INDEPENDENT AUDITOR'S REPORT

Plan Administrator Lockheed Martin New Retirement Income Plan for Employees in Puerto Rico

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of the Lockheed Martin New Retirement Income Plan for Employees in Puerto Rico (the Plan), which comprise the statements of net assets available for benefits as of December 31, 2020 and 2019, the related statement of changes in net assets available for benefits for the year ended December 31, 2020, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audits in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974 (ERISA), the Plan Administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4, which was certified by Banco Popular de Puerto Rico, the Trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the Plan Administrator that the Trustee holds the Plan's investment assets and executes investment transactions. The Plan Administrator has obtained a certification from the Trustee as of December 31, 2020 and 2019 and for the year ended December 31, 2020, that the information provided to the Plan Administrator by the Trustee is complete and accurate.

1625 K Street, NW Washington, DC 20006 **T** +1 202 293 7500

Disclaimer of Opinion

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Other Matter

The supplemental schedules of assets (held at end of year) as of December 31, 2020 and reportable transactions for the year ended December 31, 2020 are required by the DOL's Rules and Regulations for Reporting and Disclosure under ERISA and are presented for the purpose of additional analysis and are not a required part of the financial statements. Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we do not express an opinion on these supplemental schedules.

Report on Form and Content in Compliance with DOL Rules and Regulations

Mitchell: Titus, LLP

The form and content of the information included in the financial statements and supplemental schedules, other than that derived from the information certified by the Trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

1. Description of the Plan

The following description of the Lockheed Martin Corporation New Retirement Income Plan for Employees in Puerto Rico (formerly the Lockheed Martin Retirement Income Plan for Employees in Puerto Rico) (the Plan) provides only general information about the Plan's provisions. Participants should refer to the Plan document and Summary Plan Description for a more complete description of the Plan's provisions.

General

The Plan is a defined benefit plan covering certain former employees of Lockheed Martin Corporation (the Corporation) located in Puerto Rico and has been amended from time to time. The Corporation is the Plan Sponsor and the Plan Administrator. Banco Popular de Puerto Rico is the Trustee of the Plan.

During 1996, there was a significant reduction in the workforce in the Puerto Rico business resulting in a partial plan termination, and affected participants became 100% vested.

Funding Policy

Funding for the Plan is determined in accordance with the Employee Retirement Income Security Act of 1974 (ERISA), as amended by the Pension Protection Act of 2006 (PPA) and consistent with U.S. Government Cost Accounting Standards (CAS). Contributions by the Corporation, if any, meet the ERISA minimum funding requirements. The Corporation has the right under the Plan to discontinue such contributions at any time and/or terminate the Plan. In the event of termination, the Plan's net assets are to be used first for the payment of benefits attributable to active and non-active participant contributions, next for the payment of retirement benefits that former employees or their beneficiaries have been receiving, and finally for the payment of other vested benefits. If the net assets are not sufficient to pay all benefits, the net assets shall be paid to the most senior categories until a category cannot be paid in full, and remaining net assets shall be allocated pro rata to all the benefits in that category and not those of lower priority.

2. Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting. Certain amounts in the prior year have been reclassified to conform to the current year presentation.

Accumulated Plan Benefits

Accumulated plan benefits are those estimated future periodic payments that are attributable under the Plan's provisions for credited service by participants from their date of eligibility to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired, terminated and disabled participants or their beneficiaries, and (b) present participants or their beneficiaries. Benefits for retired, terminated and disabled participants or their beneficiaries are based on each former participant's compensation during each year of credited service prior to his or her termination or retirement date. Accumulated plan benefits for active participants are based on each participant's compensation during each year of credited service preceding the valuation date. Benefits payable under all circumstances—retirement, death, disability and termination of employment—are included to the extent they are deemed attributable to employee service prior to the valuation date.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits. Actual results could differ from those estimates.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, currency, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Plan contributions, if any, are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Investment Valuation and Income Recognition

Investments in the Plan are reported at fair value. Fair value is the price that would have been received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 5 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation in fair value of investments includes the net realized and unrealized gains and losses on investments bought and sold as well as held during the year.

