Baltimore, MD 21230

Subject: Block F Underground Storage Tank Closure Report Supplemental Information  
Lockheed Martin Middle River Complex  
2323 Eastern Boulevard  
Middle River, Maryland

Dear Ms. Jackson:

Please find below the supplemental information to support the Oil Controls Program's review of the Block F underground storage tank closure report dated April 2016.

The quantity of soil excavated and transported off-site for recycling at Soil Safe, Inc., during the Block F tank and piping removal was 1,850.48 tons as presented in summary as Attachment A. A copy of all manifests with weights recycled at Soil Safe is included as Attachment B. The USTs were decontaminated onsite and disposed at Cambridge Iron and Metal Company, Inc., on November 12, 2015. The disposal receipt can be found on the first page of Appendix F of the closure report and is provided herein as Attachment C. As requested, future tank closure reports for Blocks E and G of the Middle River Complex will include a separate hard-copy appendix for the tank disposal receipt, all disposal manifests, and copies of the analytical laboratory summary forms in addition to the complete laboratory reports.

Tank and piping excavations in Block F were monitored with a MultiRAE photoionization detector to guide the field excavation of potentially impacted soils. Stockpiled soils from the Block F UST removals produced results averaging 20 parts per million (ppm); the maximum detected reading was 577 ppm from soils directly beneath the piping. In both the UST area and along the piping run, all visually impacted soil was removed and transported to Soil Safe, Inc., in Brandywine, MD. Soil excavation continued until a stiff clay was encountered at the base of the excavations. Readings from

the PID indicated 0 ppm in the clay soils and verification samples indicating clean closure were obtained from this layer as documented in the closure report.

Please feel free to contact me at (301) 548-2209 if additional information is needed to complete the site status and closure letter for the seven 1,000 gallon underground storage tanks (USTs) in Block F.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Tom D. Blackman', with a long horizontal flourish extending to the right.

Thomas D. Blackman
