APPENDIX G—NONHAZARDOUS WASTE PROFILE AND MANIFESTS

Form U Supplemental Information

Site Name: Lockheed Martin
Site Address: 2323 Eastern Boulevard
Middle River, MD

Description of Process Generating Waste:

The Lockheed Martin site in Middle River MD has 3 separate areas where trenches will be dug to install a groundwater treatment system. Block E will generate approximately 1200 cubic yards of contaminated non hazardous soil, Block G will generate approximately 1500 cubic yards of contaminated non hazardous soil, and Block I will generate approximately 500 cubic yards of contaminated non hazardous soil.

BLOCK E
Block E housed operations for aircraft manufacturing. The structures on this block were demollshed in the 1970s. Currently situated within this block is a 500,000-gallon above ground fire water tank with pump house. Former processes and specific sources of contamination are unknown and therefore no listed waste codes will be applicable to any waste generated from this area.

This area does contain 4 PCB hot spots where PCBs exceed 50 PPM. The PCB contamination is suspected to have been caused by transformers formerly present at the site. These locations are presented in if **Figure 3.1.** The PCB soil from each location will be over excavated to the surrounding sample location that indicate PCB concentration of 40 ppm or lower. The PCB soil will be transported to Waste Management's Model City NY, Sub Title C facility.

Contaminants found in the Block E soil include polycyclic aromatic hydrocarbons (PAHs), total petroleum hydrocarbons, volatile organic compounds (VOCs), and PCBs.

BLOCK G
Block G housed a sewage treatment plant, vibration test building, and two fuel USTs. These facilities have been removed, but some foundations remain. It has also been used for parking trucks for a long period of time. No listed waste codes will be applicable to any waste generated from this area. VOCs in groundwater have migrated to this block from a waste oil UST located to the north.

Contaminants found in the Block G soil include PAHs and arsenic.

BLOCK I
Block I is within the operating industrial area of the Middle River Complex. This area has been used for industrial purposes since prior to World War 2. Activties have included aircraft and aerospace manufacturing. The excavation associated with this project is taking place in a small area south of Building C, a large, operating industrial building. There are no recognized Environmental Conditions in the immediate vicinity of this excavation.

Sampling of soil in this area has shown the limited presence of PAHs and metals.

Form U Supplemental Information

Waste Classification Sampling Description

BLOCK E

Waste classification analytical results are presented in **Attachment 1** (1 of 2 and 2 of 2) for samples E-DC-SCA-2, E-DC-SCA-3, E-DC-SCA-4, and **Attachment 2** for result E-DC-SCA-1. Sample locations are presented in **Figure 3-3**.

E-DC-SCA-1-(A-E) through E-DC-SCA-4-(A-E)	Soil pre-excavation disposal characterization samples. Four samples required at Block E. Each sample collected as a composite of soils sampled from 0 to 3 ft. bgs in five borings (five-point composite). Each sample is to represent each 500 cubic-yard volume of soils excavated from trench areas. Five borings distributed evenly over each excavation sub-area representing approximately 500 cubic yards. Each sample analyzed for TCLP VOCs (as a grab sample), TCLP base-neutral and acid extractables, TCLP herbicides/pesticides, TCLP metals, PCBs by SW846 Method 8082, and Commonwealth of Pennsylvania "Form U" parameters.

Block G

Waste classification analytical results are presented in **Attachment 2** for samples G-DC-SCA-1, G-DC-SCA-2, G-DC-SCA-3. Sample locations are presented in **Figure 3-5**.

G-DC-SCA-1-(A-E) through G-DC-SCA-3-(A-E) BLOCK G	Soil pre-excavation disposal characterization samples. Three samples required at Block G. Each sample collected as a composite of soils sampled from 0 to 3 ft. bgs in five borings (five-point composite). Each sample is to represent each 500 cubic-yard volume of soils excavated from trench areas. Five borings distributed evenly over each excavation sub-area representing approximately 500 cubic yards. Each sample analyzed for TCLP VOCs (as a grab sample), TCLP base-neutral and acid extractables, TCLP herbicides/pesticides, TCLP metals, PCBs by SW846 Method 8082, and Commonwealth of Pennsylvania "Form U" parameters.

Block I

Block I has not been fully delineated. We will submit the additional data at a later time as an amendment to this application

I-DC-SCA-1-(A-E) BLOCK I	Soil pre-excavation disposal characterization sample. One sample only is required at Block I; it will consist of a composite of soils sampled from 0 to 3 ft. bgs in five borings (five-point composite), representing a 500 cubic-yard soil volume excavated from trench areas.Samples analyzed for TCLP VOCs, TCLP base-neutral and acid extractables, TCLP herbicides/pesticides, TCLP metals, PCBs by SW846 Method 8082, and Commonwealth of Pennsylvania "Form U" parameters.