Administrative Expenses

Direct administrative expenses are paid by the Plan. Other indirect administrative expenses are paid by the Corporation.

Subsequent Events

The Plan has evaluated subsequent events through October 5, 2021, the date the financial statements were available to be issued. No material subsequent events have occurred since December 31, 2020 that required recognition or disclosure in these financial statements.

3. Actuarial Present Value of Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is the amount that results from applying actuarial assumptions to the accumulated plan benefits earned by the participants to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefits is as follows (in thousands):

	December 31,		
	2020 2019		
Vested benefits:			
Participants currently receiving payments	\$ 6,033	\$ 5,663	
Participants not currently receiving payments	 5,177	4,980	
Total vested benefits	11,210	10,643	
Total actuarial present value of accumulated plan benefits	\$ 11,210	\$ 10,643	

The significant actuarial assumptions used in the valuations were (a) life expectancy of participants (Pri-2012 Total Dataset with Scale MP-2020 for 2020 and with Scale MP-2019 for 2019), (b) turnover based upon the termination experience of the Plan, (c) assumed retirement age probabilities based on the experience of the Plan resulting in an average retirement age of 58, and (d) an annual discount rate of 2.50% and 3.25% for 2020 and 2019, respectively. The discount rate assumption used to calculate the actuarial present value of accumulated plan benefits is adjusted annually to reflect current yields on long-term high-quality corporate bonds. This can result in significant year to year fluctuations in the valuations.

Changes in the actuarial present value of accumulated plan benefits are as follows (in thousands):

	Year Ended	
	Decer	nber 31, 2020
Actuarial present value of accumulated plan benefits at beginning of year	\$	10,643
Increase (decrease) during the year attributable to:		
Increase for interest due to the decrease in the discount period		335
Benefits paid		(496)
Benefits accumulated		(17)
Changes in actuarial assumptions		745
Net increase		567
Actuarial present value of accumulated plan benefits at end of year	\$	11,210

The changes in actuarial assumptions reflect the decrease in the discount rate and change in mortality table, which impacted the actuarial present value of accumulated plan benefits by \$841,000 and \$(96,000), respectively.

The actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Investments

All investment information disclosed in the accompanying financial statements as of December 31, 2020 and 2019, supplemental schedules including investments held as of December 31, 2020, and net appreciation in fair value of investments for the year ended December 31, 2020, was obtained or derived from information certified as complete and accurate by Banco Popular de Puerto Rico, the Trustee of the Plan.

5. Fair Value Measurement

The accounting standard for fair value measurements defines fair value, establishes a market-based framework or hierarchy for measuring fair value, and requires disclosures regarding fair value measurements. The standard is applicable whenever assets and liabilities are measured and included in the financial statements at fair value.

The fair value hierarchy established in the standard prioritizes the inputs used in valuation techniques into three levels as follows:

- Level 1 Quoted prices in active markets for identical assets and liabilities;
- Level 2 Observable inputs, other than Level 1 prices, such as quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in inactive markets, and amounts derived from valuation models where all significant inputs are observable in active markets; and
- Level 3 Unobservable inputs where valuation models are supported by little or no market activity that one or more significant inputs are unobservable and require us to develop relevant assumptions.

The following table presents the fair value of Plan assets by asset category and their level within the fair value hierarchy as of December 31, 2020 (in thousands):

	Level 1	Level 2	Total
Cash equivalents	\$ 40	\$ _	\$ 40
U.S. Government securities	_	1,348	1,348
Common collective trusts	_	8,681	8,681
Registered investment companies	4,272	_	4,272
Total investments at fair value	\$ 4,312	\$ 10,029	\$ 14,341

The net appreciation for the year ended December 31, 2020 was \$1,786,000.

