Part III	Form M-1 Compliance Information (to be completed by welfare benefit plans)				
11a If the plan provides welfare benefits, was the plan subject to the Form M-1 filing requirements during the plan year? (See instructions and 29 CFR 2520.101-2.) If "Yes" is checked, complete lines 11b and 11c.					
11b Is the plan currently in compliance with the Form M-1 filing requirements? (See instructions and 29 CFR 2520.101-2.)					
11c Enter the Receipt Confirmation Code for the 2022 Form M-1 annual report. If the plan was not required to file the 2022 Form M-1 annual report, enter the Receipt Confirmation Code for the most recent Form M-1 that was required to be filed under the Form M-1 filing requirements. (Failure to enter a valid Receipt Confirmation Code will subject the Form 5500 filing to rejection as incomplete.)

INDEPENDENT AUDITOR'S REPORT

To the Participants and Plan Administrator of the Lockheed Martin Corporation Pension Plan for Employees in Participating Bargaining Units

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of Lockheed Martin Corporation Pension Plan for Employees in Participating Bargaining Units (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 2022 and 2021, the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 31, 2022 and 2021, and for the years then ended, stating that the certified investment information, as described in Note 4 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditor's Responsibilities for the Audit of the Financial Statements section:

 The amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

> 1625 K Street, NW Washington, DC 20006 **T** +1 202 293 7500 **F** +1 202 465 3149

mitchelltitus.com

 The information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are issued.

Management is also responsible for maintaining a current plan instrument, including all Plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and, therefore, is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions,

misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audits, significant audit findings, and certain internal control-related matters that we identified during the audits.

Net assets available for benefits at end of year	\$	948,685

The accompanying notes are an integral part of these financial statements.

1. Description of the Plan

The following description of the Lockheed Martin Corporation Pension Plan for Employees in Participating Bargaining Units (the Plan) provides only general information about the Plan's provisions. Participants should refer to the Plan document and Summary Plan Description for a more complete description of the Plan's provisions.

General

The Plan is a defined benefit plan covering certain bargaining employees of Lockheed Martin Corporation (the Corporation) and has been amended from time to time. The Corporation is the Plan Sponsor and the Plan Administrator. Active participants become fully vested in the Plan upon the earlier of the completion of five years of service or attainment of age 65. During 2013, 2012 and 2007, as a result of collective bargaining agreements, the Plan was amended to provide that new hires and rehired employees are generally not eligible to participate in the Plan. Benefit accruals ended December 31, 2019 for ASPEP union participants.

The assets of the Plan, are held and invested on a commingled basis in the Lockheed Martin Corporation Master Retirement Trust (the Master Trust). The assets of the Master Trust were held by The Northern Trust Company until August 31, 2022; effective September 1, 2022, the Corporation transitioned the Trustee from The Northern Trust Company to The Bank of New York Mellon (the Trustee), with the exception of certain assets that are not held under the custody of the Trustee as described in Note 4.

Funding Policy

Funding for the Plan is determined in accordance with the Employee Retirement Income Security Act of 1974 (ERISA), as amended by the Pension Protection Act of 2006 and consistent with U.S. Government Cost Accounting Standards. Contributions by the Corporation, if any, meet the ERISA minimum funding requirements. Prior to 1995, participating employees were required to contribute to the Plan. In addition, each participating employee was permitted to make voluntary contributions to the Plan. Effective January 1, 1995, participating employees were no longer required or permitted to contribute to the Plan. Accumulated employee contributions for active employees participating in the Plan at December 31, 2022 and 2021, including interest at rates provided under the Plan and Section 411(c) of the Internal Revenue Code (IRC), were \$2.2 million and \$2.5 million, respectively. Interest rates used ranged from 1.49% to 1.57% in 2022 and from 0.62% to 1.98% in 2021.

The Corporation has the right under the Plan to discontinue its contributions at any time and/or terminate the Plan. In the event of termination, the Plan's net assets are to be used first for the payment of benefits attributable to active and non-active participant contributions, then for payment of retirement benefits that former employees or their beneficiaries have been receiving, next for the payment of other vested benefits, and finally for the payment of nonvested benefits for the remaining participants. If the net assets are not sufficient to pay all benefits, the net assets shall be paid to the most senior categories until a category cannot be paid in full, and remaining net assets shall be allocated pro rata to all the benefits in that category and not those of lower priority. However, in the event of termination of the Plan, the Pension Benefit Guaranty Corporation guarantees the payment of nonforfeitable retirement benefits subject to certain limitations prescribed by ERISA.

2. Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting.

Accumulated Plan Benefits

Accumulated plan benefits are those estimated future periodic payments that are attributable under the Plan's provisions for credited service by participants from their date of eligibility to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired, terminated and disabled participants or their beneficiaries, and (b) present participants or their beneficiaries. Benefits for retired, terminated and disabled participants or their beneficiaries are based on each former participant's compensation, as applicable, during each year of credited service prior to his or her termination or retirement date. Accumulated plan benefits for active participants are based on each participant's compensation, as applicable, during each year of credited service preceding the valuation date. Benefits payable under all circumstances—retirement, death, disability and termination of employment—are included to the extent they are deemed attributable to employee service prior to the valuation date.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits. Actual results could differ from those estimates.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Risks and Uncertainties

The Plan, through the Master Trust, invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, currency, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements. The U.S. Department of Labor is currently auditing the Plan. The audit is focused on the process for locating terminated vested participants over the age of 65 that have not commenced their benefit payments and paying benefits to those participants. Currently, we are unable to predict the outcome of this audit and cannot estimate any reasonably possible loss or range of loss.

Investment Valuation and Income Recognition

Investments in the Master Trust are reported at fair value or at Net Asset Value (NAV). Fair value is the cost that would have been received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for discussion of fair value measurements.

Purchases and sales of securities in the Master Trust are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Gains and losses on

investments bought and sold as well as held during the year are included in interest in net investment losses of Master Trust on the Statement of Changes in Net Assets Available for Benefits.

Administrative Expenses

Direct administrative expenses are paid by the Master Trust and generally allocated to the Plan proportionally based on the Plan's interest in the Master Trust's net assets or directly if specifically related to the Plan. Other indirect administrative expenses are paid by the Corporation and are excluded from these financial statements. Expenses paid by the Plan are shown on the Statement of Changes in Net Assets Available for Benefits.