2. State Hazardous Waste? ☐ Yes ☑ No
   Code: _____
3. Is this material non-hazardous due to Treatment, Delisting, or an Exclusion? ☐ Yes* ☑ No
4. Contains Underlying Hazardous Constituents? ☐ Yes* ☑ No
5. Contains benzene **and** subject to Benzene NESHAP? ☐ Yes* ☑ No
6. Facility remediation subject to 40 CFR 63 GGGGG? ☐ Yes* ☑ No
7. CERCLA or State-mandated clean-up? ☐ Yes* ☑ No
8. NRC or State-regulated radioactive or NORM waste? ☐ Yes* ☑ No

***If Yes, see Addendum (page 2) for additional questions and space.**

9. Contains PCBs? → If Yes, answer a, b and c. ☑ Yes ☐ No
   a. Regulated by 40 CFR 761? ☑ Yes ☐ No
   b. Remediation under 40 CFR 761.61 (a)? ☐ Yes ☑ No
   c. Were PCB imported into the US? ☐ Yes ☑ No
10. Regulated and/or Untreated Medical/Infectious Waste? ☐ Yes ☑ No
11. Contains Asbestos? ☐ Yes ☑ No
    → If Yes: ☐ Non-Friable ☐ Non-Friable – Regulated ☐ Friable

E. ANALYTICAL AND OTHER REPRESENTATIVE INFORMATION

1. Analytical attached ☐ Yes

   Please identify applicable samples and/or lab reports:

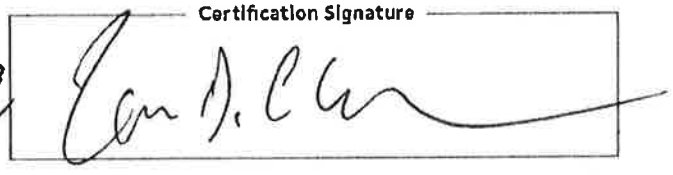
2. Other information attached (such as MSDS)? ☐ Yes

F. SHIPPING AND DOT INFORMATION

1. ☑ One-Time Event ☐ Repeat Event/Ongoing Business
2. Estimated Quantity/Unit of Measure: 3000
   ☐ Tons ☑ Yards ☐ Drums ☐ Gallons ☐ Other: _____
3. Container Type and Size: Bulk
4. USDOT Proper Shipping Name: ☐ N/A

G. GENERATOR CERTIFICATION (PLEASE READ AND CERTIFY BY SIGNATURE)

By signing this EZ Profile™ form, I hereby certify that all information submitted in this and all attached documents contain true and accurate descriptions of this material, and that all relevant information necessary for proper material characterization and to identify known and suspected hazards has been provided. Any analytical data attached was derived from a sample that is representative as defined in 40 CFR 261 – Appendix 1 or by using an equivalent method. All changes occurring in the character of the material (i.e., changes in the process or new analytical) will be identified by the Generator and be disclosed to Waste Management prior to providing the material to Waste Management.



If I am an agent signing on behalf of the Generator, I have confirmed with the Generator that information contained in this Profile is accurate and complete.

Last Revised April 26, 2013

©2013 Waste Management, Inc

Certificate of Non-hazardous Waste

I, the undersigned, being duly authorized by my company certify that the wastestream(s) we are disposing at the G.R.O.W.S. Landfill, G.R.O.W.S. North Landfill, Tullytown Resource Recovery Facility, Mountain View Reclamation Landfill, Alliance Sanitary Landfill, Grand Central Sanitary Landfill, Pine Grove Landfill and/or the Phoenix Resources Landfill is/are not a characteristic hazardous waste as defined in 40 CFR, Sections 261.20 to 261.24, and/or is not a listed hazardous waste as defined in 40 CFR, Sections 261.30 to 261.34. Furthermore, based on generator's knowledge of the company's process, TCLP and Total Characteristics not tested for are known not to be present in the concentrations equal to or greater than the value specified in the TC Rule 40 CFR Part 261.24.

Profile Amendment Request Form

John Zwahl (American Waste Management Services, Inc) hereby requests an amendment to WMI profile #: 47399PAE
(Contact Name)

to include the following:

Amendment Type: ❑ XOne Time Only Request (Event) ❑ Permanent Addition to Profile (Base)

❑ Additional Analytical/MSDS to be added to profile (see attached)

❑ Volume Increase (specify volume) 200 yards ❑ Tons ❑ Cubic Yards ❑ Drums ❑ Gallons ❑ Other (specify) _____

❑ Constituent(s) to be added and/or modify current range in chemical composition:

Chemicals or constituents to be added/modify	Low	High	Units

❑ Change current ranges on profile (specify below)

pH Range _____ to _____ Free Liquid Range 0 to _____

❑ X Other (specify) This request is for Block I which was not completely classified and therefore not ready for inclusion in the initial approval request. The Table A parameters For Block I (minus the VOC data) was provided with the initial submittal in report J23344-1 Std_Tal_14 (sample: I-DC-SCA-1). The recently

Collected VOC data for Block I is attached in report J30141-1 Std_Tal_L3. The sample representative for Block is I-DC-SCA-2

GENERATOR CERTIFICATION

By signing this form, the Generator hereby certifies:
The information provided in this document, the referenced Waste Management Generator's Waste Profile Sheet, and all other referenced documents contain true and accurate descriptions of the waste material. All information regarding known or suspected hazards in the possession of the Generator has been disclosed.