The following table presents the fair value of Plan assets by asset category and their level within the fair value hierarchy as of December 31, 2019 (in thousands):

	Level 1	Level 2	Total
Cash equivalents	\$ 40	\$ 	\$ 40
U.S. Government securities	<u>—</u>	1,125	1,125
Common collective trusts	_	7,597	7,597
Registered investment companies	3,696	<u> </u>	3,696
Total investments at fair value	\$ 3,736	\$ 8,722	\$ 12,458

Valuation Techniques

Cash equivalents are comprised of a short-term money-market instrument that is valued at cost, which approximates fair value.

U.S. Government securities categorized as Level 2 are valued by the Trustee using pricing models that use verifiable observable market data (e.g., interest rates and yield curves observable at commonly quoted intervals), bids provided by brokers or dealers, or quoted prices of securities with similar characteristics.

Common collective trusts (CCTs) are investment vehicles valued using the net asset value (NAV) provided by the fund managers. The NAV is the total value of the fund divided by the number of shares outstanding and is based on the fair value of underlying investments held by the CCTs. CCTs are traded at their NAV, determined daily or monthly depending on the CCT. CCTs are categorized as Level 2 because the NAVs, although readily determinable, are not published on an active exchange nor publicly available.

Registered investment company securities categorized as Level 1 are traded on active national and international exchanges and are generally valued at closing prices on the last trading day of the year.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while management believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