Subsequent Events

The Plan Administrator has evaluated subsequent events through October 3, 2023, the date the financial statements were available to be issued. The Plan will be amended effective October 1, 2023, to allow certain former employees who have not yet commenced receiving benefit payments to make an election to receive their vested benefit in an one-time lump-sum payment. The acceptance results will not be known until December 31, 2023, and are not projected to be significant to the Plan's financials with a similar impact on both the Plan's liabilities and assets. Other than this change, no material subsequent events have occurred since December 31, 2022 that required recognition or disclosure in these financial statements.

3. Actuarial Present Value of Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is the amount that results from applying actuarial assumptions to the accumulated plan benefits earned by the participants to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment.

	December 31,			
		2022	2021	
Vested benefits:				
Participants currently receiving payments	\$	452,780 \$	510,382	
Participants not currently receiving payments		490,114 \$	756,708	
Total vested benefits		942,894	1,267,090	
Nonvested benefits		7,260	11,687	
Total actuarial present value of accumulated plan benefits	\$	950,154 \$	1,278,777	

The actuarial present value of accumulated plan benefits is as follows (in thousands):

The significant actuarial assumptions used in the valuations were (a) life expectancy of participants (Pri-2012 Total Dataset with Scale MP-2021 for both 2022 and 2021), (b) turnover based upon the termination experience of the Plan, (c) assumed retirement age probabilities based on the experience of the Plan resulting in an average retirement age of 64, and (d) an annual discount rate of 5.25% and 2.875% for 2022 and 2021, respectively. The discount rate assumption used to calculate the actuarial present value of accumulated plan benefits is adjusted annually to reflect current yields on long-term high-quality corporate bonds. This can result in significant year to year fluctuations in the valuations.

Changes in the actuarial present value of accumulated plan benefits are as follows (in thousands):

		Year Ended
	Decer	mber 31, 2022
Actuarial present value of accumulated plan benefits at beginning of year	\$	1,278,777
Increase (decrease) during the year attributable to:		
Increase for interest due to the decrease in the discount period		36,125
Benefits paid		(44,537)
Benefits accumulated		2,986
Changes in actuarial assumptions		(323,197)
Net decrease		(328,623)
Actuarial present value of accumulated plan benefits at end of year	\$	950,154

The changes in actuarial assumptions reflect the increase in the discount rate which impacted the actuarial present value of accumulated plan benefits by \$(323) million.

The actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Master Trust

General

The Plan's interest in the Master Trust is stated at the fair value of the underlying net assets in the Master Trust. The realized and unrealized gains and losses and investment income of the Master Trust are allocated among the participating plans included therein proportionally based on each plan's interest, which include unrealized gains and losses, investment income and plan expenses. The Plan's interest in the Master Trust's net assets, excluding assets of the 401(h) account, as of December 31, 2022 and 2021 was approximately 4.08% and 3.42%, respectively.

The following table presents the Plan's interest in the Master Trust balance as of December 31, 2022 and 2021 (in thousands):

	December 31, 2022			December 31, 2021			
	Master Trust		Plan's nterest in Master Trust Balance	Master Trust Balance		Plan's nterest in Master Trust Balance

Loans, net	(496,625)		(20,359)				
Total investment assets at NAV	9,497,637		389,358	9,850,072		337,879	
Total net assets	\$24,283,109	\$	949,358	\$36,564,247	\$	1,202,724	

The Master Trust owes direct reimbursements to the Corporation for certain expenses incurred by the Corporation and its subsidiaries in providing services to the Plan.

Other than the financial information in the following table, the reported total fair value by asset class as disclosed in the fair value of assets tables including investments held as of December 31, 2022 and 2021, and net depreciation in fair value of investments, interest income, and dividend income for the year ended December 31, 2022, was obtained or derived from information certified as complete and accurate by the Trustees of the Master Trust.

The following financial information was not certified by the Trustees, as the net assets are not held in custody by the Trustees (in thousands):

	December 31,				
		2022		2021

Fair Value of Assets

The accounting standard for fair value measurements defines fair value, establishes a market-based framework or hierarchy for measuring fair value, and requires disclosures regarding fair value measurements. The standard is applicable whenever assets and liabilities are measured and included in the financial statements at fair value.

The fair value hierarchy established in the standard prioritizes the inputs used in valuation techniques into three levels as follows:

- Level 1 Quoted prices in active markets for identical assets and liabilities;
- Level 2 Observable inputs, other than Level 1 prices, such as quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in inactive markets, and amounts derived from valuation models where all significant inputs are observable in active markets; and

• Level 3 – Unobservable inputs where valuation models are supported by little or no market activity that one or more significant inputs are unobservable and require us to develop relevant assumptions.

Certain other investments are measured at their value using NAV per share and do not have readily determined values and are thus not subject to leveling in the fair value hierarchy. The NAV is the total value of the fund divided by the number of shares outstanding.

The following table presents the fair value of the assets in the Master Trust by asset category and their level within the fair value hierarchy as of December 31, 2022 (in thousands):

	December 31, 2022							
		Level 1		Level 2	Level 3			Total

The following table identifies certain transactions associated with the fair value of Master Trust's Level 3 assets for the year ended December 31, 2022 (in thousands):

	Pu	rchases	 Fransfers into Level 3
Corporate debt securities	\$	303,291	\$ 71
Common and preferred stocks		90,241	17,113
Other investments (b)		1,615,174	23,294
Total	\$	2,008,706	\$ 40,478

- (a) Includes U.S. Government-sponsored enterprise securities.
- (b) Includes collateralized mortgage obligations, municipals, asset-backed securities, inflation index linked bonds, foreign government securities, swaps, repurchase agreements, private debt and Group Annuity Contracts (GACs). The GACs balance were \$1.13 billion and \$1.5 billion, respectively as of December 31, 2022 and 2021.

- (c) Includes unsettled trades, other receivables/payables, market values on foreign currency, items relating to derivatives and other cash positions on futures.
- (d) Certain investments that are valued using the NAV per share (or its equivalent) as a practical expedient have not been classified in the fair value hierarchy and are included below the table to permit reconciliation of the fair value hierarchy to the aggregate post-retirement benefit plan assets.
- (e) Includes 103-12 investment entities.

Certain assets that were previously classified outside of the leveling table were transferred into Level 3 as a result of management's current year assessment of the inputs used to determine fair value. Transfers out of Level 3 include assets that were transferred into Level 2 at the end of the year as a result of changes in the inputs used to determine fair value. The Master Trust recognizes transfers between levels of the fair value hierarchy as of the date of the change in circumstances that causes the transfer. Management is unaware of measurement uncertainty within Level 3 fair value measurements as of December 31, 2022.

