#### INDEPENDENT AUDITOR'S REPORT

Plan Administrator Lockheed Martin Retirement Plan for Certain Hourly Employees

## **Report on the Financial Statements**

We were engaged to audit the accompanying financial statements of the Lockheed Martin Retirement Plan for Certain Hourly Employees (the Plan), which comprise the statements of net assets available for benefits as of December 31, 2020 and 2019, the related statement of changes in net assets available for benefits for the year ended December 31, 2020, and the related notes to the financial statements.

## Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

## Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audits in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

#### Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974 (ERISA), the Plan Administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4, which was certified by The Northern Trust Company, the Trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the Plan Administrator that the Trustee holds the Plan's investment assets and executes investment transactions. The Plan Administrator has obtained a certification from the Trustee as of December 31, 2020 and 2019 and for the year ended December 31, 2020, that the information provided to the Plan Administrator by the Trustee is complete and accurate.

1625 K Street, NW Washington, DC 20006 **T** +1 202 293 7500 **F** +1 202 465 3149

## Disclaimer of Opinion

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

# Emphasis of a Matter

As discussed in Note 1, effective December 25, 2020, the Plan merged with and into the Lockheed Martin Aerospace Pension Plan for Employees in the Bargaining Unit (the Aerospace Plan), with the Aerospace Plan being the surviving plan to be known as the "Lockheed Martin Aerospace Hourly Pension Plan." This merger did not change the benefits, rights, features, or other substantive terms of the Plan.

## Report on Form and Content in Compliance with DOL Rules and Regulations

Mitchell: Titus, LLP

The form and content of the information included in the financial statements, other than that derived from the information certified by the Trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

#### 1. Description of the Plan

The following description of the Lockheed Martin Retirement Plan for Certain Hourly Employees (the Plan) provides only general information. Participants should refer to the Plan document and Summary Plan Description for a more complete description of the Plan's provisions.

#### General

The Plan is a defined benefit plan covering certain bargained and hourly employees of Lockheed Martin Corporation (the Corporation) and has been amended from time to time. The Plan also covers certain hourly and salaried employees of the Lockheed Martin Engineering and Sciences Company, a subsidiary of the Corporation, for whom benefit accruals are frozen. The Corporation is the Plan Sponsor and the Plan Administrator. Active participants become fully vested in the Plan upon the earlier of the completion of five years of service or attainment of age 65. The Plan is generally closed to new entrants.

Effective December 25, 2020, the Plan merged with and into the Lockheed Martin Aerospace Pension Plan for Employees in the Bargaining Unit (the Aerospace Plan), with the Aerospace Plan being the surviving plan to be known as the "Lockheed Martin Aerospace Hourly Pension Plan." As a result, net assets in the amount of \$4,580,888,000 were transferred into the Aerospace Plan. This merger did not change the benefits, rights, features, or other substantive terms of the Plan.

Effective December 8, 2020, the Plan purchased a buy-out group annuity contract (GAC) from MetLife, Inc. for \$185,925,000, covering the accrued Plan benefits of approximately 7,700 participants. The MetLife GAC is not an asset of the Plan. In addition, the Plan received an adjustment in November 2020, of \$19,155,000 for a GAC purchase in 2019.

The assets of the Plan, excluding "transfer receivable", are held and invested on a commingled basis in the Lockheed Martin Corporation Master Retirement Trust (the Master Trust). The assets of the Master Trust are held by The Northern Trust Company (the Trustee), with the exception of certain assets that are not held under custody by the Trustee as described in Note 4.

#### **Funding Policy**

Funding for the Plan is determined in accordance with the Employee Retirement Income Security Act of 1974 (ERISA), as amended by the Pension Protection Act of 2006 and consistent with U.S. Government Cost Accounting Standards. Contributions by the Corporation, if any, meet the ERISA minimum funding requirements. The Corporation has the right under the Plan to discontinue such contributions at any time and/or terminate the Plan. In the event of termination, the Plan's net assets are to be used first for the payment of retirement benefits that former employees or their beneficiaries have been receiving, next for the payment of other vested benefits, and finally for the payment of nonvested benefits for the remaining participants. If the net assets are not sufficient to pay all benefits, the net assets shall be paid to the most senior categories until a category cannot be paid in full, and remaining net assets shall be allocated pro rata to all the benefits in that category and not those of lower priority. However, in the event of termination of the Plan, the Pension Benefit Guaranty Corporation guarantees the payment of nonforfeitable retirement benefits subject to certain limitations prescribed by ERISA.

## 2. Summary of Significant Accounting Policies

#### **Basis of Accounting**

The financial statements of the Plan are prepared on the accrual basis of accounting.

#### **Accumulated Plan Benefits**

Accumulated plan benefits are those estimated future periodic payments that are attributable under the Plan's provisions for credited service by participants from their date of eligibility to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired, terminated and disabled participants or their beneficiaries, and (b) present participants or their beneficiaries. Benefits for retired, terminated and disabled participants or their beneficiaries are based on each former participant's compensation during each year of credited service prior to his or her termination or retirement date. Accumulated plan benefits for active participants are based on each participant's compensation during each year of credited service preceding the valuation date. Benefits payable under all circumstances—retirement, death, disability and termination of employment—are included to the extent they are deemed attributable to employee service prior to the valuation date.