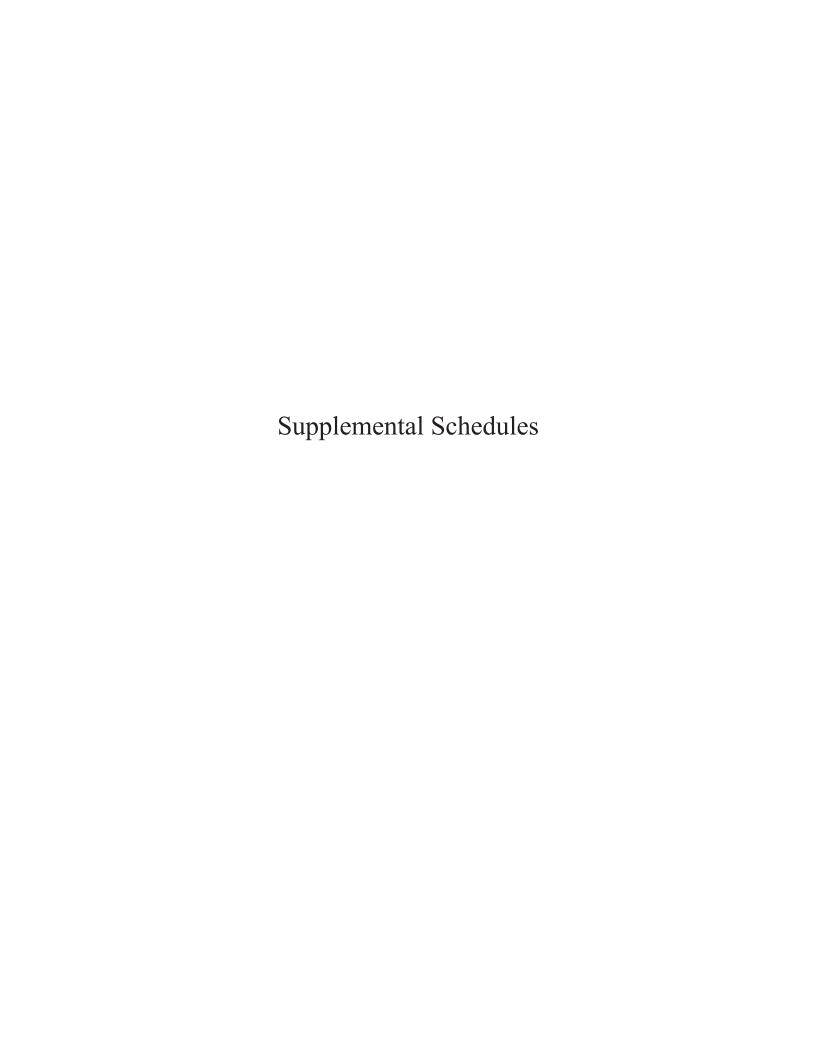

6. Parties-in-Interest Transactions

The Plan's assets include a money market account managed by Banco Popular de Puerto Rico, the Trustee. Investments in these funds qualify as party-in-interest transactions for which a statutory exemption from the prohibited transaction regulation exists.

7. Income Tax Status

The Plan has received a favorable determination letter dated June 26, 2012, from the Puerto Rico Department of Treasury. The determination letter states that the Plan meets the qualification requirements under Section 165(a) of the Puerto Rico Income Tax Act of 1954. The Plan is intended to be qualified under Puerto Rico tax laws, but not U.S. tax laws and, accordingly, no determination letter will be requested from the Internal Revenue Service (IRS). Therefore, no provision for income taxes has been made in the financial statements.

GAAP requires plan management to evaluate tax positions taken by the Plan to determine whether the Plan has taken any uncertain positions that more likely than not would not be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2020, there are no uncertain positions taken or expected to be taken that would require recognition of a liability or asset or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions, but no tax audits are in progress. The Plan Administrator considers the Plan is no longer subject to income tax examinations for years prior to 2017.

1/1/2020

Part V - Statement of Actuarial Assumptions/Methods

Under the Actuarial Methods described below, if all current assumptions remain constant and are realized, funding at least the Minimum Required Contribution each year will eventually accumulate sufficient plan assets to cover the Funding Target. Future widening of the interest rate stabilization corridor may extend the time period for the plan to become fully funded.

Cost Method

Costs have been computed in accordance with the Unit Credit Actuarial Cost Method and reflect the actuarial assumptions described under "Actuarial Assumptions" of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

Target Normal Cost

The Target Normal Cost is the present value of benefits expected to accrue during the plan year plus an estimate of the expenses to be paid from plan assets during the plan year.

Funding Target and Funding Shortfall

The Funding Target is the present value of benefits accrued as of the beginning of the plan year and the Funding Shortfall is the excess of the Funding Target over the Actuarial Value of Assets (reduced by the Credit Balance). The initial Funding Shortfall is amortized over seven years.

In subsequent years, the Funding Shortfall less the present value of prior year amortization installments is amortized over seven years, and added to any prior year amortization installments.

Segment rates are adjusted as necessary to fall within the specified corridor of the corresponding 25-year average of segment rates for the period ending September 30 of the calendar year preceding the first day of the plan year. The specified corridor is:

<u>Plan Year</u>	<u>Corridor</u>
Through 2020	90% - 110%
2021	85% - 115%
2022	80% - 120%
2023	75% - 125%
2024 and later	70% - 130%

The adjustments to fall within the specified corridor of the 25-year average of segment rates apply for determining the minimum required contribution and related funded percentages. They do not apply for determining the maximum tax deductible contribution or certain other situations.

Mortality Table: Prescribed IRS Generational Mortality Table – Separate

Lockheed Martin Corporation

New Retirement Income Plan for Employees in Puerto Rico
52-1893632/052
1/1/2020

Part V – Statement of Actuarial Assumptions/Methods

At-Risk Determination

The At-Risk Funding Target is determined by assuming that participants eligible to retire in the current plan year and next 10 plan years retire at the earliest possible date, but not before the end of the plan year. All participants are assumed to elect the optional form resulting in the highest possible present value.

A load is added to the At-Risk Funding Target and At-Risk Target Normal Cost when a plan is At-Risk in at least two years during the preceding four years. The load increases the At-Risk Funding Target by 4% of the Not At-Risk Funding Target plus \$700 per participant, and increases the At-Risk Target Normal Cost by 4% of the Not At-Risk Target Normal Cost.

