Notes:

mg/kg	milligrams per kilogram
ug/kg	micrograms per kilogram
Pci/g	picocuries per gram
Pci/L	picocuries per liter
ug/L	micrograms per liter
mg/L	milligrams per liter
U	The analyte was analyzed for, but was not detected at a level greater than or equal to the level of the adjusted detection limit.
J	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample (due either to the quality of the data generated because certain quality control criteria were not met, or the concentration of the analyte was below the reporting limit).
J+	The result is an estimated quantity, but the result may be biased high.
J-	The result is an estimated quantity, but the result may be biased low.
UJ	The analyte was analyzed for, but was not detected. The reported detection limit is approximate and may be inaccurate or imprecise.
NJ	The analyte has been “tentatively identified” or “presumptively” as present and the associated numerical value is the estimated concentration in the sample.
R	The sample result (detected) is unusable due to the quality of the data generated because certain criteria were not met. The analyte may or may not be present in the sample.
UR	The sample result (nondetected) is unusable due to the quality of the data generated because certain criteria were not met. The analyte may or may not be present in the sample.
SS	Surface soil
SB	Soil boring
CB	Catch basin
RAD	Radiological sample
"D"	Field duplicate sample
AVG	Value is an average of initial and duplicate sample results.
BaPEq	Benzo(a)pyrene equivalents
PAH	Polycyclic aromatic hydrocarbons
PCB	Polychlorinated biphenyls
S.U.	A unitless scale of acidity (in pH)
TPH	Total petroleum hydrocarbons

Notes:

mg/kg	milligrams per kilogram
ug/kg	micrograms per kilogram
Pci/g	picocuries per gram
Pci/L	picocuries per liter
ug/L	micrograms per liter
mg/L	milligrams per liter
U	The analyte was analyzed for, but was not detected at a level greater than or equal to the level of the adjusted detection limit.
J	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample (due either to the quality of the data generated because certain quality control criteria were not met, or the concentration of the analyte was below the reporting limit).
J+	The result is an estimated quantity, but the result may be biased high.
J-	The result is an estimated quantity, but the result may be biased low.
UJ	The analyte was analyzed for, but was not detected. The reported detection limit is approximate and may be inaccurate or imprecise.
NJ	The analyte has been “tentatively identified” or “presumptively” as present and the associated numerical value is the estimated concentration in the sample.

R	The sample result (detected) is unusable due to the quality of the data generated because certain
UR	The sample result (nondetected) is unusable due to the quality of the data generated because
SS	Surface soil
SB	Soil boring
CB	Catch basin
RAD	Radiological sample
"D"	Field duplicate sample
AVG	Value is an average of initial and duplicate sample results.
BaPEq	Benzo(a)pyrene equivalents
PAH	Polycyclic aromatic hydrocarbons
PCB	Polychlorinated biphenyls
S.U.	A unitless scale of acidity (in pH)
TPH	Total petroleum hydrocarbons

Notes:

mg/kg milligrams per kilogram
ug/kg micrograms per kilogram
Pci/g picocuries per gram
Pci/L picocuries per liter
ug/L micrograms per liter
mg/L milligrams per liter
U The analyte was analyzed for, but was not detected at a level greater than or equal
J The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample (due either to the quality of the data generated because certain quality control criteria were not met, or the concentration of the analyte was below the reporting limit).
J+ The result is an estimated quantity, but the result may be biased high.
J- The result is an estimated quantity, but the result may be biased low.

UJ The analyte was analyzed for, but was not detected. The reported detection limit is
AVG Value is an average of initial and duplicate sample results.
R The sample result (detected) is unusable due to the quality of the data generated
UR The sample result (nondetected) is unusable due to the quality of the data
SS Surface soil
SB Soil boring
CB Catch basin
RAD Radiological sample
NJ The analyte has been “tentatively identified” or “presumptively” as present and the associated numerical value is the estimated concentration in the sample.

"D" Field duplicate sample

PCB Polychlorinated biphenyls
S.U. A unitless scale of acidity (in pH)
TPH Total petroleum hydrocarbons
BaPEq Benzo(a)pyrene equivalents
PAH Polycyclic aromatic hydrocarbons

Notes:

mg/kg	milligrams per kilogram
ug/kg	micrograms per kilogram
Pci/g	picocuries per gram
Pci/L	picocuries per liter
ug/L	micrograms per liter
mg/L	milligrams per liter
U	The analyte was analyzed for, but was not detected at a level greater than or equal to the level of the adjusted detection limit.
J	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample (due either to the quality of the data generated because certain quality control criteria were not met, or the concentration of the analyte was below the reporting limit).
J+	
J-	The result is an estimated quantity, but the result may be biased low.
UJ	The analyte was analyzed for, but was not detected. The reported detection limit is approximate and may be inaccurate or imprecise.
NJ	The analyte has been “tentatively identified” or “presumptively” as present and the associated numerical value is the estimated concentration in the sample.
R	The sample result (detected) is unusable due to the quality of the data generated because certain criteria were not met. The analyte may or may not be present in the sample.
UR	The sample result (nondetected) is unusable due to the quality of the data generated because certain criteria were not met. The analyte may or may not be present in the sample.
SS	Surface soil
SB	Soil boring
CB	Catch basin
RAD	Radiological sample
"D"	Field duplicate sample
AVG	Value is an average of initial and duplicate sample results.
BaPEq	Benzo(a)pyrene equivalents
PAH	Polycyclic aromatic hydrocarbons
PCB	Polychlorinated biphenyls
S.U.	A unitless scale of acidity (in pH)
TPH	Total petroleum hydrocarbons

Notes:

mg/kg	milligrams per kilogram
ug/kg	micrograms per kilogram
Pci/g	picocuries per gram
Pci/L	picocuries per liter
ug/L	micrograms per liter
mg/L	milligrams per liter
U	The analyte was analyzed for, but was not detected at a level greater than or equal to the level of the adjusted detection limit.
J	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample (due either to the quality of the data generated because certain quality control criteria were not met, or the concentration of the analyte was below the reporting limit).
J+	The result is an estimated quantity, but the result may be biased high.
J-	The result is an estimated quantity, but the result may be biased low.
UJ	The analyte was analyzed for, but was not detected. The reported detection limit is approximate and may be inaccurate or imprecise.
NJ	The analyte has been “tentatively identified” or “presumptively” as present and the associated numerical value is the estimated concentration in the sample.
R	The sample result (detected) is unusable due to the quality of the data generated because certain criteria were not met. The analyte may or may not be present in the sample.
UR	The sample result (nondetected) is unusable due to the quality of the data generated because certain criteria were not met. The analyte may or may not be present in the sample.
SS	Surface soil
SB	Soil boring
CB	Catch basin
RAD	Radiological sample
"D"	Field duplicate sample
AVG	Value is an average of initial and duplicate sample results.
BaPEq	Benzo(a)pyrene equivalents
PAH	Polycyclic aromatic hydrocarbons
PCB	Polychlorinated biphenyls
S.U.	A unitless scale of acidity (in pH)
TPH	Total petroleum hydrocarbons