#### **Use of Estimates**

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits. Actual results could differ from those estimates.

#### **Payment of Benefits**

Benefit payments to participants are recorded upon distribution.

#### **Risks and Uncertainties**

The Plan, through the Master Trust, invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, currency, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements. The U.S. Department of Labor is currently auditing the Plan. The audit is focused on the process for locating terminated vested participants over the age of 65 that have not commenced their benefit payments and paying benefits to those participants. Currently, we are unable to predict the outcome of this audit and cannot estimate any reasonably possible loss or range of loss.

#### **Investment Valuation and Income Recognition**

Investments in the Master Trust are reported at fair value or at Net Asset Value (NAV). Fair value is the cost that would have been received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for discussion of fair value measurements

Purchases and sales of securities in the Master Trust are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Gains and losses on investments bought and sold as well as held during the year are included in interest in net investment gains of Master Trust on the Statement of Changes in Net Assets Available for Benefits.

#### **Administrative Expenses**

Direct administrative expenses are paid by the Master Trust and generally allocated to the Plan proportionally based on the Plan's interest in the Master Trust's net assets or directly if specifically related to the Plan. Other indirect administrative expenses are paid by the Corporation and are excluded from these financial statements. Expenses paid by the Plan are shown on the Statement of Changes in Net Assets Available for Benefits.

#### **Subsequent Events**

The Plan Administrator has evaluated subsequent events through October 5, 2021, the date the financial statements were available to be issued. No material subsequent events have occurred since December 31, 2020 that required recognition or disclosure in these financial statements.

#### 3. Actuarial Present Value of Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is the amount that results from applying actuarial assumptions to the accumulated plan benefits earned by the participants to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefits is as follows (in thousands):

December 31.

	,		
		2020	2019
Vested benefits:			
Participants currently receiving payments	\$	2,930,124 \$	2,879,586
Participants not currently receiving payments		2,049,840	1,921,419
Total vested benefits		4,979,964	4,801,005
Nonvested benefits		181,265	179,405
Plan mergers <sup>(1)</sup>		(5,161,229)	_
Total actuarial present value of accumulated plan benefits	\$	— \$	4,980,410

The significant actuarial assumptions used in the valuations were (a) life expectancy of participants (Pri-2012 Blue Collar with Scale MP-2020 for 2020 and Scale MP-2019 for 2019), (b) turnover based upon the termination experience of the Plan, (c) assumed retirement age probabilities based on the experience of the Plan resulting in an average retirement age of 63, and (d) an annual discount rate of 2.50% and 3.25% for 2020 and 2019, respectively. The discount rate assumption used to calculate the actuarial present value of accumulated plan benefits is adjusted annually to reflect current yields on long-term high-quality corporate bonds. This can result in significant year to year fluctuations in the valuations.

Changes in the actuarial present value of accumulated plan benefits are as follows (in thousands):

	Year Ended		
	December 31, 2020		
Actuarial present value of accumulated plan benefits at beginning of year	\$	4,980,410	
Increase (decrease) during the year attributable to:			
Increase for interest due to the decrease in the discount period		157,358	
Benefits paid		(277,241)	
Benefits accumulated		95,048	
Plan mergers <sup>(1)</sup>		(5,161,229)	
Plan liability transfer transactions (1)		(185,925)	
Changes in actuarial assumptions		391,579	
Net decrease		(4,980,410)	
Actuarial present value of accumulated plan benefits at end of year	\$		

#### (1) See Note 1.

The changes in actuarial assumptions reflect the decrease in the discount rate and change in mortality table, which impacted the actuarial present value of accumulated plan benefits by \$434,852,000 and \$(43,273,000), respectively.

The actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

#### 4. Master Trust

#### General

The Plan's interest in the Master Trust is stated at the fair value of the underlying net assets in the Master Trust. The realized and unrealized gains and losses and investment income of the Master Trust are allocated among the participating plans included therein proportionally based on each plan's interest, which include unrealized gains and losses, investment income and plan expenses. The Plan's interest in the Master Trust's net assets, excluding assets of the 401(h) account, as of December 31, 2020 and 2019 was approximately 11.89% and 11.44%, respectively.

The following table presents the Plan's interest in the Master Trust balance as of December 31, 2020 and 2019 (in thousands):

	December	r 31, 2020	<b>December 31, 2019</b>				
	Master Trust Balance	Plan's Interest in Master Trust Balance	Master Trust Balance	Plan's Interest in Master Trust Balance			
Cash and cash equivalents and short-term investment fund	\$ 1,102,726	\$ 129,721	\$ 1,955,745	\$ 229,343			
Common and preferred stocks	14,338,364	1,686,713	14,267,977	1,673,152

Less:							
Due to broker for securities purchased	(521,972)	(61,403)	(269,693)	(31,626)			
Accrued expense	(6,588)	(775)	_	_			
Other payables (c)	(178,492)	(20,997)	(72,956)	(8,555)			
Total investment assets at NAV	9,107,291	1,071,348	7,912,078	792,703			
Total net assets	\$39,816,970	\$ 4,580,888	\$36,698,106	\$ 4,067,821			

The Master Trust owes direct reimbursements to the Corporation for certain expenses incurred by the Corporation and its subsidiaries in providing services to the Plan.