Valuation Techniques

Cash and cash equivalents and short-term investment fund investments are mostly comprised of cash and short-term money-market instruments and are valued at cost, which approximates fair value.

Common and preferred stock securities categorized as Level 1 are traded on active national and international exchanges and are valued at their closing prices on the last trading day of the year. For common and preferred stock securities not traded on an active exchange, or if the closing price is not available, the Trustee obtains indicative quotes from a pricing vendor, broker, or investment manager. These securities are generally categorized as Level 2 if the custodian obtains corroborated quotes from a pricing vendor or generally categorized as Level 3 if the custodian obtains uncorroborated quotes from a broker or investment manager.

Common collective trusts (CCTs) are investment vehicles valued using the NAV provided by the fund managers. The NAV is the total value of the fund divided by the number of shares outstanding. CCTs are categorized as Level 2 if the NAV is corroborated by observable market data (e.g., purchases or sales activity), or not categorized in a level of fair value hierarchy (excluded from the fair value table) where certain liquidity provisions apply and the NAV is deemed a practical expedient with regards to valuation. CCTs and registered investment companies valued using the NAV as a practical expedient are typically redeemable within 90 days.

Registered investment company securities categorized as Level 1 are traded on active national and international exchanges and are generally valued at closing prices on the last trading day of the year. In the cases where the valuation is based on NAV at the close of the year, these represent open-ended mutual funds valued by multiple pricing sources. For those securities not categorized in a level of the fair value hierarchy, the Corporation cannot fully redeem the investment in the near-term and NAV as a practical expedient is deemed to apply to those assets.

Corporate debt instruments, registered investment company securities and U.S. Government securities categorized as Level 2 are valued by the Trustee using pricing models that use verifiable observable market data (e.g., interest rates and yield curves observable at commonly quoted intervals and credit spreads), bids provided by brokers or dealers, or quoted prices of securities with similar characteristics. Corporate debt instruments are categorized at Level 3 when valuations using observable inputs are unavailable. The

Trustee obtains pricing based on indicative quotes or bid evaluations from vendors, brokers, or the investment manager.

Other investments consist of securities such as derivatives and fixed income securities not classified as corporate debt instruments or U.S. Government securities. Level 1 securities are comprised of derivative securities traded on national and international exchanges. Level 2 securities are mainly comprised of over-the-counter (OTC) derivatives and fixed income investments valued by the Trustee using pricing models that use verifiable observable market data (e.g., interest rates and yield curves observable at commonly quoted intervals and credit spreads), bids provided by brokers or dealers, or quoted prices of securities with similar characteristics. Other investments are categorized at Level 3 when valuations using observable inputs are unavailable. The Trustee obtains pricing based on bid evaluations from vendors or the investment manager.

Private equity funds, real estate funds, and hedge funds are valued using the NAV based on the valuation models of underlying securities which generally include significant unobservable inputs that cannot be corroborated using verifiable observable market data. Valuations for private equity funds and real estate funds are determined by the general partners. The private equity fund portfolio NAV may be adjusted to reflect the timing differences between the most recently issued private equity fund financials and the reporting date after the practical expedient valuation provided by the general partners. Depending on the nature of the assets, the general partners may use various valuation methodologies, including the income and market approaches in their models. The market approach consists of analyzing market transactions for comparable assets while the income approach uses earnings or the net present value of estimated future cash flows adjusted for liquidity and other risk factors. Hedge funds are valued by independent administrators using various pricing sources and models based on the nature of the securities. Private equity funds, real estate funds, and hedge funds are generally not categorized in a level of fair value hierarchy as the Corporation cannot fully redeem the investment in the near-term and NAV as a practical expedient is deemed to apply to those assets. Hedge funds contain liquidity provisions which generally allow for redemptions within several months.

Private equity funds are typically structured as limited partnerships consisting of investments in various strategies, including buyouts, growth equity, venture capital, and private credit. The term of each private equity fund is typically eight to twelve years, and the funds investors do not have the right to redeem their investment at its NAV. Instead, the investors receive distributions as the underlying assets of the fund are liquidated. Real estate funds consist of investments in U.S. and international commercial real estate held primarily by limited partnerships. The term of each real estate fund is generally eight to ten years, and the real estate fund's investors do not have the right to redeem their investors receive distributions as the underlying assets of the fund are liquidated. Unfunded capital commitments related to the Master Trust's investment in private equity and real estate funds as of December 31, 2022 and 2021 totaled \$3.4 billion and \$3.5 billion, respectively. Hedge fund investments are made through commingled fund vehicles and depending on the hedge fund, is typically 45 to 180 days in advance.

In order to reduce the allocation of private equity, a special purpose vehicle (SPV) was created in June 2022 in the Master Trust. Approximately \$1.4 billion of private equity funds were transferred to this SPV as tax-free transfers, and the Master Trust will continue to guarantee any applicable uncalled capital commitments. On July 5th, the SPV took a \$500 million loan with a five-year maturity at an interest rate of SOFR + 2.65%, which is non-recourse to the Master Trust and Lockheed Martin. It does not place any material restrictions on the ability of the SPV to dispose of the private equity fund interests. The cash proceeds of the loan are invested in the fixed income asset class.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while management believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

In estimating the fair value of the investments not in a level of fair value hierarchy, management may use third-party pricing sources or appraisers. In substantiating the reasonableness of the pricing data provided by third parties, management evaluates a variety of factors including review of methods and assumptions used by external sources, recently executed transactions, existing contracts, economic conditions, industry and market developments, and overall credit ratings.

Derivative Instruments

Derivative instruments are used in the Master Trust to achieve certain portfolio objectives and to adjust asset allocation in order to manage market risk. Derivative instruments allow internal and external investment managers to achieve these goals efficiently while maintaining appropriate liquidity.

As of December 31, 2022 and 2021, the Master Trust utilized four types of derivative instruments:

Futures Contracts – The purchase of futures contracts allows the Master Trust to achieve desired portfolio positions in various commodities without the need to physically own and store them. Futures are used to manage the overall risk to equity and fixed income markets. Foreign exchange futures are used to separate the management of currency exposure from foreign equity exposure. Futures contracts are exchange-traded with initial margin required from both parties and daily settlement of gains and losses; therefore credit and counterparty risks are minimal, and futures contracts have no net market value.

