Stow, OH 44224

Dear Ms. Harrison:

I have reviewed our Natural Heritage maps and files for the Arcadis remediation project area, including a one mile radius, on Archwood Ave. in Akron, Summit County, and on the Akron East Quad (2613). We have no records for rare or endangered species or other significant natural features within the project area. However, we have one record within the one mile radius of the project site. The location for the Upland Sandpiper (*Bartramia longicauda*), threatened, is shown in red on the attached map.

There are no state nature preserves or scenic rivers at the project site. We are unaware of any unique ecological sites, geologic features, animal assemblages, state parks, state forests or state wildlife areas within a one mile radius of the project area. We also have no records for Indiana Bat (*Myotis sodalis*, state endangered, federal endangered) capture locations or hibernacula within a five mile radius of the project site.

Our inventory program has not completely surveyed Ohio and relies on information supplied by many individuals and organizations. Therefore, a lack of records for any particular area is not a statement that rare species or unique features are absent from that area. Please note that although we inventory all types of plant communities, we only maintain records on the highest quality areas.

Please contact me at 614-265-6818 if I can be of further assistance.

Sincerely,

A handwritten signature in blue ink that reads "Debbie Woischke".

Debbie Woischke, Ecological Analyst
Natural Heritage Program

Akron East Quad,
Summit Co.