Other than the financial information in the following table, the reported total fair value by asset class as disclosed in the fair value of assets tables including investments held as of December 31, 2020 and 2019, and net appreciation in fair value of investments, interest income, and dividend income for the year ended December 31, 2020, was obtained or derived from information certified as complete and accurate by the Trustee of the Master Trust.

The following financial information was not certified by the Trustee, as the net assets are not held in custody by the Trustee (in thousands):

	December 31,				
		2020		2019

#### Fair Value of Assets

The accounting standard for fair value measurements defines fair value, establishes a market-based framework or hierarchy for measuring fair value, and requires disclosures regarding fair value measurements. The standard is applicable whenever assets and liabilities are measured and included in the financial statements at fair value.

The fair value hierarchy established in the standard prioritizes the inputs used in valuation techniques into three levels as follows:

- Level 1 Quoted prices in active markets for identical assets and liabilities;
- Level 2 Observable inputs, other than Level 1 prices, such as quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in inactive markets, and amounts derived from valuation models where all significant inputs are observable in active markets; and
- Level 3 Unobservable inputs where valuation models are supported by little or no market activity that one or more significant inputs are unobservable and require us to develop relevant assumptions.

Certain other investments are measured at their value using NAV per share and do not have readily determined values and are thus not subject to leveling in the fair value hierarchy. The NAV is the total value of the fund divided by the number of shares outstanding.

The following table presents the fair value of the assets in the Master Trust by asset category and their level within the fair value hierarchy as of December 31, 2020 (in thousands):

#### December 31, 2020

	Level 1			Level 2	Level 3	Total
Cash and cash equivalents and short-term investment fund	\$	1,102,726	\$	_	\$ _	\$ 1,102,726

Other investments (b)	33,881	1,808,500	967,258	2,809,639			
Commodities	2,406	_	_	2,406			
Total investment assets at fair value	\$ 16,640,127	\$11,329,250	\$ 984,336	\$ 28,953,713			
Investments measured at NAV (d):							
Common collective trusts				143,874			
Registered investment companies				2,374			
Private equity funds				4,632,783			
Real estate funds (e)				2,160,234			
Hedge funds				972,813			
Total investment assets at NAV				7,912,078			
Payables, net	t			(167,685)			
Total net assets	3			\$ 36,698,106			

The following table identifies certain transactions associated with the fair value of Master Trust's Level 3 assets for the year ended December 31, 2020 (in thousands):

	]	Purchases	Ot	her Issuances	Transfers into Level 3		Transfers out of Level 3
Common and preferred stocks	\$	1,991	\$	20		\$	(4,038)
Other investments (b)		40,710		_	47,636		(154,001)
Total	\$	42,701	\$	20	\$ 47,636	\$	(158,039)

- (a) Includes U.S. Government-sponsored enterprise securities.
- (b) Includes collateralized mortgage obligations, municipals, asset-backed securities, inflation index linked bonds, foreign government securities, swaps, guaranteed annuity contracts, repurchase agreements, and private debt.
- (c) Includes unsettled trades, other receivables/payables, market values on foreign currency, items relating to derivatives and other cash positions on futures.

- (d) Certain investments that are valued using the NAV per share (or its equivalent) as a practical expedient have not been classified in the fair value hierarchy and are included below the table to permit reconciliation of the fair value hierarchy to the aggregate post-retirement benefit plan assets.
- (e) Includes 103-12 investment entities

Certain assets that were previously classified outside of the leveling table were transferred into Level 3 as a result of management's current year assessment of the inputs used to determine fair value. Transfers out of Level 3 include assets that were transferred into Level 2 at the end of the year as a result of changes in the inputs used to determine fair value. The Master Trust recognizes transfers between levels of the fair value hierarchy as of the date of the change in circumstances that causes the transfer. Management is unaware of measurement uncertainty within Level 3 fair value measurements as of December 31, 2020.

#### **Valuation Techniques**

Cash and cash equivalents and short-term investment fund investments are mostly comprised of cash and short-term money-market instruments and are valued at cost, which approximates fair value.

Common and preferred stock securities categorized as Level 1 are traded on active national and international exchanges and are valued at their closing prices on the last trading day of the year. For common and preferred stock securities not traded on an active exchange, or if the closing price is not available, the Trustee obtains indicative quotes from a pricing vendor, broker, or investment manager. These securities are generally categorized as Level 2 if the custodian obtains corroborated quotes from a pricing vendor or generally categorized as Level 3 if the custodian obtains uncorroborated quotes from a broker or investment manager.

Common collective trusts (CCTs) are investment vehicles valued using the NAV provided by the fund managers. The NAV is the total value of the fund divided by the number of shares outstanding. CCTs are categorized as Level 2 if the NAV is corroborated by observable market data (e.g., purchases or sales activity), or not categorized in a level of fair value hierarchy (excluded from the fair value table) where certain liquidity provisions apply and the NAV is deemed a practical expedient with regards to valuation. CCTs and registered investment companies valued using the NAV as a practical expedient are typically redeemable within 90 days.