Forward Contracts – Forward contracts are similar to futures contracts except that they are traded OTC rather than over a standardized exchange. Foreign exchange forwards are used by investment managers as another means of separating currency risk from investment risk. These contracts allow a manager to lock into a rate at which to exchange an upcoming settlement in a foreign currency into U.S. dollars. Commodity forward contracts are used by investment managers to achieve desired portfolio positions in various commodities. While forward contracts are traded OTC, they are generally very short-term which minimizes counterparty risk.

Options, including Options on Futures – These contracts allow the holder to buy or sell a security or a futures contract at a specified price prior to an expiration date. Options are primarily used to protect against downside risk in an equity, commodity or currency position held by the Master Trust.

Swaps – Swaps are OTC agreements between counterparties to exchange the return stream of one security for another. Swaps are utilized either to provide exposure to a security for which there is no available futures contract, or to achieve an exposure over a specific time horizon.

A long derivative position increases (decreases) in value when the price of the underlying asset (e.g., currency, equity index) increases (decreases). A short derivative position increases (decreases) when the price of the underlying asset decreases (increases).

Offsetting and Netting of Assets and Liabilities

The Master Trust is subject to master netting agreements with certain counterparties. These agreements govern the terms of certain transactions and reduce the counterparty risk associated with the relevant transactions by permitting the Master Trust to net certain amounts due from the Plan to a counterparty against amounts due to the Plan from the same counterparty under certain conditions.

As of December 31, 2022, information related to the potential effect of the Master Trust's master netting agreements was as follows (in thousands):

Repurchase Agreements

Collateralized Transactions

The Master Trust enters into reverse repurchase agreements as well as securities lending and borrowing agreements to generate additional income and earnings. Reverse repurchase agreements are transactions in which the Master Trust lends cash to borrow financial instruments from another firm and simultaneously enters into an agreement to resell the same financial instruments at a higher price in the future. Securities lending agreements are transactions in which the Master Trust lends securities to another firm, in exchange for collateral which is returned upon the conclusion of the loan, with interest received by the Master Trust over the life of the transaction. The collateral requires 102% of the fair value of U.S. securities borrowed and 105% for non-U.S. securities borrowed. The collateral is marked to market on a daily basis. In the event the counterparty is unable to meet its contractual obligation under the securities lending arrangement, the Master Trust may incur losses equal to the amount by which the market value of the securities differ from the amount of collateral held. The Master Trust mitigates credit risk associated with securities lending arrangements by monitoring the fair value of the securities loaned on a daily basis, with additional collateral obtained or refunded as necessary. Securities borrowing agreements are transactions in which the

Lockheed Martin Corporation Pension Plan for Employees in Participating Bargaining Units Notes to Financial Statements (continued)

Master Trust borrows securities from another firm, typically in connection with a short sale, in exchange for collateral which is returned upon the conclusion of the transaction.

As of December 31, 2022 and 2021, the fair value of securities on loan was \$66 million and \$484 million, respectively, the fair value of securities borrowed was \$327 million and \$1.2 billion, respectively, and the fair value for reverse repurchase agreements was \$(219) million and \$785 million respectively. Collateral pledged for securities on loan is not held in the Master Trust, and cannot be sold, repledged, or traded.

Securities lending and borrowing and reverse repurchase agreement income/(loss) earned by the Master Trust is recorded on an accrual basis and was approximately \$(5) million and \$2 million, respectively for the years ended December 31, 2022 and 2021.

5. Parties-in-Interest Transactions

The Master Trust invests in funds managed by The Northern Trust Company, the former Trustee. Investments in these funds qualify as party-in-interest transactions for which a statutory exemption from the prohibited transaction regulation exists.

6. Income Tax Status

The Internal Revenue Service (IRS) has determined and informed the Corporation by a letter dated March 11, 2013, that the Plan is designed in accordance with applicable sections of the IRC, and therefore, the related trust is exempt from taxation. Under current IRS determination letter procedures, there is no opportunity for the Plan to obtain a more recent letter from the IRS. The Plan has been amended since issuance of the determination letter. However, the Plan Administrator and the Corporation's counsel believe that the current design and operations of the Plan are in compliance with the applicable provisions of the IRC, and therefore, believe the Plan, as amended, is qualified and the related trust is tax exempt.

GAAP requires plan management to evaluate tax positions taken by the Plan to determine whether the Plan has taken any uncertain positions that more likely than not would not be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2022, there are no uncertain positions taken or expected to be taken that would require recognition of a liability or asset or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions, but no tax audits are in progress. The Plan Administrator considers the Plan no longer subject to income tax examinations for years prior to 2019.

7. Reconciliation of Financial Statements to Form 5500

Interest in net investment losses of Master Trust reported in the financial statements is \$7.1 million less than the amount reported on Form 5500 for the year ended December 31, 2022. Administrative expenses reported in the financial statements are \$7.1 million greater than the amount reported on Form 5500 for the year ended December 31, 2022. These differences arose from the classification of certain administrative expenses which are included in the net investment losses in the Master Trust for Form 5500 reporting purposes.

Disability Rates	See Table 4.
Decrement Timing	Beginning of year decrements, with 100% retirement occurring at beginning of year.
Surviving Spouse Benefit	It is assumed that 80% of males and 50% of females have an eligible spouse, and that males are three years older than their spouses.

EIN: 52-1893632 PN: 067

For ERISA Requirements	
Benefit Limits	Projected benefits are limited by the current IRC section 415 maximum benefit of \$230,000 and the IRC section 401(a)(17) compensation limit of \$290,000.
Valuation of Plan Assets	Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value.
	A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section $430(h)(2)(C)(iii)$.
Expected Return on Assets	
2019 Plan Year	7.00%, limited to 5.94%
2020 Plan Year 2021 Plan Year	7.00%, limited to 5.47% 6.50%, limited to 5.92%
Trust Expenses Included in Target Normal Cost	\$3,292,190
Actuarial Method	Standard unit credit cost method
Valuation Date	January 1, 2022

Actuarial Assumptions and Methods

Discussion of Actuarial Assumptions and Methods

For the funding valuation, the allowable interest rates and mortality tables available to measure plan liabilities are prescribed by IRC section 412. Aon provided guidance with respect to the alternative interest rate and mortality table options, and it is our belief that the options prescribed by Lockheed Martin Corporation are appropriate for funding purposes. It is our belief that all other actuarial assumptions used for the funding valuation represent reasonable expectations of anticipated plan experience. The actuarial cost and amortization methods used are prescribed by IRC section 412. While the method used to value assets is prescribed by Lockheed Martin Corporation, Aon provided guidance with respect to the use of this method, and it is our belief that the method is appropriate for funding purposes.