Generator/Customer Signature: _____ Date: December 4, 2013

CASE NARRATIVE

Client: Tetra Tech, Inc.

Project: MRC Soil Remediation

Report Number: 240-30141-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 10/11/2013; the samples arrived in good condition, properly preserved and on ice. The temperature of the cooler at receipt was 2.6 C.

VOLATILE ORGANIC COMPOUNDS (GCMS)

Sample I-DC-SCA-2 (240-30141-1) was analyzed for volatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8260C. The samples were prepared and analyzed on 10/21/2013.

The continuing calibration verification (CCV) for analytical batch 106475 recovered outside control limits for 2-Methyl-2-propanol, Chloroethane, Chloromethane, 1,2-Dichloroethane, Trichlorofluoromethane, and Bromomethane. The data have been qualified and reported.

The laboratory control sample for batch 106475 recovered outside control limits for the following analyte(s): Chloroethane, Trichlorofluoromethane, and Bromomethane. These compounds have been identified as a poor performing analyte when analyzed using this method; therefore, re-extraction/re-analysis was not performed. These results have been reported and qualified.

The 8260C LCS (LCS 240-106475/5) failed low for Styrene in batch 106475. The MRL for the 8260C method recovered Styrene at the reporting limit and there was no reportable concentrations in the samples. The data have been qualified and reported.

No other difficulties were encountered during the VOCs analysis. All other quality control parameters were within the acceptance limits.

VOLATILE ORGANIC COMPOUNDS (GCMS)

Sample TB-101013 (240-30141-2) was analyzed for volatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8260C. The samples were analyzed on 10/15/2013.

Acetone was detected in method blank MB 240-105630/8 at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

The laboratory control sample (LCS) for batch 105630 recovered outside control limits for Hexachlorobutadiene. This analyte was biased high in the LCS and was not detected in the associated samples; therefore, the data have been reported.

The continuing calibration verification (CCV) for Dichlorodifluoromethane, 2,2-Dichloropropane, and Hexachlorobutadiene associated with batch 105630 recovered above the upper control limit. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

The continuing calibration verification (CCV) for analytical batch 105630 exceeded control criteria for 2-Hexanone, 2-Chloroethyl vinyl ether, and Napthalene. The samples associated with this CCV were non-detects for the affected analytes. A low level CCV, at or below the reporting limit (MRL), was analyzed and the affected compounds were detected; therefore the data is okay to report per SOP.

No other difficulties were encountered during the VOCs analysis. All other quality control parameters were within the acceptance limits.

PERCENT SOLIDS

Sample I-DC-SCA-2 (240-30141-1) was analyzed for percent solids in accordance with EPA Method 160.3 MOD. The samples were analyzed on 10/14/2013.

No difficulties were encountered during the % solids analysis. All quality control parameters were within the acceptance limits.

SAMPLE SUMMARY

DATA REPORTING QUALIFIERS

Client: Tetra Tech, Inc. Job Number: 240-30141-1

Lab Section	Qualifier	Description
GC/MS VOA		
	U	Indicates the analyte was analyzed for but not detected.
	*	LCS or LCSD exceeds the control limits
	F	MS/MSD Recovery and/or RPD exceeds the control limits
	J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Client: Tetra Tech, Inc. Job Number: 240-30141-1

CERTIFICATE OF DISPOSAL

CWM CHEMICAL SERVICES, L.L.C., EPA ID: NYD049836679, has received waste material from LOCKHEED MARTIN CORP on 07/18/13 as described on Shipping Document number 005997194JJK Sequence number 01. CWM CHEMICAL SERVICES, L.L.C. hereby certifies that the above described material was landfilled in accordance with the 40 CFR part 761 as it pertains to the land disposal of polychlorinated biphenyl contaminated materials.

Profile Number: NY304301
CWM Tracking ID: 8166151601
CWM Unit #: 1*0
Disposal Date: 07/18/13

Under civil and criminal penalties of law for the making or submission of false or fraudulent statements or representations (18 U.S.C 1001 and 15 U.S.C. 2615) I certify that the information contained in or accompanying this document is true accurate and complete. As to the identified section(s) of this document for which I cannot personally verify truth and accuracy, I certify as the company official having supervisory responsibility for the persons who, acting under my direct instructions, made the verification that this information is true accurate and complete.