The Funding Target and Target Normal Cost are calculated by multiplying the Not At-Risk values by 100% minus the Phase-In Percentage, plus the At-Risk values multiplied by the Phase-In Percentage.

Credit Balance

The Credit Balance consists of the Carryover Balance from excess contributions prior to the Pension Protection Act (PPA) of 2006, plus the Prefunding Balance from elected excess contributions after the PPA. Balances accumulate with interest and are reduced for amounts applied towards the Minimum Required Contribution, voluntary waivers by the plan sponsor, and compelled waivers to avoid benefit restrictions. The Actuarial Value of Assets is reduced by the Credit Balance to determine certain funded percentages and to determine the Funding Shortfall.

Asset Valuation Method

The Actuarial Value of Assets is determined using an annual average of the adjusted Fair Market Value of Assets with the earliest determination 24 months prior to the valuation date. The Fair Market Value of Assets in prior years is adjusted for contributions, benefit payments, expenses and expected earnings (not to exceed the third segment rate).

This is equivalent to the Fair Market Value of Assets, plus two-thirds of the (gain)/loss from the prior year, plus one-third of the (gain)/loss from the second preceding year. The (gain)/loss in each year is the difference between the expected and actual returns on the Fair Market Value of Assets.

The Actuarial Value of Assets is adjusted to be no less than 90% or no more than 110% of the Fair Market Value of Assets.

Since the expected earnings assumption cannot exceed the third segment rate, over time, the method may produce an Actuarial Value of Assets slightly below the Fair Market Value of Assets.

The Actuarial Value of Assets for determining the Maximum Tax Deductible Contribution reflects interest rate stabilization rates for discounting contributions and limiting expected earnings.

Lockheed Martin Corporation New Retirement Income Plan for Employees in Puerto Rico 52-1893632/052 1/1/2020

Part V – Statement of Actuarial Assumptions/Methods

The discount rate and mortality table are prescribed assumptions. All other assumptions used in this report are non-prescribed assumptions. Below are the actuarial assumptions as of January 1, 2020.

Discount Rate Effective Rate First Segment – First 5 Years Second Segment – Next 15 Years Third Segment – After 20 Years	With Interest Rate Stabilization 5.29% 3.64% 5.21% 5.94%	Without Interest Rate Stabilization 4.00% 2.79% 3.92% 4.38%

52-1893632/052
1/1/2020

Line 24 – Change in Actuarial Assumptions

Changes in Pension Plan Provisions

No changes in the pension plan provisions were recognized with this actuarial valuation.

Legislated Changes

There were no legislative changes recognized with this actuarial valuation.

Changes in Actuarial Assumptions

Effective with this valuation, the following non-prescribed assumption changes were recognized:

	<u>Prior</u>	<u>Current</u>
Expense Load	\$22,528	\$22,411
Heritage Martin Retirement Age	56	60

Changes in Actuarial Methods

No changes in actuarial methods were recognized with this actuarial valuation.

Lockheed Martin Corporation

New Retirement Income Plan for Employees in Puerto Rico
52-1893632/052
1/1/2020

Part V – Statement of Actuarial Assumptions/Methods

Under the Actuarial Methods described below, if all current assumptions remain constant and are realized, funding at least the Minimum Required Contribution each year will eventually accumulate sufficient plan assets to cover the Funding Target. Future widening of the interest rate stabilization corridor may extend the time period for the plan to become fully funded.

Cost Method

Costs have been computed in accordance with the Unit Credit Actuarial Cost Method and reflect the actuarial assumptions described under "Actuarial Assumptions" of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

Target Normal Cost

The Target Normal Cost is the present value of benefits expected to accrue during the plan year plus an estimate of the expenses to be paid from plan assets during the plan year.

Funding Target and Funding Shortfall

The Funding Target is the present value of benefits accrued as of the beginning of the plan year and the Funding Shortfall is the excess of the Funding Target over the Actuarial Value of Assets (reduced by the Credit Balance). The initial Funding Shortfall is amortized over seven years.