Calculation of Normal Costs and Liabilities

The method used to calculate the ERISA target normal cost and funding target, is the unit credit cost method. The funding target under IRC section 430 is calculated as the present value of all benefits that have been accrued or earned under the plan as of the first day of the plan year, based on current service and current pay. The target normal cost is the present value of all benefits expected to accrue or be earned under the plan year, including any increase in benefits earned in prior plan years attributable to compensation increases in the current plan year, plus certain trust expenses.

Under this method, benefits are estimated at each decrement age using service and earnings as of the valuation date. The present value of these estimated benefits using the applicable ERISA assumptions is the ERISA funding target. The target normal cost is the present value of the benefits earned during the year.

For calculating the actuarial present value of vested benefits, benefits at each decrement age are determined in the same manner but are then multiplied by each participant's vesting percentage as of the valuation date. The present value of these estimated vested benefits is determined without recognition of any benefit for which a participant will become entitled only through the advancement in service or age while actively employed. In addition, certain ancillary benefits have been treated as vested consistent with PBGC premium regulations.

The ERISA funding target for lump sum benefits, other than lump sum benefits paid from a statutory hybrid plan under the provisions of IRC section 411(a)(13)(A), is determined by valuing the annuity that corresponds to the distribution using special actuarial assumptions, as described under Treasury regulations section 1.430(d). Under these special assumptions, for the period beginning with the annuity starting date, the current IRC section 417(e) applicable mortality table is substituted for the mortality table otherwise used.

Schedule SB, line 22—Description of Weighted Average Retirement Age

The average retirement age shown in line 22 has been calculated by assuming the following retirement rates and no decrements other than retirement for this calculation. All retirements are assumed to occur at beginning of year.

(d) (a) Product (b) (C) Rate Weight (a) × (b) × (c) Age 5.00% 1.0000 55 2.75 2.66 56 5.00% 0.9500 57 5.00% 0.9025 2.57 58 2.49 5.00% 0.8574 59 5.00% 0.8145 2.40 60 10.00% 0.7738 4.64 4.25 61 10.00% 0.6964 62 10.00% 0.6268 3.89 63 10.00% 0.5641 3.55 64 3.25 10.00% 0.5077 65 25.00% 0.4569 7.42 66 20.00% 0.3427 4.52 67 20.00% 0.2741 3.67 68 20.00% 2.98 0.2193 69 20.00% 0.1755 2.42 70 100.00% 0.1404 9.83 Weighted Average 63.29

ASPEP Union (696 active participants)

Non-ASPEP Unions (415 active participants)

			(d)
(a)	(b)	(c)	Product
Age	Rate	Weight	(a) × (b) × (c)
60	10.00%	1.0000	6.00
61	10.00%	0.9000	5.49
62	10.00%	0.8100	5.02
63	15.00%	0.7290	6.89
64	10.00%	0.6197	3.97
65	25.00%	0.5577	9.06
66	20.00%	0.4183	5.52
67	20.00%	0.3346	4.48
68	20.00%	0.2677	3.64
69	20.00%	0.2142	2.96
70	100.00%	0.1713	11.99
	Weigh	nted Average	65.02

Overall weighted average: [(63.29 x 696) + (65.02 x 415)] / 1,111 = 63.94

Schedule SB, line 24—Change in Actuarial Assumptions

The funding valuation reflects the following changes in non-prescribed assumptions:

- A change in the retirement rates for GE ASPEP Union.
- A change in retroactive payments for terminated vested participants over age 65, from a one-time lump sum to spread over 5 years.
- A change in the assumed expense payable from the trust from \$4,406,547 to \$3,292,190

Schedule SB, Part V—Statement of Actuarial Assumptions/Methods

Interest Rates for Minimum Funding Purposes	Based on segment rates with a four-month lookback (as of September 2021), each adjusted as needed to fall within the 25-year average interest rate stabilization corridor without regard to ARPA
1st Segment Rate 2nd Segment Rate 3rd Segment Rate	4.75% 5.18% 5.92%
Interest Rates for Maximum Tax Purposes	Based on segment rates with a four-month lookback (as of September 2021), without regard to interest rate stabilization
1st Segment Rate 2nd Segment Rate 3rd Segment Rate	1.07% 2.68% 3.36%
Social Security Wage Base Increases	Future wage indices are based on a national wage increase of 4.00% per year.
Retirement Age Active Participants Terminated Vested Participants	See Table 1. Age 62
Mortality Rates Healthy and Disabled	2021 generational mortality table for annuitants and non-annuitants per §1.430(h)(3)-1(d) and IRS Notice 2019-67
Withdrawal Rates	Base Table: 2003 SOA select and ultimate table. Load: 150% (125% non-ASPEP) See Table 2 and Table 3.
Disability Rates	See Table 4.
Decrement Timing	Beginning of year decrements, with 100% retirement occurring at beginning of year.
Surviving Spouse Benefit	It is assumed that 80% of males and 50% of females have an eligible spouse, and that males are three years older than their spouses.

For ERISA Requirements	
Benefit Limits	Projected benefits are limited by the current IRC section 415 maximum benefit of \$230,000 and the IRC section 401(a)(17) compensation limit of \$290,000.
Valuation of Plan Assets	Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value. A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).
Expected Return on Assets 2019 Plan Year 2020 Plan Year 2021 Plan Year	7.00%, limited to 5.94% 7.00%, limited to 5.47% 6.50%, limited to 5.92%
Trust Expenses Included in Target Normal Cost	\$3,292,190
Actuarial Method	Standard unit credit cost method
Valuation Date	January 1, 2022

Actuarial Assumptions and Methods

Discussion of Actuarial Assumptions and Methods

For the funding valuation, the allowable interest rates and mortality tables available to measure plan liabilities are prescribed by IRC section 412. Aon provided guidance with respect to the alternative interest rate and mortality table options, and it is our belief that the options prescribed by Lockheed Martin Corporation are appropriate for funding purposes. It is our belief that all other actuarial assumptions used for the funding valuation represent reasonable expectations of anticipated plan experience. The actuarial cost and amortization methods used are prescribed by IRC section 412. While the method used to value assets is prescribed by Lockheed Martin Corporation, Aon provided guidance with respect to the use of this method, and it is our belief that the method is appropriate for funding purposes.