WASTE MATERIAL PROFILE SHEET

Clean Harbors Profile No. CH669134B

A. GENERAL INFORMATION

GENERATOR EPA ID #/REGISTRATION # ***MDR000524413*** GENERATOR NAME: ***Middle River Complex***

GENERATOR CODE (Assigned by Clean Harbors) ***MI5240*** CITY ***Middle River*** STATE/PROVINCE ***MD*** ZIP/POSTAL CODE ***21220***

ADDRESS ***2323 Eastern Boulevard*** PHONE: **(301) 528-3021**

CUSTOMER CODE (Assigned by Clean Harbors) ***TE0740*** CUSTOMER NAME: ***Tetra Tech Inc***

ADDRESS ***20251 Century Boulevard Suite 200*** CITY ***Germantown*** STATE/PROVINCE ***MD*** ZIP/POSTAL CODE ***20874***

B. WASTE DESCRIPTION

WASTE DESCRIPTION: ***IDW GroundWater (Hazardous)***

PROCESS GENERATING WASTE: **Investigation Derived Waste**

IS THIS WASTE CONTAINED IN SMALL PACKAGING CONTAINED WITHIN A LARGER SHIPPING CONTAINER ? **No**

C. PHYSICAL PROPERTIES (at 25C or 77F)

PHYSICAL STATE
- SOLID WITHOUT FREE LIQUID
- POWDER
- MONOLITHIC SOLID
- [x] LIQUID WITH NO SOLIDS
- LIQUID/SOLID MIXTURE
  - % FREE LIQUID
  - % SETTLED SOLID
  - % TOTAL SUSPENDED SOLID
- SLUDGE
- GAS/AEROSOL

NUMBER OF PHASES/LAYERS

[x] 1 2 3

% BY VOLUME (Approx.)

TOP ***0.00***

MIDDLE ***0.00***

BOTTOM ***0.00***

VISCOSITY (If liquid present)
- [x] 1 - 100 (e.g. Water)
- 101 - 500 (e.g. Motor Oil)
- 501 - 10,000 (e.g. Molasses)
- > 10,000

COLOR

Clear

ODOR
- [x] NONE
- MILD
- STRONG

Describe:

BOILING POINT °F (°C)
- <= 95 (<=35)
- 95 - 100 (35-38)
- 101 - 129 (38-54)
- [x] >= 130 (>54)

MELTING POINT °F (°C)
- < 140 (<60)
- 140-200 (60-93)
- > 200 (>93)

TOTAL ORGANIC CARBON
- [x] <= 1%
- 1-9%
- >= 10%

FLASH POINT °F (°C)
- < 73 (<23)
- 73 - 100 (23-38)
- 101 -140 (38-60)
- 141 -200 (60-93)
- [x] > 200 (>93)

pH
- <= 2
- 2.1 - 6.9
- [x] 7 (Neutral)
- 7.1 - 12.4
- >= 12.5

SPECIFIC GRAVITY
- < 0.8 (e.g. Gasoline)
- 0.8-1.0 (e.g. Ethanol)
- [x] 1.0 (e.g. Water)
- 1.0-1.2 (e.g. Antifreeze)
- > 1.2 (e.g. Methylene Chloride)

ASH
- < 0.1
- 0.1 - 1.0
- 1.1 - 5.0
- 5.1 - 20.0
- > 20
- [x] Unknown

BTU/LB (MJ/kg)
- [x] < 2,000 (<4.6)
- 2,000-5,000 (4.6-11.6)
- 5,000-10,000 (11.6-23.2)
- > 10,000 (>23.2)

Actual:

D. COMPOSITION (List the complete composition of the waste, include any inert components and/or debris. Ranges for individual components are acceptable. If a trade name is used, please supply an MSDS. Please do not use abbreviations.)

CHEMICAL	MIN	--	MAX	UOM
TRICHLOROETHENE	68.0000000	--	68.0000000	PPM
WATER	99.0000000	--	100.0000000	%

DOES THIS WASTE CONTAIN ANY HEAVY GAUGE METAL DEBRIS OR OTHER LARGE OBJECTS (EX., METAL PLATE OR PIPING >1/4" THICK OR >12" LONG, METAL REINFORCED HOSE >12" LONG, METAL WIRE >12" LONG, METAL VALVES, PIPE FITTINGS, CONCRETE REINFORCING BAR OR PIECES OF CONCRETE >3")? YES NO

If yes, describe, including dimensions:

DOES THIS WASTE CONTAIN ANY METALS IN POWDERED OR OTHER FINELY DIVIDED FORM? YES [x] NO

DOES THIS WASTE CONTAIN OR HAS IT CONTACTED ANY OF THE FOLLOWING: ANIMAL WASTES, HUMAN BLOOD, BLOOD PRODUCTS, BODY FLUIDS, MICROBIOLOGICAL WASTE, PATHOLOGICAL WASTE, HUMAN OR ANIMAL DERIVED SERUMS OR PROTEINS OR ANY OTHER POTENTIALLY INFECTIOUS MATERIAL? YES [x] NO

I acknowledge that this waste material is neither infectious nor does it contain any organism known to be a threat to human health. This certification is based on my knowledge of the material. Select the answer below that applies:

The waste was never exposed to potentially infectious material. YES NO

Chemical disinfection or some other form of sterilization has been applied to the waste. YES NO

I ACKNOWLEDGE THAT THIS PROFILE MEETS THE CLEAN HARBORS BATTERY PACKAGING REQUIREMENTS. YES NO

I ACKNOWLEDGE THAT MY FRIABLE ASBESTOS WASTE IS DOUBLE BAGGED AND WETTED. YES NO

SPECIFY THE SOURCE CODE ASSOCIATED WITH THE WASTE. ***G39*** SPECIFY THE FORM CODE ASSOCIATED WITH THE WASTE. ***W113***

E. CONSTITUENTS

Are these values based on testing or knowledge? Knowledge ☑ Testing

If constituent concentrations are based on analytical testing, analysis must be provided. Please attach document(s) using the link on the Submit tab.

Please Indicate which constituents below apply. Concentrations must be entered when applicable to assist in accurate review and expedited approval of your waste profile. Please note that the total regulated metals and other constituents sections require answers.

GENERATOR'S CERTIFICATION

I hereby certify that all information submitted in this and attached documents is correct to the best of my knowledge. I also certify that any samples submitted are representative of the actual waste. If Clean Harbors discovers a discrepancy during the approval process, Generator grants Clean Harbors the authority to amend the profile, as Clean Harbors deems necessary, to reflect the discrepancy.

GENERATOR CERTIFICATION

I hereby certify that all information submitted in this and all attached documents contains true and accurate descriptions of this waste. Any sample submitted is representative as defined in 40 CFR 261 - Appendix I or by using an equivalent method. All relevant information regarding known or suspected hazards in the possession of the generator has been disclosed. I authorize sampling of any waste shipment for purposes of recertification.

FACILITY NOTIFICATION

If approved for management, Veolia ES has all the necessary permits and licenses for the waste that has been characterized and identified by this profile.

TSDF PROCESSING USE ONLY: PPE REQUIRED No _____ Yes _____ Describe _____

WIP No. _____

VEOLIA ENVIRONMENTAL SERVICES
WIP INSTRUCTIONS

Veolia ES requires completion of all sections of the Wastestream Information Profile (WIP). Sections not applicable to the wastestream must have N/A written in the space provided.

Documented WIP information is used to comply with TSDF Waste Analysis Plans, RCRA and DOT regulations, Emergency Planning and Community Right-to-Know Act (EPCRA), Pollution Prevention Act, Toxic Release Inventory Report and other regulatory and generator requirements.

MARINE POLLUTANT

- The wastestream is subject to the Marine Pollutant Regulations if:
    1. it is a bulk (>119 gallons) packaging with Marine Pollutant concentration ≥ 10% or Severe Marine Pollutant concentration ≥ 1%

    or

    2. it is non-bulk Marine Pollutant shipped by vessel (boat) in packages larger than 5 liters (liquid) or 5 kg (solid)

    or

    3. it is a non-bulk Severe Marine Pollutant, shipped by vessel (boat) in packages larger than 0.5 liters (liquid) or 0.5 kg (solid).

  Refer to the list of Marine Pollutants.

OZONE DEPLETING SUBSTANCE (ODS)

Refer to the list of Ozone Depleting Substances.

UNDERLYING HAZARDOUS CONSTITUENT (UHC)

Refer to the list of Underlying Hazardous Constituents (40 CFR 268.48)

BENZENE NESHAP

- The wastestream is subject to Benzene NESHAP notification and control requirements if it:
    1. contains > 10 ppm benzene, **and**
    2. is generated by a chemical manufacturing plant, petroleum refinery or coke by-product recovery plant, **and**
    3. the generator's Total Annual Benzene (TAB) is ≥ 10 Mg/yr

TRI CHEMICAL

- The wastestream is subject to Toxic Release Inventory Reporting if it contains a Section 313 Toxic Chemical and meets Qualifier requirements.

OSHA CARCINOGEN

- OSHA promulgated standards in 1974 to regulate the industrial use of 13 chemicals identified as occupational carcinogens. Exposures are to be controlled through the required use of engineering controls, work practices, and personal protective equipment, including respirators. See 29 CFR 1910.1003-1910.1016 for specific details.

RCRA SUB-PART CC CONTROLS

- Subpart CC Air Emission Control requirements apply to large quantity hazardous waste generators and to treatment, storage, and disposal facilities.
- Waste in containers greater than 0.1 cubic meters (i.e., 26.4 gallons) with greater than 500 ppm volatile organics are subject to this rule., unless otherwise exempted. Allowable controls include DOT approved containers, containers with an adequate cover and closure devices, and containers which operate with no detectable emissions (less than 500 ppm).

