Notes:

mg/kg	milligrams per kilogram	SS	Surface soil
ug/kg	micrograms per kilogram	SB	Soil boring
Pci/g	picocuries per gram	CB	Catch basin
Pci/L	picocuries per liter	RAD	Radiological sample
ug/L	micrograms per liter	"D"	Field duplicate sample
mg/L	milligrams per liter	AVG	Value is an average of initial and duplicate sample results.
U	The analyte was analyzed for, but was not detected at a level greater than or equal to the level of the adjusted detection limit.	BaPEq	Benzo(a)pyrene equivalents
J	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample (due either to the quality of the data generated because certain quality control criteria were not met, or the concentration of the analyte was below the reporting limit).	UR	The sample result (nondetected) is unusable due to the quality of the data generated because certain criteria were not met. The analyte may or may not be present in the sample.
J+	The result is an estimated quantity, but the result may be biased high.	PCB	Polychlorinated biphenyls
J-	The result is an estimated quantity, but the result may be biased low.	S.U.	A unitless scale of acidity (in pH)
UJ	The analyte was analyzed for, but was not detected. The reported detection limit is approximate and may be inaccurate or imprecise.	TPH	Total petroleum hydrocarbons
NJ	The analyte has been “tentatively identified” or “presumptively” as present and the associated numerical value is the estimated concentration in the sample.	PAH	Polycyclic aromatic hydrocarbons
R	The sample result (detected) is unusable due to the quality of the data generated because certain criteria were not met. The analyte may or may not be present in the sample.		

Appendix Table E2
Subsurface Soil (2-10 ft bgs) Analytical Results - Block E
Middle River Complex, Middle River, Maryland