In subsequent years, the Funding Shortfall less the present value of prior year amortization installments is amortized over seven years, and added to any prior year amortization installments.

Segment rates are adjusted as necessary to fall within the specified corridor of the corresponding 25-year average of segment rates for the period ending September 30 of the calendar year preceding the first day of the plan year. The specified corridor is:

Plan Year	<u>Corridor</u>
Through 2020	90% - 110%
2021	85% - 115%
2022	80% - 120%
2023	75% - 125%
2024 and later	70% - 130%

The adjustments to fall within the specified corridor of the 25-year average of segment rates apply for determining the minimum required contribution and related funded percentages. They do not apply for determining the maximum tax deductible contribution or certain other situations.

Sponsor Elections

Discount Rate: Segment rates, with a 4-month lookback

Lockheed Martin Corporation

New Retirement Income Plan for Employees in Puerto Rico
52-1893632/052
1/1/2020

Part V – Statement of Actuarial Assumptions/Methods

At-Risk Determination

The At-Risk Funding Target is determined by assuming that participants eligible to retire in the current plan year and next 10 plan years retire at the earliest possible date, but not before the end of the plan year. All participants are assumed to elect the optional form resulting in the highest possible present value.

A load is added to the At-Risk Funding Target and At-Risk Target Normal Cost when a plan is At-Risk in at least two years during the preceding four years. The load increases the At-Risk Funding Target by 4% of the Not At-Risk Funding Target plus \$700 per participant, and increases the At-Risk Target Normal Cost by 4% of the Not At-Risk Target Normal Cost.

The Funding Target and Target Normal Cost are calculated by multiplying the Not At-Risk values by 100% minus the Phase-In Percentage, plus the At-Risk values multiplied by the Phase-In Percentage.

Credit Balance

The Credit Balance consists of the Carryover Balance from excess contributions prior to the Pension Protection Act (PPA) of 2006, plus the Prefunding Balance from elected excess contributions after the PPA. Balances accumulate with interest and are reduced for amounts applied towards the Minimum Required Contribution, voluntary waivers by the plan sponsor, and compelled waivers to avoid benefit restrictions. The Actuarial Value of Assets is reduced by the Credit Balance to determine certain funded percentages and to determine the Funding Shortfall.

Asset Valuation Method

The Actuarial Value of Assets is determined using an annual average of the adjusted Fair Market Value of Assets with the earliest determination 24 months prior to the valuation date. The Fair Market Value of Assets in prior years is adjusted for contributions, benefit payments, expenses and expected earnings (not to exceed the third segment rate).

This is equivalent to the Fair Market Value of Assets, plus two-thirds of the (gain)/loss from the prior year, plus one-third of the (gain)/loss from the second preceding year. The (gain)/loss in each year is the difference between the expected and actual returns on the Fair Market Value of Assets.

The Actuarial Value of Assets is adjusted to be no less than 90% or no more than 110% of the Fair Market Value of Assets.

Since the expected earnings assumption cannot exceed the third segment rate, over time, the method may produce an Actuarial Value of Assets slightly below the Fair Market Value of Assets.

The Actuarial Value of Assets for determining the Maximum Tax Deductible Contribution reflects interest rate stabilization rates for discounting contributions and limiting expected earnings.

Terminated Vested:	Terminated vested partici	pants are assumed to retire at age 60.
Form of Payment	Life annuity.	

It is assumed that husbands are three years older than wives and that 80% of the male Participants and 80% of the female Participants who are or will become eligible for coverage under the Spouse's Benefit will be survived by an eligible Spouse.

Survivor's Benefit

Lockheed Martin Corporation New Retirement Income Plan for Employees in Puerto Rico 52-1893632/052 1/1/2020 Part V – Summary of Plan Provisions

Final Average Pensionable Earnings The average of the highest three years out of the last ten years preceding normal retirement, early retirement, or termination of

employment.

