| | J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| GC Semi VOA | | |
| | U | Indicates the analyte was analyzed for but not detected. |
| | F1 | MS and/or MSD Recovery is outside acceptance limits. |
| | J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

# CASE NARRATIVE

## Client: Tetra Tech, Inc.

## Project: MRC Block F UST Pipe Inv.

## Report Number: 240-59482-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

**RECEIPT**
The samples were received on 12/29/2015 9:30 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 2.5º C.

**VOLATILE ORGANIC COMPOUNDS (GCMS)**
Samples F-VB-UST-P-7 (240-59482-2) and F-VB-UST-P-8 (240-59482-3) were analyzed for volatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8260C. The samples were prepared and analyzed on 12/30/2015.

1,2,3-Trichlorobenzene, 1,2,4-Trichlorobenzene and Naphthalene were detected in method blank MB 240-212606/24 at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

**VOLATILE ORGANIC COMPOUNDS (GCMS)**
Sample TB-122815 (240-59482-1) was analyzed for volatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8260C. The samples were analyzed on 01/04/2016.

2-Butanone (MEK) was detected in method blank MB 240-212893/8 at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

The continuing calibration verification (CCV) for analytical batch 212893 exceeded control criteria for multiple compounds. The samples associated with this CCV were non-detects for the affected analytes. In accordance with the laboratory SOP, a low level CCV at the reporting limit (labeled as an MRL) was analyzed and the affected compounds were detected; therefore the data has been reported. No further corrective action was required. TB-122815 (240-59482-1)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

**SEMIVOLATILE ORGANIC COMPOUNDS (GCMS)**
Samples F-VB-UST-P-7 (240-59482-2) and F-VB-UST-P-8 (240-59482-3) were analyzed for semivolatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8270D. The samples were prepared on 12/30/2015 and analyzed on 12/31/2015.

Bis(2-ethylhexyl) phthalate, Di-n-butyl phthalate and Isophorone were detected in method blank MB 240-212548/7-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

The continuing calibration verification (CCV) associated with analytical batch 212723 recovered above the upper control limit for 4-Nitrophenol. The samples associated with this CCV were non-detect for this analyte; therefore, the data have been reported. The following samples are impacted: F-VB-UST-P-7 (240-59482-2), F-VB-UST-P-8 (240-59482-3) and (MB 240-212548/7-A).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

**GASOLINE RANGE ORGANICS**

Samples F-VB-UST-P-7 (240-59482-2) and F-VB-UST-P-8 (240-59482-3) were analyzed for gasoline range organics in accordance with EPA SW-846 Method 8015C - GRO. The samples were prepared and analyzed on 12/30/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

**DIESEL RANGE ORGANICS (DRO)**

Samples F-VB-UST-P-7 (240-59482-2) and F-VB-UST-P-8 (240-59482-3) were analyzed for diesel range organics (DRO) in accordance with EPA SW-846 Method 8015C - DRO. The samples were prepared on 12/30/2015 and analyzed on 12/31/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

**POLYCHLORINATED BIPHENYLS (PCBS)**

Samples F-VB-UST-P-7 (240-59482-2) and F-VB-UST-P-8 (240-59482-3) were analyzed for polychlorinated biphenyls (PCBs) in accordance with EPA SW-846 Method 8082A. The samples were prepared on 12/30/2015 and analyzed on 01/04/2016.

Surrogates are added during the extraction process prior to dilution. When the sample dilution is 5X or greater, surrogate recoveries are diluted out and no corrective action is required. All of the samples in this data set analyzed for PCBs were subjected to the sulfuric acid cleanup procedure before instrumental analysis, per EPA Method 3665A.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

**PERCENT SOLIDS**

Samples F-VB-UST-P-7 (240-59482-2) and F-VB-UST-P-8 (240-59482-3) were analyzed for percent solids in accordance with EPA Method 160.3 MOD. The samples were analyzed on 12/29/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

# DATA REPORTING QUALIFIERS

Client: Tetra Tech, Inc. Job Number: 240-59482-1

| Lab Section | Qualifier | Description |
|---|---|---|
| GC/MS VOA | | |
| | B | Compound was found in the blank and sample. |
| | U | Indicates the analyte was analyzed for but not detected. |
| | F1 | MS and/or MSD Recovery is outside acceptance limits. |
| | F2 | MS/MSD RPD exceeds control limits |
| | J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| GC/MS Semi VOA | | |
| | B | Compound was found in the blank and sample. |
| | U | Indicates the analyte was analyzed for but not detected. |
| | F1 | MS and/or MSD Recovery is outside acceptance limits. |
| | J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| GC VOA | | |
| | U | Indicates the analyte was analyzed for but not detected. |
| GC Semi VOA | | |
| | U | Indicates the analyte was analyzed for but not detected. |
| | p | The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported. |