Calculation of Normal Costs and Liabilities

The method used to calculate the ERISA target normal cost and funding target, is the unit credit cost method. The funding target under IRC section 430 is calculated as the present value of all benefits that have been accrued or earned under the plan as of the first day of the plan year, based on current service and current pay. The target normal cost is the present value of all benefits expected to accrue or be earned under the plan year, including any increase in benefits earned in prior plan years attributable to compensation increases in the current plan year, plus certain trust expenses.

Under this method, benefits are estimated at each decrement age using service and earnings as of the valuation date. The present value of these estimated benefits using the applicable ERISA assumptions is the ERISA funding target. The target normal cost is the present value of the benefits earned during the year.

For calculating the actuarial present value of vested benefits, benefits at each decrement age are determined in the same manner but are then multiplied by each participant's vesting percentage as of the valuation date. The present value of these estimated vested benefits is determined without recognition of any benefit for which a participant will become entitled only through the advancement in service or age while actively employed. In addition, certain ancillary benefits have been treated as vested consistent with PBGC premium regulations.

The ERISA funding target for lump sum benefits, other than lump sum benefits paid from a statutory hybrid plan under the provisions of IRC section 411(a)(13)(A), is determined by valuing the annuity that corresponds to the distribution using special actuarial assumptions, as described under Treasury regulations section 1.430(d). Under these special assumptions, for the period beginning with the annuity starting date, the current IRC section 417(e) applicable mortality table is substituted for the mortality table otherwise used.

Schedule SB, Part V—Summary of Plan Provisions

Effective Date of Plan	January 1, 1995
Most Recent Collective Bargaining Agreements Eligibility	July 2014 for IUE August 2014 for IFPTE September 2018 for ASPEP February 2019 for SDA January 1st following date of hire. ASPEP and IFPTE employees hired after December 31, 2006, SDA employees hired after December 31, 2011, and IUE employees hired after December 31, 2012 will not be eligible for the plan.
Compensation	Total salary or wages including overtime, vacation, bonus, cost of living adjustment and any deferral or reduction in salary elected by an employee in accordance with a plan established under section 125 or 401(k) and excluding incentive compensation, commissions, living allowances, retainers and any special services performed outside of the United States. Compensation is limited to the annual compensation limit listed in Internal Revenue Code section 401(a)(17).
	Earnings credits are frozen for the ASPEP union effective December 31, 2019.
Pension Benefit Service	Full years and fractional calendar years
	Service credits are frozen for the ASPEP union effective December 31, 2019
Pension Qualification Service	Calendar years during which an employee is credited with 1,000 hours of service (ratioed for part-time employees).
Retirement for ASPEP Employees	ASPEP employees who retire on or after January 1, 2007 may elect to have their retirement benefits calculated under the terms of this plan (see provisions below) or under the terms of the Lockheed Martin Corporation Salaried Retirement Program (LMRP). The election is irrevocable and made at the time of retirement. Credited service for non-LMRP benefits under the career average

Age 65

formula froze effective January 1, 2013, and the LMRP formula will freeze effective December 31, 2019. The LMRP early supplements provision was eliminated as of January 2, 2011.

Normal Retirement Eligibility Requirement

Benefit

Regular Pension

Future Service Annuity

A career average benefit equal to the sum of the regular pension and the future service annuity.

Benefit, defined in the GE pension plan, accrued as of December 31, 1994 considering all compensation earned and all credited years of service.

1.45% of the employee's compensation earned in each calendar year up to the following breakpoints:

Year	Breakpoint
Before 1997	\$22,500
1997 - 1998	\$24,700
1999 - 2000	\$26,000
2001 - 2002	\$27,000
2003	\$31,000
2004	\$32,000
2005	\$34,000
2006	\$36,000
2007	\$38,000
2008	\$40,000
2009	\$42,000
2010	\$45,000
2011	\$48,500
2012	\$51,500
2013	\$54,500
2014	\$55,500
After 2014	\$15,000 below Social Security
	covered compensation for an
	employee attaining age 65
	during this year

Normal Retirement (cont.) Future Service Annuity (cont.)

For ASPEP participants, the breakpoints are as follows:

	Year	Breakpoint
	Before 1997	\$22,500
	1997 - 1998	\$24,700
	1999 - 2000	\$26,000
	2001 - 2002	\$27,000
	2003	\$31,000
	2004	\$32,000
	2005	\$34,000
	2006	\$36,000
	2007	\$38,000
	2008	\$40,000
	2009	\$42,000
	2010	\$45,000
	After 2010	\$13,000 below Social Security covered compensation for an employee attaining age 65 during this year
	plus 1.90% of rer	naining compensation.
1993 Pension Benefit Update	1993 (including 1993) shall not compensation fr \$25,000, plus	ce annuity as of December 31, all updates as of December 31, be less than 0.90% of average om 1991 through 1993 up to 1.50% of remaining average times benefit service through 93.
Minimum Benefit for Retirement	\$53 to \$70 for SI	to \$66 (\$28 to \$39 for ASPEP and DA) per month per year of service ear average salary.
Personal Pension Account Annuity	account converte the date of conv normal retirement	the employee's personal pension ed to an immediate annuity as of version is payable on or after his nt date. Employee contributions effective December 31, 1994.

EIN: 52-1893632 PN: 067

Normal Retirement (cont.) Special Pension Update	If an employee has 25 years of service or is age 50 with 20 years of service as of December 31, 2005, upon retirement he will receive an additional benefit equal to 1.00% of average compensation up to \$42,500, plus 1.40% of average compensation over \$42,500, times years of credited service. Average compensation is average pay during calendar years 2003, 2004 and 2005. The minimum pension update is \$1,000.
Early Retirement Eligibility Requirement	Age 60
Benefit	Benefit accrued to date of early retirement
	Employees who participated in the GE pension plan on August 14, 1955 may retire at age 55 with a benefit as accrued to date of early retirement.
Regular Supplement	A supplement of \$21.50 (\$14 for ASPEP and \$24 for SDA) per month per year of service (no maximum) is payable up to age 62 for retirement between ages 60 and 62 after January 1, 2015 (August 1, 2006 for ASPEP).
Special Supplement	If an employee with 25 years of service retires after January 1, 2015 and before April 26, 2019 (February 16, 2024 for SDA, April 5, 2019 for IFPTE, and September 28, 2018 for ASPEP) in accordance with special eligibility rules, he will receive an additional \$500 (\$300 for ASPEP and \$550 for SDA) monthly supplement to age 62 (for life for SDA).
"Adder" Benefit	If an employee has 25 years of service or is age 50 with 20 years of service as of December 31, 1997, upon retirement he will receive an additional benefit equal to .03% of average compensation from 1995 to 1997, times years of pension qualification service.