Registered investment company securities categorized as Level 1 are traded on active national and international exchanges and are generally valued at closing prices on the last trading day of the year. In the cases where the valuation is based on NAV at the close of the year, these represent open-ended mutual funds valued by multiple pricing sources. For those securities not categorized in a level of the fair value hierarchy, the Corporation cannot fully redeem the investment in the near-term and NAV as a practical expedient is deemed to apply to those assets.

Corporate debt instruments and U.S. Government securities categorized as Level 2 are valued by the Trustee using pricing models that use verifiable observable market data (e.g., interest rates and yield curves observable at commonly quoted intervals and credit spreads), bids provided by brokers or dealers, or quoted prices of securities with similar characteristics. Corporate debt instruments are categorized at Level 3 when valuations using observable inputs are unavailable. The Trustee obtains pricing based on indicative quotes or bid evaluations from vendors, brokers, or the investment manager.

Other investments consist of securities such as derivatives and fixed income securities not classified as corporate debt instruments or U.S. Government securities. Level 1 securities are comprised of derivative securities traded on national and international exchanges. Level 2 securities are mainly comprised of overthe-counter (OTC) derivatives and fixed income investments valued by the Trustee using pricing models that use verifiable observable market data (e.g., interest rates and yield curves observable at commonly quoted intervals and credit spreads), bids provided by brokers or dealers, or quoted prices of securities with similar characteristics. Other investments are categorized at Level 3 when valuations using observable inputs are unavailable. The Trustee obtains pricing based on bid evaluations from vendors or the investment manager.

Commodities categorized as Level 1 are traded on an active commodity exchange and are valued at their closing prices on the last trading day of the year.

Private equity funds, real estate funds, and hedge funds are valued using the NAV based on the valuation models of underlying securities which generally include significant unobservable inputs that cannot be corroborated using verifiable observable market data. Valuations for private equity funds and real estate funds are determined by the general partners. Depending on the nature of the assets, the general partners may use various valuation methodologies, including the income and market approaches in their models. The market approach consists of analyzing market transactions for comparable assets while the income approach uses earnings or the net present value of estimated future cash flows adjusted for liquidity and other risk factors. Hedge funds are valued by independent administrators using various pricing sources and models based on the nature of the securities. Private equity funds, real estate funds, and hedge funds are generally not categorized in a level of fair value hierarchy as the Corporation cannot fully redeem the investment in the near-term and NAV as a practical expedient is deemed to apply to those assets. Hedge funds contain liquidity provisions which generally allow for redemptions within several months.

Private equity funds consist of investments held primarily by limited partnerships in various strategies, including venture capital, corporate finance, opportunistic, and distressed. The term of each private equity fund is typically eight to twelve years, and the funds investors do not have the right to redeem their investment at its NAV. Instead, the investors receive distributions as the underlying assets of the fund are liquidated. Real estate funds consist of investments in U.S. and international commercial real estate held primarily by limited partnerships. The term of each real estate fund is generally eight to ten years, and the real estate fund's investors do not have the right to redeem their investment at its NAV. Instead, the investors receive distributions as the underlying assets of the fund are liquidated. Unfunded capital commitments related to the Master Trust's investment in private equity and real estate funds as of December 31, 2020 and 2019 totaled \$4,217,733,000 and \$3,929,312,000, respectively. Hedge fund investments are made through commingled fund vehicles and depending on the hedge fund, redemptions can be monthly or annually. The redemption notice period, depending on the hedge fund, is typically 45 to 180 days in advance.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while management believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

In estimating the fair value of the investments not in a level of fair value hierarchy, management may use third-party pricing sources or appraisers. In substantiating the reasonableness of the pricing data provided by third parties, management evaluates a variety of factors including review of methods and assumptions

used by external sources, recently executed transactions, existing contracts, economic conditions, industry and market developments, and overall credit ratings.

#### **Derivative Instruments**

Derivative instruments are used in the Master Trust to achieve certain portfolio objectives and to adjust asset allocation in order to manage market risk. Derivative instruments allow internal and external investment managers to achieve these goals efficiently while maintaining appropriate liquidity.

As of December 31, 2020 and 2019, the Master Trust utilized four types of derivative instruments:

Futures Contracts – The purchase of futures contracts allows the Master Trust to achieve desired portfolio positions in various commodities without the need to physically own and store them. Futures are used to manage the overall risk to equity and fixed income markets. Foreign exchange futures are used to separate the management of currency exposure from foreign equity exposure. Futures contracts are exchange-traded with initial margin required from both parties and daily settlement of gains and losses; therefore credit and counterparty risks are minimal, and futures contracts have no net market value.