Service One year for each calendar year in which the participant is

credited with at least 1,000 hours and a pro-rata portion of a

year for less than 1,000 and more than 190 hours.

Credited Service One year for each calendar year in which the participant is

credited with at least 2,080 hours and a pro-rata portion of a

year for less than 2,080 hours.

Normal Form of Annuity Life Annuity.

Normal Retirement Date The first day of the month coinciding with or next following the

Participant's 65th birthday or the completion of 5 years of

Service.

Social Security Covered

Compensation The annual average of the Social Security taxable wage bases

> in effect for each calendar year during the 35 year period ending with the last day of the calendar year in which the

participant attains Social Security Retirement Age.

Vesting Schedule Five years of Service.

Vested Benefit Retirement benefit accrued to date of termination and

payable at Normal Retirement Date.

Lockheed Martin Corporation

New Retirement Income Plan for Employees in Puerto Rico
52-1893632/052
1/1/2020

Part V – Summary of Plan Provisions

Income Payable

Amount described in section (a) or (b) below, whichever applies:

- a) If Participant has a Spouse as of his retirement date and does not elect otherwise, retirement income shall be paid on the basis of Joint and Survivor form, as stipulated by ERISA, and will be the amount determined under the benefit formula multiplied by the appropriate factor.
- b) If Participant either has no Spouse as of his retirement date or elects to receive his income under the Normal Form, retirement income will be the amount determined under the benefit formula.

Benefit Formula

Greater of (a) – RIP Benefit Formula, or (b) – GE Trans Ops Benefit Formula:

a) RIP Benefit Formula:

1.165% times the lesser of Final Average Pensionable Earnings or Social Security Covered Compensation times Credited Service up to 35 years,

plus

1.500% times Final Average Pensionable Earnings in excess of Social Security Covered Compensation times Credited Service up to 35 years,

plus

1.500% times Final Average Pensionable Earnings times Credited Service over 35 years.

b) GE Trans Ops Benefit Formula:

A Career Average Benefit payable with a 5-year certain form of annuity.

1.45% of the employee's Compensation earned in each calendar year up to Social Security Covered Compensation less \$3,192, plus 1.90% of remaining Compensation (1.45% of all Compensation earned in each calendar year after service as of January 1 exceeds 34 years).

Minimum Benefit

\$252 times Credited Service.

Lockheed Martin Corporation

New Retirement Income Plan for Employees in Puerto Rico
52-1893632/052
1/1/2020

Part V – Summary of Plan Provisions

Personal Pension Account

Employee contribution in each calendar year after 12/31/88, plus voluntary contributions in each calendar year after 12/31/90, credited with interest at a prescribed rate. No additional contributions are allowed after 1/1/95. Unless waived by the employee with spouse consent, the required and voluntary accounts are converted to an annuity based on the form of annuity elected for the regular pension. Account values are not included in the plan liabilities; the plan assets are reduced for the account values.

Early Eligibility

Attainment of age 55 and 5 years of Credited Service.

Early Benefit Amount

Benefit accrued to date of early retirement and reduced for each completed month commencement of income precedes age 60 for active or age 65 for terminated vesteds.

Active Reduction

Greater of (a) or (b):

- (a) Amount determined under RIP benefit formula. Reduction is 7.0% per year for the first 5 years of Service, reduced by 0.14% for each additional year of Service, but not less than 3.5%. Reduction is from age 60.
- (b) GE Trans Ops Benefit. Benefit is payable at age 60 or later, with no early reduction applied.

Term Vested Reduction

Greater of (a) or (b):

- (a) Amount determined under RIP benefit formula. Reduction is 5.0% per year for the first 5 years of Service, reduced by 0.1% for each additional year of Service, but not less than 2.5%. Reduction is from age 65.
- (b) GE Trans Ops Benefit. Benefit is payable at age 60 or later, with no early reduction applied.