Box # 3043

15. GENERATOR'S/OFFEROR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by the proper shipping name, and are classified, packaged, marked and labeled/placarded, and are in all respects in proper condition for transport according to applicable international and national governmental regulations. If export shipment and I am the Primary Exporter, I certify that the contents of this consignment conform to the terms of the attached EPA Acknowledgment of Consent.
I certify that the waste minimization statement identified in 40 CFR 262.27(a) (if I am a large quantity generator) or (b) (if I am a small quantity generator) is true.

Generator's/Offeror's Printed/Typed Name: KENNETH A. JEFFREY, JR. CM Signature: [signature] Month: 11 Day: 11 Year: 13

16. International Shipments ☐ Import to U.S. ☐ Export from U.S. Port of entry/exit: Date leaving U.S.:
Transporter signature (for exports only):

17. Transporter Acknowledgment of Receipt of Materials
Transporter 1 Printed/Typed Name: Matthew C Powell Signature: [signature] Month: 11 Day: 11 Year: 13
Transporter 2 Printed/Typed Name: Signature: Month: Day: Year:

18. Discrepancy
18a. Discrepancy Indication Space ☐ Quantity ☐ Type ☐ Residue ☐ Partial Rejection ☐ Full Rejection
Manifest Reference Number:

18b. Alternate Facility (or Generator) U.S. EPA ID Number
Facility's Phone:

18c. Signature of Alternate Facility (or Generator) Month: Day: Year:

19. Hazardous Waste Report Management Method Codes (i.e., codes for hazardous waste treatment, disposal, and recycling systems)
1. H040 2. 3. 4.

20. Designated Facility Owner or Operator: Certification of receipt of hazardous materials covered by the manifest except as noted in Item 18a
Printed/Typed Name: Josette Muckland Signature: [signature] Month: 11 Day: 13 Year: 13

EPA Form 8700-22 (Rev. 3-05) Previous editions are obsolete.

DESIGNATED FACILITY TO DESTINATION STATE (IF REQUIRED)

APPENDIX J—SIDEWALL AND BOTTOM SAMPLING LOCATIONS AND RESULTS

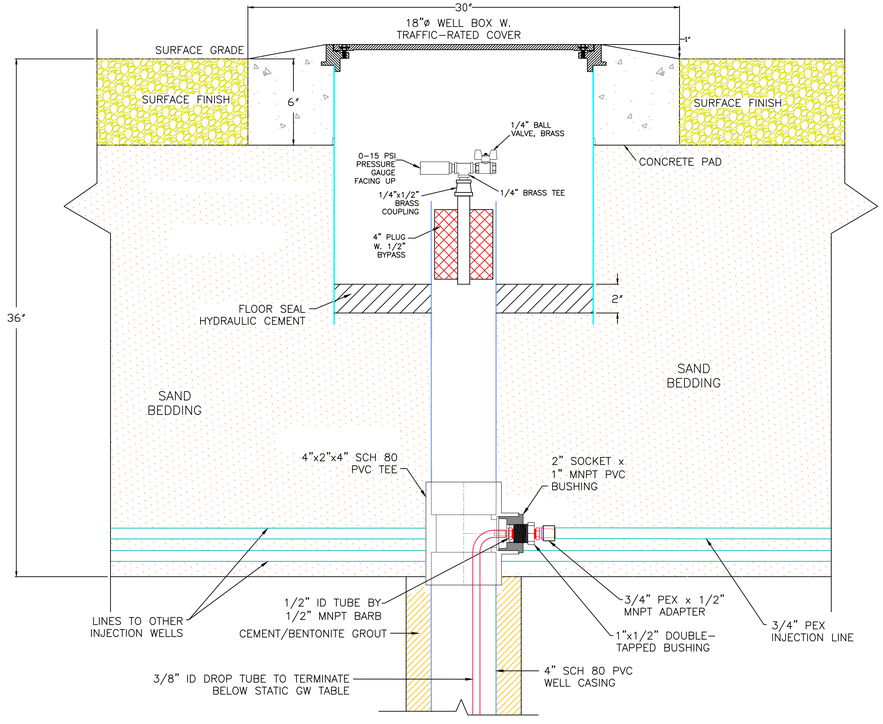
INJECTION WELL PLAN VIEW (TYPICAL)

INJECTION WELL SIDE VIEW (TYPICAL)

DRAWING SCALE
0' 12' 0'

NOTES:



1. TRENCH WIDTH VARIES IN DIFFERENT AREAS. TYPICAL TRENCH WIDTHS ARE 7.5 FEET IN SOUTHWEST AND SOUTHEAST TCE AREAS AND 2 FEET IN NORTH TCE AREA. REFER TO DRAWINGS C-2, C-3, C-4, C-7, C-8, C-9 FOR TRENCH WIDTH DETAILS.

2. INJECTION LINES AND PIPES IN THE TRENCH ARE SHOWN FOR ILLUSTRATION ONLY. REFER TO DRAWINGS C-2, C-3, C-4, C-7, C-8, C-9 FOR PIPING ARRANGEMENT IN TRENCHES.