Forward Contracts – Forward contracts are similar to futures contracts except that they are traded OTC rather than over a standardized exchange. Foreign exchange forwards are used by investment managers as another means of separating currency risk from investment risk. These contracts allow a manager to lock into a rate at which to exchange an upcoming settlement in a foreign currency into U.S. dollars. Commodity forward contracts are used by investment managers to achieve desired portfolio positions in various commodities. While forward contracts are traded OTC, they are generally very short-term which minimizes counterparty risk.

Options, including Options on Futures – These contracts allow the holder to buy or sell a security or a futures contract at a specified price prior to an expiration date. Options are primarily used to protect against downside risk in an equity, commodity or currency position held by the Master Trust.

Swaps – Swaps are OTC agreements between counterparties to exchange the return stream of one security for another. Swaps are utilized either to provide exposure to a security for which there is no available futures contract, or to achieve an exposure over a specific time horizon.

A long derivative position increases (decreases) in value when the price of the underlying asset (e.g., currency, equity index) increases (decreases). A short derivative position increases (decreases) when the price of the underlying asset decreases (increases).

The notional amounts and fair values of derivative instruments as of December 31, 2020 and 2019 are presented below (in thousands):

## Offsetting and Netting of Assets and Liabilities

The Master Trust is subject to master netting agreements with certain counterparties. These agreements govern the terms of certain transactions and reduce the counterparty risk associated with the relevant transactions by permitting the Master Trust to net certain amounts due from the Plan to a counterparty against amounts due to the Plan from the same counterparty under certain conditions.

As of December 31, 2020, information related to the potential effect of the Master Trust's master netting agreements was as follows (in thousands):

#### **Collateralized Transactions**

The Master Trust enters into reverse repurchase agreements as well as securities lending and borrowing agreements to generate additional income and earnings. Reverse repurchase agreements are transactions in which the Master Trust lends cash to borrow financial instruments from another firm and simultaneously enters into an agreement to resell the same financial instruments at a higher price in the future. Securities lending agreements are transactions in which the Master Trust lends securities to another firm, in exchange for collateral which is returned upon the conclusion of the loan, with interest received by the Master Trust over the life of the transaction. The collateral requires 102% of the fair value of U.S. securities borrowed and 105% for non-U.S. securities borrowed. The collateral is marked to market on a daily basis. In the event the counterparty is unable to meet its contractual obligation under the securities lending arrangement, the Master Trust may incur losses equal to the amount by which the market value of the securities differ from the amount of collateral held. The Master Trust mitigates credit risk associated with securities lending

#### Lockheed Martin Retirement Plan for Certain Hourly Employees Notes to Financial Statements (continued)

arrangements by monitoring the fair value of the securities loaned on a daily basis, with additional collateral obtained or refunded as necessary. Securities borrowing agreements are transactions in which the Master Trust borrows securities from another firm, typically in connection with a short sale, in exchange for collateral which is returned upon the conclusion of the transaction.

As of December 31, 2020 and 2019, the fair value of securities on loan was \$466,000,000 and \$600,000,000, respectively, the fair value of securities borrowed was \$1,894,000,000 and \$1,127,000,000, respectively, and the fair value for reverse repurchase agreements was \$1,130,000,000 and \$515,000,000, respectively. Collateral pledged for securities on loan is not held in the Master Trust, and cannot be sold, repledged, or traded.

Securities lending and borrowing and reverse repurchase agreement income earned by the Master Trust is recorded on an accrual basis and was approximately \$3,000,000 and \$15,000,000, respectively for the year ended December 31, 2020 and 2019.

#### 5. Parties-in-Interest Transactions

The Master Trust invests in funds managed by The Northern Trust Company, the Trustee. Investments in these funds qualify as party-in-interest transactions for which a statutory exemption from the prohibited transaction regulation exists.

#### 6. Income Tax Status

The Internal Revenue Service (IRS) has determined and informed the Corporation by a letter dated January 9, 2014, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code (IRC), and therefore, the related trust is exempt from taxation. Under current IRS determination letter procedures, there is no opportunity for the Plan to obtain a more recent letter from the IRS. The Plan has been amended since issuance of the determination letter. However, the Plan Administrator and the Corporation's counsel believe that the current design and operations of the Plan are in compliance with the applicable provisions of the IRC, and therefore, believe the Plan, as amended, is qualified and the related trust is tax exempt.

GAAP requires plan management to evaluate tax positions taken by the Plan to determine whether the Plan has taken any uncertain positions that more likely than not would not be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2020, there are no uncertain positions taken or expected to be taken that would require recognition of a liability or asset or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions, but no tax audits are in progress. The Plan Administrator considers the Plan no longer subject to income tax examinations for years prior to 2017.

#### 7. Reconciliation of Financial Statements to Form 5500

Interest in net investment gains of Master Trust reported in the financial statements is \$37,366,000 greater than the amount reported on Form 5500 for the year ended December 31, 2020. Administrative expenses reported in the financial statements are \$37,366,000 greater than the amount reported on Form 5500 for the year ended December 31, 2020. These differences arose from the classification of certain administrative expenses which are included in the net investment gains in the Master Trust for Form 5500 reporting purposes.

#### For ERISA Requirements

Valuation of Plan Assets

Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value.

A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).