Termination	
Eligibility	Five years of pension qualification service equals 100% vesting.
Benefit Formula	Annual benefit payable at age 60
	A vested employee may withdraw his contributions plus interest plus his personal pension account (regular and voluntary) and retain his right to the company provided portion of his vested benefit.
Preretirement Spouse's Benefit	
Eligibility	Death occurs while in active status after attainment of the eligibility age for early retirement.
Benefit Formula	The surviving spouse would receive 50% of the pension accrued to the date of death reduced by the appropriate joint and survivor factors. If the spouse predeceases the participant within the first five years after retirement, a fraction of the pension reduction is discontinued. The minimum total payment under this form is five times the employee's pension before reduction.
Eligibility	Death occurs while in active status after attainment of eligibility for vesting but prior to the eligibility age for early retirement.
Benefit Formula	The surviving spouse would receive 50% of the pension accrued to the date of death reduced by the appropriate early retirement and joint and survivor factors. The payment would be deferred to no earlier than the early retirement date of the deceased participant. The maximum early retirement reduction is 12%.

Death Benefits (Before Retirement) Eligibility	Not eligible for the preretirement spouse benefit
Benefit Formula	Aggregate amount of contributions plus interest to date, if death occurs before five years of service, before age 60 and after June 30, 1988.
	After attainment of age 60, annual pension is payable for five years.
	If death occurs after 15 years of pension qualification service and before age 60, 88% of the annual pension is payable for five years.
Personal Pension Account	Required and voluntary employee contributions are payable in a lump sum, unless a surviving spouse entitled to a survivor benefit elects payment in another form.
Death Benefits (After Retirement) Benefit Formula	Annual pension is payable for five years.
Personal Pension Account	Unless waived by the employee with spouse consent, the required and voluntary accounts are converted to an annuity based on the form of annuity elected for the regular pension.
Total and Permanent Disability Retirement	
Eligibility Requirement	15 years of pension qualification service
Benefit	For retirements between ages 55 and 59, 90% of accrued benefit determined as of date of disability.
	For retirement age 54 or younger, 89% of accrued benefit determined as of date of disability.
Supplement	A supplement of \$85 per month until Social Security normal retirement age
Normal Form of Annuity	
Married Participants	50% joint and survivor annuity
Unmarried Participants	Five year certain and continuous annuity

Plan Changes Since the Prior Year

The funding valuation reflects the following plan changes:

 The limit increase for the current IRC section 401(a)(17) compensation limit from \$290,000 to \$305,000 and the current IRC section 415 maximum benefit from \$230,000 to \$245,000.

Other Information to Fully and Fairly Disclose the Actuarial Position of the Plan

Due to software limitations with the electronic filing process, information filed electronically cannot be controlled by the Enrolled Actuary. The values on the signed Schedule SB will govern to the extent there are any differences in the entries filed electronically and the actual data contained on the signed Schedule SB.

Under the American Rescue Plan Act of 2021 (ARPA), the stabilized interest rates for certain purposes will be adjusted once the ARPA stabilization is applied. By default, this stabilization would have applied starting with the 2020 plan year. Lockheed Martin Corporation elected to defer applying the stabilized interest rates to the 2022 plan year. This Schedule SB reflects stabilized 2022 minimum funding interest rates that are adjusted for ARPA.

Schedule SB, line 22—Description of Weighted Average Retirement Age

The average retirement age shown in line 22 has been calculated by assuming the following retirement rates and no decrements other than retirement for this calculation. All retirements are assumed to occur at beginning of year.

(a)	(b) Bata	(C) Moisht	(d) Product
Age	Rate	Weight	(a) × (b) × (c)
55	5.00%	1.0000	2.75

Schedule SB, Part V—Summary of Plan Provisions

Effective Date of Plan	January 1, 1995
Most Recent Collective Bargaining Agreements Eligibility	July 2014 for IUE August 2014 for IFPTE September 2018 for ASPEP February 2019 for SDA January 1st following date of hire. ASPEP and IFPTE employees hired after December 31, 2006, SDA employees hired after December 31, 2011, and IUE employees hired after December 31, 2011, 2012 will not be eligible for the plan.
Compensation	Total salary or wages including overtime, vacation, bonus, cost of living adjustment and any deferral or reduction in salary elected by an employee in accordance with a plan established under section 125 or 401(k) and excluding incentive compensation, commissions, living allowances, retainers and any special services performed outside of the United States. Compensation is limited to the annual compensation limit listed in Internal Revenue Code section 401(a)(17).
	Earnings credits are frozen for the ASPEP union effective December 31, 2019.
Pension Benefit Service	Full years and fractional calendar years
	Service credits are frozen for the ASPEP union effective December 31, 2019
Pension Qualification Service	Calendar years during which an employee is credited with 1,000 hours of service (ratioed for part-time employees).
Retirement for ASPEP Employees	ASPEP employees who retire on or after January 1, 2007 may elect to have their retirement benefits calculated under the terms of this plan (see provisions below) or under the terms of the Lockheed Martin Corporation Salaried Retirement Program (LMRP). The election is irrevocable and made at the time of retirement. Credited service for non-LMRP benefits under the career average

Age 65

EIN: 52-1893632 PN: 067

formula froze effective January 1, 2013, and the LMRP formula will freeze effective December 31, 2019. The LMRP early supplements provision was eliminated as of January 2, 2011.

Normal Retirement **Eligibility Requirement**

Benefit

Regular Pension

Future Service Annuity

A career average benefit equal to the sum of the regular pension and the future service annuity.

Benefit, defined in the GE pension plan, accrued as of December 31, 1994 considering all compensation earned and all credited years of service.

1.45% of the employee's compensation earned in each calendar year up to the following breakpoints:

Year	Breakpoint
Before 1997	\$22,500
1997 - 1998	\$24,700
1999 - 2000	\$26,000
2001 - 2002	\$27,000
2003	\$31,000
2004	\$32,000
2005	\$34,000
2006	\$36,000
2007	\$38,000
2008	\$40,000
2009	\$42,000
2010	\$45,000
2011	\$48,500
2012	\$51,500
2013	\$54,500
2014	\$55,500
After 2014	\$15,000 below Social Security covered compensation for an employee attaining age 65 during this year

EIN: 52-1893632 PN: 067

Normal Retirement (cont.) Future Service Annuity (cont.)

