, Texas

Internationally: We have employees in 52 countries

Industry Leading Portfolio

AERONAUTICS

Aeronautics designs, engineers and creates the world’s most advanced aircraft, including the world’s only fifth generation multi-role stealth fighter – the F-35. Aeronautics is also home to Skunk Works® - one of the nation’s preeminent rapid solutions providers.

MISSILES AND FIRE CONTROL

Missiles and Fire Control develops and produces electro-optic and smart munitions systems, and is a pioneer in the field of high-performance missile, missile defense, ground vehicle and rocket technology. It is home to Lockheed Martin Energy, which develops and implements bio-, wind- and tidal-energy systems.

ROTARY AND MISSION SYSTEMS

Rotary and Mission Systems designs, manufactures, services and supports military and civil helicopters, naval and radar systems, and provides world-class systems integration, training and logistics. It is home to Lockheed Martin’s autonomous systems, cyber security, C4ISR and electronic warfare capabilities.

SPACE

Lockheed Martin Space creates technologies that power exploration, connectivity and security from space. Major programs include GPS III and secure communications, human and robotic exploration of deep space, strategic deterrence and missile defense, and commercial communications and remote sensing.

- $11.7 million Employee Donations to Local Charities
- 81% Community Initiatives
- 14% STEM Education
- 5% Military and Veteran Causes
- Energy Use: down 23%
- Water Use: down 22%
- Carbon Emissions: down 33%

What’s Next

- Autonomy and Robotics
  - Our autonomy and robotics programs take on the riskiest jobs and keep people out of harm’s way. The result is an integrated system of man and machine that’s more powerful, more capable and more effective than ever before.
- Directed Energy
  - Directed energy systems use highly focused energy to disable targets with pinpoint accuracy. We’ve made strides in enhancing accuracy and maintainability, and are exploring ways to scale and integrate this technology in real-world applications.
- Cyber Security
  - Conflicts are becoming less physical and more virtual. We’re building systems that protect against ever-evolving cyber threats, and keep data and networks secure and protected.
- Sensor Technology
  - Across land, sea, air and space, our sensors provide warfighters with complete, integrated situational awareness, enabling smarter, faster decision-making.
- Electronic Warfare
  - The electromagnetic spectrum allows our customers to communicate and monitor an adversary’s communications. We’re developing technology that protects customers’ use of the spectrum and takes away an adversary’s ability to communicate electronically.