#### **Actuarial Assumptions and Methods**

#### Discussion of Actuarial Assumptions and Methods

For the funding valuation, the allowable interest rates and mortality tables available to measure plan liabilities are prescribed by IRC section 412. Aon provided guidance with respect to the alternative interest rate and mortality table options, and it is our belief that the options prescribed by Lockheed Martin Corporation are appropriate for funding purposes. It is our belief that all other actuarial assumptions used for the funding valuation represent reasonable expectations of anticipated plan experience. The actuarial cost and amortization methods used are prescribed by IRC section 412. While the method used to value assets is prescribed by Lockheed Martin Corporation, Aon provided guidance with respect to the use of this method, and it is our belief that the method is appropriate for funding purposes.

#### Calculation of Normal Costs and Liabilities

The method used to calculate the ERISA target normal cost and funding target, is the unit credit cost method. The funding target under IRC section 430 is calculated as the present value of all benefits that have been accrued or earned under the plan as of the first day of the plan year, based on current service and current pay. The target normal cost is the present value of all benefits expected to accrue or be earned under the plan during the plan year, including any increase in benefits earned in prior plan years attributable to compensation increases in the current plan year, plus certain trust expenses.

Under this method, benefits are estimated at each decrement age using service and earnings as of the valuation date. The present value of these estimated benefits using the applicable ERISA assumptions is the ERISA funding target. The target normal cost is the present value of the benefits earned during the year.

For calculating the actuarial present value of vested benefits, benefits at each decrement age are determined in the same manner but are then multiplied by each participant's vesting percentage as of the valuation date. The present value of these estimated vested benefits is determined without recognition of any benefit for which a participant will become entitled only through the advancement in service or age while actively employed. In addition, certain ancillary benefits have been treated as vested consistent with PBGC premium regulations.

The ERISA funding target for lump sum benefits, other than lump sum benefits paid from a statutory hybrid plan under the provisions of IRC section 411(a)(13)(A), is determined by valuing the annuity that corresponds to the distribution using special actuarial assumptions, as described under Treasury regulations section 1.430(d). Under these special assumptions, for the period beginning with the annuity starting date, the current IRC section 417(e) applicable mortality table is substituted for the mortality table otherwise used.

### SCHEDULE SB (Form 5500)

Department of the Treasury Internal Revenue Service

Department of Labor Employee Benefits Security Administration

Pension Benefit Guaranty Corporation

#### Single-Employer Defined Benefit Plan Actuarial Information

This schedule is required to be filed under section 104 of the Employee Retirement Income Security Act of 1974 (ERISA) and section 6059 of the Internal Revenue Code (the Code).

#### Schedule SB, line 22—Description of Weighted Average Retirement Age

The average retirement age shown in line 22 has been calculated by assuming the following retirement rates and no decrements other than retirement for this calculation. All retirements are assumed to occur at beginning of year.

			(d)
(a)	(b)	(c)	Product
Age	Rate	Weight	$(a) \times (b) \times (c)$
55	4.00%	1.0000	2.20

70	100.00%	0.1034	7.24
	W	eighted Average	63.25

#### Schedule SB, line 24—Change in Actuarial Assumptions

The funding valuation reflects the following assumption change:

- A change in the interest rate assumption from segment rates three-month lookback as of September 2018 to segment rates with a three-month lookback as of September 2019, each adjusted as applicable to fall within the 25-year average interest rate stabilization corridor.
- A change in the mortality improvement scale from MP-2016 to MP-2017.
- A change in the assumed expenses payable from the trust from \$25,382,951 to 33,573,018.
- The retirement rates have been updated at ages 55 through 58, 60 through 63 and 66 through 69.
- The turnover rates were changed to the 2003 SOA Select and Ultimate Table, with rates increased by 17%.

Schedule SB, line 26—Schedule of Active Participant Data as of December 25, 2019

Schedule SB, line 32—Schedule of Amortization Bases

Type of	Present Value of Installment	Date	Years	Amortization
Base		Established	Remaining	Installment
Shortfall	\$ 561,018,863	December 25, 2019	15	\$ 51,870,589

ARPA shortfall relief was first applied for 2019. Under the American Rescue Plan Act of 2021 (ARPA), the shortfall relief wipes out existing shortfall amortization bases and changes the amortization period. By default, this relief would have applied starting with the 2022 plan year. This Schedule SB reflects the ARPA shortfall relief effective with the 2019 plan year.

#### Schedule SB, Part V—Statement of Actuarial Assumptions/Methods

Interest Rates for Minimum Funding Purposes Based on segment rates with a three-month

lookback (as of September 2019), each adjusted as needed to fall within the 25-year average

interest rate stabilization corridor

1st Segment Rate3.74%2nd Segment Rate5.35%3rd Segment Rate6.11%

Interest Rates for Maximum Tax Purposes Based on segment rates with a four-month

lookback (as of September 2019), without regard

to interest rate stabilization

1st Segment Rate2.79%2nd Segment Rate3.92%3rd Segment Rate4.38%

Retirement Age

Terminated Vested Participants - ABRP 65
Terminated Vested Participants - CH 62
Terminated Vested Participants - LMES 65

Mortality Rates

Healthy and Disabled 2019 generational mortality table for annuitants

and non-annuitants per §1.430(h)(3)-1(d) and IRS

Notice 2018-02

Withdrawal Rates Base Table: 2003 SOA select and ultimate table

Load: 117% See Table 2.