For ASPEP participants, the breakpoints are as follows:

	Year	Brooknaint
	Before 1997	Breakpoint \$22,500
	1997 - 1998	\$22,300 \$24,700
		\$26,000
	1999 - 2000	
	2001 - 2002 2003	\$27,000 \$31,000
	2003	\$31,000 \$32,000
	2004	\$32,000
		\$34,000 \$36,000
	2006	\$36,000
	2007	\$38,000
	2008	\$40,000
	2009	\$42,000
	2010	\$45,000
	After 2010	\$13,000 below Social Security covered compensation for an
		employee attaining age 65 during this year
	plus 1.90% of rer	naining compensation.
1993 Pension Benefit Update	1993 (including 1993) shall not compensation fr \$25,000, plus	ce annuity as of December 31, all updates as of December 31, be less than 0.90% of average om 1991 through 1993 up to 1.50% of remaining average times benefit service through 93.
Minimum Benefit for Retirement	\$53 to \$70 for SI	to \$66 (\$28 to \$39 for ASPEP and DA) per month per year of service ear average salary.
Personal Pension Account Annuity	account converte the date of conv normal retirement	the employee's personal pension ed to an immediate annuity as of rersion is payable on or after his nt date. Employee contributions effective December 31, 1994.

EIN: 52-1893632 PN: 067

Normal Retirement (cont.) Special Pension Update	If an employee has 25 years of service or is age 50 with 20 years of service as of December 31, 2005, upon retirement he will receive an additional benefit equal to 1.00% of average compensation up to \$42,500, plus 1.40% of average compensation over \$42,500, times years of credited service. Average compensation is average pay during calendar years 2003, 2004 and 2005. The minimum pension update is \$1,000.
Early Retirement Eligibility Requirement	Age 60
Benefit	Benefit accrued to date of early retirement
	Employees who participated in the GE pension plan on August 14, 1955 may retire at age 55 with a benefit as accrued to date of early retirement.
Regular Supplement	A supplement of \$21.50 (\$14 for ASPEP and \$24 for SDA) per month per year of service (no maximum) is payable up to age 62 for retirement between ages 60 and 62 after January 1, 2015 (August 1, 2006 for ASPEP).
Special Supplement	If an employee with 25 years of service retires after January 1, 2015 and before April 26, 2019 (February 16, 2024 for SDA, April 5, 2019 for IFPTE, and September 28, 2018 for ASPEP) in accordance with special eligibility rules, he will receive an additional \$500 (\$300 for ASPEP and \$550 for SDA) monthly supplement to age 62 (for life for SDA).
"Adder" Benefit	If an employee has 25 years of service or is age 50 with 20 years of service as of December 31, 1997, upon retirement he will receive an additional benefit equal to .03% of average compensation from 1995 to 1997, times years of pension qualification service.

Termination Eligibility Five years of pension qualification service equals 100% vesting. Benefit Formula Annual benefit payable at age 60 A vested employee may withdraw his contributions plus interest plus his personal pension account (regular and voluntary) and retain his right to the company provided portion of his vested benefit. Preretirement Spouse's Benefit Eligibility Death occurs while in active status after attainment of the eligibility age for early retirement. Benefit Formula The surviving spouse would receive 50% of the pension accrued to the date of death reduced by the appropriate joint and survivor factors. If the spouse predeceases the participant within the first five years after retirement, a fraction of the pension reduction is discontinued. The minimum total payment under this form is five times the employee's pension before reduction. Eligibility Death occurs while in active status after attainment of eligibility for vesting but prior to the eligibility age for early retirement. Benefit Formula The surviving spouse would receive 50% of the pension accrued to the date of death reduced by the appropriate early retirement and joint and survivor factors. The payment would be deferred to no earlier than the early retirement date of the deceased participant. The maximum early retirement reduction is 12%.

EIN: 52-1893632 PN: 067

Death Benefits (Before Retirement) Eligibility	Not eligible for the preretirement spouse benefit
Benefit Formula	Aggregate amount of contributions plus interest to date, if death occurs before five years of service, before age 60 and after June 30, 1988.
	After attainment of age 60, annual pension is payable for five years.
	If death occurs after 15 years of pension qualification service and before age 60, 88% of the annual pension is payable for five years.
Personal Pension Account	Required and voluntary employee contributions are payable in a lump sum, unless a surviving spouse entitled to a survivor benefit elects payment in another form.
Death Benefits (After Retirement) Benefit Formula	Annual pension is payable for five years.
Personal Pension Account	Unless waived by the employee with spouse consent, the required and voluntary accounts are converted to an annuity based on the form of annuity elected for the regular pension.
Total and Permanent Disability Retirement	
Eligibility Requirement	15 years of pension qualification service
Benefit	For retirements between ages 55 and 59, 90% of accrued benefit determined as of date of disability.
	For retirement age 54 or younger, 89% of accrued benefit determined as of date of disability.
Supplement	A supplement of \$85 per month until Social Security normal retirement age
Normal Form of Annuity Married Participants	50% joint and survivor annuity
Unmarried Participants	Five year certain and continuous annuity

Plan Changes Since the Prior Year

The funding valuation reflects the following plan changes:

 The limit increase for the current IRC section 401(a)(17) compensation limit from \$290,000 to \$305,000 and the current IRC section 415 maximum benefit from \$230,000 to \$245,000.

Other Information to Fully and Fairly Disclose the Actuarial Position of the Plan

Due to software limitations with the electronic filing process, information filed electronically cannot be controlled by the Enrolled Actuary. The values on the signed Schedule SB will govern to the extent there are any differences in the entries filed electronically and the actual data contained on the signed Schedule SB.

Under the American Rescue Plan Act of 2021 (ARPA), the stabilized interest rates for certain purposes will be adjusted once the ARPA stabilization is applied. By default, this stabilization would have applied starting with the 2020 plan year. Lockheed Martin Corporation elected to defer applying the stabilized interest rates to the 2022 plan year. This Schedule SB reflects stabilized 2022 minimum funding interest rates that are adjusted for ARPA.

Schedule SB, line 24—Change in Actuarial Assumptions

The funding valuation reflects the following changes in non-prescribed assumptions:

- A change in the retirement rates for GE ASPEP Union.
- A change in retroactive payments for terminated vested participants over age 65, from a one-time lump sum to spread over 5 years.
- A change in the assumed expense payable from the trust from \$4,406,547 to \$3,292,190