3. TYPICAL INJECTION WELL FOR NO TRAFFIC AREAS AND WITHOUT CONTINGENCY POWER CONNECTIONS IS SHOWN ON THIS DRAWING.

4. SURFACE FINISH:
a) CRUSHED STONE IN CONCRETE AREAS TO MATCH CONCRETE THICKNESS;
b) MINIMUM 6" OF TOP SOIL AND RE-SEED IN LAWN AREAS;
c) ASPHALT PAVEMENT IN PAVED AREAS TO MATCH EXISTING SURFACE.

5. TRENCHES IN SOUTHEAST AND SOUTHWEST TCE AREAS SHALL BE 7.5 FEET IN WIDTH IN SAND BACKFILL INSTALLED BY PRE-REMEDIAL SOIL EXCAVATION WORK. TRENCHES IN NORTH TCE AREA VARY BETWEEN 1.5 AND 2.5 FEET IN WIDTH EXCAVATED IN EXISTING SOILS AND SHALL BE BACKFILLED WITH SAND BACKFILL.

ARE DIMENSIONS CRITICAL?

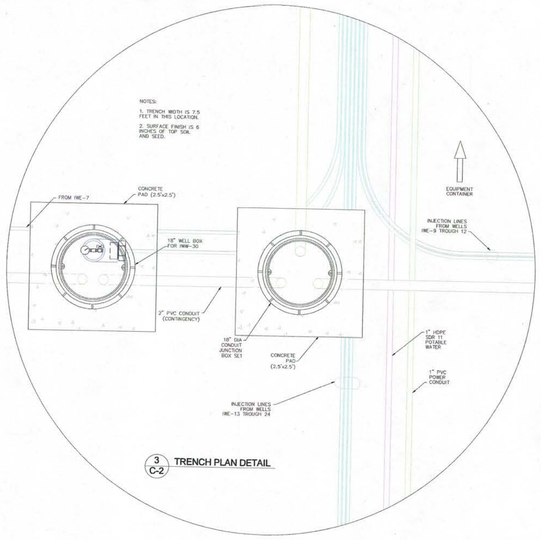
1 C-2 **UTILITIES STUB-OUT PLAN**

GENERAL NOTES FOR UNDERGROUND UTILITY TRENCHES IN SOUTHEAST AREA:

1. 3" DETECTABLE RED WARNING TAPE WITH ALUMINUM BACKING SHALL BE PLACED IN ALL TRENCHES WITH UNDERGROUND ELECTRICAL CONDUIT.

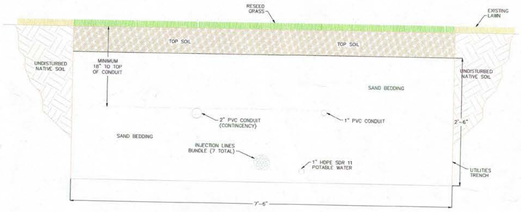
2. 3" DETECTABLE BLUE WARNING TAPE WITH ALUMINUM BACKING TAPE SHALL BE PLACED IN ALL TRENCHES WITH UNDERGROUND POTABLE WATER LINES AND INJECTION LINES.

3. 3" DETECTABLE BLUE WARNING TAPE WITH ALUMINUM BACKING TAPE SHALL BE PLACED ON EACH SIDE OF EXCAVATION DURING PRE-REMEDIATION SOIL EXCAVATION ACTIVITIES.



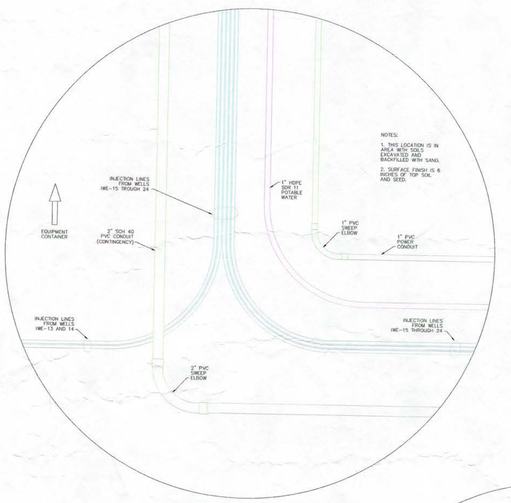
4. WARNING TAPE SHALL BE PLACED IN TRENCHES AT 12 INCHES DEPTH.