Disability Rates – Certain Hourly and LMES Only See Table 3.

Decrement Timing Beginning of year decrements, with 100%

retirement occurring at beginning of year

Surviving Spouse Benefit - ABRP It is assumed that 80% of males and 80% of

females have an eligible spouse, and that males

are three years older than their spouses.

#### For ERISA Requirements

Valuation of Plan Assets

Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value.

A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).

**Expected Return on Assets** 

 2017 Plan Year
 7.50%, limited to 6.48%

 2018 Plan Year

#### Actuarial Assumptions and Methods

#### Discussion of Actuarial Assumptions and Methods

For the funding valuation, the allowable interest rates and mortality tables available to measure plan liabilities are prescribed by IRC section 412. Aon provided guidance with respect to the alternative interest rate and mortality table options, and it is our belief that the options prescribed by Lockheed Martin Corporation are appropriate for funding purposes. It is our belief that all other actuarial assumptions used for the funding valuation represent reasonable expectations of anticipated plan experience. The actuarial cost and amortization methods used are prescribed by IRC section 412. While the method used to value assets is prescribed by Lockheed Martin Corporation, Aon provided guidance with respect to the use of this method, and it is our belief that the method is appropriate for funding purposes.

#### Calculation of Normal Costs and Liabilities

The method used to calculate the ERISA target normal cost and funding target, is the unit credit cost method. The funding target under IRC section 430 is calculated as the present value of all benefits that have been accrued or earned under the plan as of the first day of the plan year, based on current service and current pay. The target normal cost is the present value of all benefits expected to accrue or be earned under the plan during the plan year, including any increase in benefits earned in prior plan years attributable to compensation increases in the current plan year, plus certain trust expenses.

Under this method, benefits are estimated at each decrement age using service and earnings as of the valuation date. The present value of these estimated benefits using the applicable ERISA assumptions is the ERISA funding target. The target normal cost is the present value of the benefits earned during the year.

For calculating the actuarial present value of vested benefits, benefits at each decrement age are determined in the same manner but are then multiplied by each participant's vesting percentage as of the valuation date. The present value of these estimated vested benefits is determined without recognition of any benefit for which a participant will become entitled only through the advancement in service or age while actively employed. In addition, certain ancillary benefits have been treated as vested consistent with PBGC premium regulations.

The ERISA funding target for lump sum benefits, other than lump sum benefits paid from a statutory hybrid plan under the provisions of IRC section 411(a)(13)(A), is determined by valuing the annuity that corresponds to the distribution using special actuarial assumptions, as described under Treasury regulations section 1.430(d). Under these special assumptions, for the period beginning with the annuity starting date, the current IRC section 417(e) applicable mortality table is substituted for the mortality table otherwise used.

Early Retirement
Eligibility Retirement

Age 55 and 10 years of credited, continuous or vesting service.

Benefit

The accrued normal retirement benefit, reduced by the lesser of:

- (a) 2.5% (3.0% for Fort Worth) for each year payment commences prior to age 65.
- (b) 2.5% for each point under 85 (3.0% for Fort Worth). The points earned equal the sum of the participant's age (in years and months) and credited service since the last break-in-service.

Unreduced benefit calculated as in normal retirement for Fort Worth participants at least age 62 with 10 years of continuous service.

Total and Permanent Disability Retirement Eligibility Requirement

Total and permanent disability for at least six months and 10 years of continuous service as of the date of disability.

Benefit

The monthly benefit computed as in normal retirement based on credited service to the date of disability. For non-Fort Worth participants, this benefit is reduced by the excess of the sum of Workers' Compensation or disability benefits over 60% of monthly pay at the time of disability; benefit is unreduced for Fort Worth participants. This benefit is payable while the participant is disabled until age 65. At age 65, the normal retirement benefit is payable.

Disability Supplement Eligibility Requirement

Non-Fort Worth early retirees under total and permanent disability.

Benefit

\$5 multiplied by years of credited service to a maximum of \$125. The temporary benefit is payable until age 65.

Preretirement Surviving Spouse's Benefit

Eligibility Requirement

Benefit

Vested

The spouse will receive a benefit as if the participant retired the day prior to his death and elected a 100% joint and survivor annuity. The benefit is deferred to what would have been the participant's earliest retirement date under the plan.

For non-Fort Worth participants who retire from active status, a lump sum determined as follows:

Age at Death	Benefit
55 - 59	\$ 2,000
60 - 64	\$ 1,500
65 or older	\$ 1,000

For non-Fort Worth participants on disability retirement, a lump sum of \$1,000. The lump sum benefit is reduced by death benefits from other company insurance and retirement plans.

Postretirement surviving spouse's benefits are not payable to Fort Worth employees or vested terminations.

Termination

Eligibility Requirement

Benefit

For non-Fort Worth participants, five years of vesting or continuous service. For Fort Worth participants, five years of continuous service, age 55, or the fifth anniversary of date of hire.

