## ☑ ESH MANAGEMENT SYSTEM

Enterprise ESH Management System certification to **ISO 14001** and **ISO 45001** standards with 44 sites certified to one or both standard. Completed 13 Third Party Registrar site audits.

## ☑ GLOBAL COMPLIANCE ASSURANCE AND RISK MANAGEMENT

**12**  
**COMPLIANCE ASSESSMENTS:**  
10 peer and 2 third party assessments facilitated across the business areas

**13**  
environmental site assessments completed for real estate transactions to protect people and the environment

**54**  
**FORUMS HOSTED:**  
regulatory, compliance and management system needs including 2 regionally focused events

**25,000**  
lbs of household hazardous waste collected and diverted from municipal waste streams

**61,000**  
lbs of electronic waste collected through 8 events

# REMEDIATION

## ✓ FORMER LOCKHEED ROCKET TEST SITE

From the 1960s and early 1970s, Lockheed Propulsion Company tested solid rocket propellant and motors at Potrero Canyon, a remote, 9,117-acre site in Beaumont, California. Portions of the site were also leased to other companies for testing ballistics and weapons. Cleanup operations began at the site in 1986 and continued through 2002. In 2002, 1,4-dioxane, a newly regulated chemical was identified in the groundwater. Lockheed Martin worked with the California EPA's Department of Toxic Substances Control (DTSC) to conduct additional investigations and review remediation alternatives for the site.

In summer 2018, final environmental cleanup at Potrero Canyon began that included capping a landfill at the site, a small excavation of PAH contaminated soil, and construction and operation of a groundwater treatment system (below/ left) to treat 1,4-dioxane through an advanced oxidation process. Lockheed Martin completed implementation of environmental remedies in 2019 and the first year of operation of the groundwater treatment system in September 2020. Another regulated chemical, perchlorate, is also being treated at the site using the natural biodegradation (phytoremediation) provided by the riparian habitat at the site rather than implementing another engineering technology.

Potrero Canyon is home to the Stephens' Kangaroo Rat (left) and various other threatened or endangered plants and wildlife. Lockheed Martin took steps throughout the construction as it has during all site work to protect the environment by minimizing earth-work in streambeds and rivers, implementing requirements for work to be completed only in day-time hours, requirements for all workers to be trained on how to avoid impacting SKR, nesting birds, and other wildlife and sensitive plants.