- (a) A deferred monthly benefit computed as in normal retirement, payable at age 65.
- (b) Vested terminations with at least 10 years of credited, continuous or vesting service (five years of continuous service for Fort Worth employees) may elect a monthly benefit computed as in normal retirement, reduced for payment commencing prior to age 65 in accordance with the following:

Percent Reduction		
Non-		
Fort Worth	Fort Worth	
11.8%	10.5%	
20.8%	19.7%	
29.2%	27.7%	
36.6%	34.8%	
43.1%	41.1%	
48.8%	46.7%

Early Retirement
Eligibility Retirement

Benefit

Age 55 and 10 years of credited, continuous or vesting service.

The accrued normal retirement benefit, reduced by the lesser of:

- (a) 2.5% (3.0% for Fort Worth) for each year payment commences prior to age 65.
- (b) 2.5% for each point under 85 (3.0% for Fort Worth). The points earned equal the sum of the participant's age (in years and months) and credited service since the last break-in-service.

Unreduced benefit calculated as in normal retirement for Fort Worth participants at least age 62 with 10 years of continuous service.

Total and Permanent Disability Retirement Eligibility Requirement

'n

Benefit

Total and permanent disability for at least six months and 10 years of continuous service as of the date of disability.

The monthly benefit computed as in normal retirement based on credited service to the date of disability. For non-Fort Worth participants, this benefit is reduced by the excess of the sum of Workers' Compensation or disability benefits over 60% of monthly pay at the time of disability; benefit is unreduced for Fort Worth participants. This benefit is payable while the participant is disabled until age 65. At age 65, the normal retirement benefit is payable.

Disability Supplement
Eligibility Requirement

Non-Fort Worth early retirees under total and permanent disability.

Benefit

\$5 multiplied by years of credited service to a maximum of \$125. The temporary benefit is payable until age 65.

Preretirement Surviving Spouse's Benefit

Eligibility Requirement

Benefit

#### Vested

The spouse will receive a benefit as if the participant retired the day prior to his death and elected a 100% joint and survivor annuity. The benefit is deferred to what would have been the participant's earliest retirement date under the plan.

For non-Fort Worth participants who retire from active status, a lump sum determined as follows:

Age at Death	Benefit		
55 - 59	\$ 2,000		
60 - 64	\$ 1,500		
65 or older	\$ 1,000		

For non-Fort Worth participants on disability retirement, a lump sum of \$1,000. The lump sum benefit is reduced by death benefits from other company insurance and retirement plans.

Postretirement surviving spouse's benefits are not payable to Fort Worth employees or vested terminations.

EIN: 52-1893632 PN: 002

Termination

Eligibility Requirement

Benefit

For non-Fort Worth participants, five years of vesting or continuous service. For Fort Worth participants, five years of continuous service, age 55, or the fifth anniversary of date of hire.

- (a) A deferred monthly benefit computed as in normal retirement, payable at age 65.
- (b) Vested terminations with at least 10 years of credited, continuous or vesting service (five years of continuous service for Fort Worth employees) may elect a monthly benefit computed as in normal retirement, reduced for payment commencing prior to age 65 in accordance with the following:

	Percent Reduction			
Age at	Non-	_		
Retirement	Fort Worth	Fort Worth		
64	11.8%	10.5%		
63	20.8%	19.7%		
62	29.2%	27.7%		
61	36.6%	34.8%		
60	43.1%	41.1%

#### Plan Changes Since the Prior Year

The funding valuation does not reflect any plan changes.

EIN: 52-1893632 PN: 002

Other Information to Fully and Fairly Disclose the Actuarial Position of the Plan

Due to software limitations with the electronic filing process, information filed electronically cannot be controlled by the Enrolled Actuary. The values on the signed Schedule SB will govern to the extent there are any differences in the entries filed electronically and the actual data contained on the signed Schedule SB.

EIN: 52-1893632 PN: 002

#### Schedule SB, line 32—Schedule of Amortization Bases

Type of	Present Value of Installment	Date	Years	Amortization
Base		Established	Remaining	Installment
Shortfall	\$ 561,018,863	December 25, 2019	15	\$ 51,870,589

ARPA shortfall relief was first applied for 2019. Under the American Rescue Plan Act of 2021 (ARPA), the shortfall relief wipes out existing shortfall amortization bases and changes the amortization period. By default, this relief would have applied starting with the 2022 plan year. This Schedule SB reflects the ARPA shortfall relief effective with the 2019 plan year.

EIN: 52-1893632 PN: 002

#### Schedule SB, line 24—Change in Actuarial Assumptions

The funding valuation reflects the following assumption change:

- A change in the interest rate assumption from segment rates three-month lookback as of September 2018 to segment rates with a three-month lookback as of September 2019, each adjusted as applicable to fall within the 25-year average interest rate stabilization corridor.
- A change in the mortality improvement scale from MP-2016 to MP-2017.
- A change in the assumed expenses payable from the trust from \$25,382,951 to 33,573,018.
- The retirement rates have been updated at ages 55 through 58, 60 through 63 and 66 through 69.