5. ALL UNDERGROUND ELECTRICAL CONDUIT SHALL BE SCH 40 PVC PIPE, GRAY, WITH BELLED END.



6. ELECTRICAL CONDUIT BURIAL DEPTH SHALL BE AT LEAST 18 INCHES TO TOP OF CONDUIT.

7. SAND BEDDING SHALL BE USED FOR TRENCH BACKFILL



8. CONDUIT JUNCTION BOXES (SE1, SE2, SE3) ARE THE SAME TYPE AS 18"ø MANHOLES USED FOR INJECTION WELLS.

PROJECT NUMBER: 112IC04769
DRILLING COMPANY: Boart Longyear/Cascade
DRILLING RIG: Spider Sonic - Rotosonic

BORING No.: IWE-2
DATE: 8/28/13
GEOLOGIST: W. O'Niell
DRILLER: Larry Hunsberger

Sample No. and Type or RQD	Depth (Ft.) or Run No.	Blows / 6" or RQD (%)	Sample Recovery / Sample Length	Lithology Change (Depth/Ft.) or Screened Interval	MATERIAL DESCRIPTION: Soil Density/ Consistency or Rock Hardness	Color	Material Classification	USCS *	Remarks	PID/FID Reading (ppm): Sample	Sampler BZ	Borehole**	Driller BZ**
	0						gravel sand to gravel f.ll, wet, low plasticity	GP					
	5						red brown silty clay V. slight moisture stiff low plasticity	CL					
	10						red brown silty sand to sandy silt, moist w some clay mod stiff, low-mod plasticity	ML/SM					
	15						red brown silty sand, soft, wet w 2" clay balls @ 18'-20'	SM					
	20						red brown green brn silty clay w sand, v. slight moisture, low plasticity	CL					
							red brown clay, stiff dry, low plasticity						
	25						red brown silty sand, soft, wet, low plastic.	SM					

* When rock coring, enter rock brokeness.

** Include monitor reading in 6 foot intervals @ borehole. Increase reading frequency if elevated reponse read.

Drilling Area Background (ppm): 1.1

Remarks:

APPENDIX L—CURRENT CONDITIONS MEMO

Middle River Complex Groundwater Remediation
Current Conditions and Path Forward based on UST Discovery in Block E
December 13, 2013

Background

In July 2013, during installation of the groundwater remediation system in Block E at the Middle River Complex, two underground storage tanks (USTs) were discovered. The location of these tanks is shown in Figure 1. Following removal of the USTs, a soil and groundwater delineation program showed that substantial trichloroethene (TCE) contamination was present in the vicinity of UST 2. It was determined that the groundwater remediation system, as designed, may not adequately address this additional contamination. Therefore, certain portions of the Block E groundwater remediation system remain incomplete awaiting design and implementation of the additional remedy. This memo was developed in order to detail the current state of the remediation system installation and outline future activities as they deviate from the original plan and scope of the groundwater remediation based on the approved Response Action Plan.

Activities Completed

Figure 2 shows the elements of the groundwater remediation system in Block E. The following activities have been completed:

- All soil excavation activities have been completed.
- Installation of all monitoring wells and 18 of 24 injection wells. Wells IWE-7 through IWE-12 have not been installed due to their proximity to the USTs.
- The trenching has been completed to all wells south of the USTs (IWE-13 to IWE-24) and the Pump House; this includes the installation of all injection piping, contingency conduit, power conduit, and the potable water line. The final potable water and electrical connections have not been made. This piping has been terminated approximately 10 feet south of UST 2; the piping has been coiled and wrapped in plastic at this location.
- The trenching has been completed to the northern most trench (IWE-1 through IWE-6) and the injection piping has been installed. This piping has also been run to their final location.
- The shipping container containing one of the 2 mixing/injection systems has been placed in Block E.
- All areas have been backfilled to the surface:
    - Surface restoration has been completed south of the USTs with the placement of fill, top soil, mulch, and hydroseed.
    - Surface restoration has been completed in the area north of the USTs with fill and crushed stone at the surface (these areas are within the footprint of the Building D foundation).
    - The area of the trench containing the USTs has been completed to the surface with crushed stone.

Note: based on the delays at Block E, it has been decided that the shipping container system currently placed in Block E will be moved to Block I for use prior to its move back to Block E. This means that there would be two container moves required to complete the scope; only one is included in the original proposal.

Activities Associated with the Original System Design that have not been Completed

The following activities have not been completed:

- Installation of injection wells IWE-7 through IWE-12.

- Installation of injection piping to these wells; this will require trenching through the previously placed fill (not soil).
- Running the injection piping, conduit, and potable water lines from the south, past the UST trench, to the location of the system container; this will require trenching through previously placed fill.
- Final connections to the shipping container system.
- Potable water and electrical connections to the Pump House.

Path Forward

As stated, due to the delays in Block E, the injection will proceed in Block I initially. During this period, the following activities will take place.

- Minor additional delineation in Block E.
- Completion of an alternatives analysis memo for the additional remediation; based on the team decision, this will involve a multi-phase extraction component followed by enhanced source bioremediation.
- Design of the additional remedy.
- Mobilization of a roto-sonic drill crew to install the wells associated with the additional remediation, any additional monitoring wells, and the six remaining groundwater remediation wells.
- Installation and operation of the additional remedy.
- Re-mobilization of the construction subcontractor for installation of underground piping associated with the additional source area injection and completion of the installation of the groundwater remediation system component piping. This will require excavation and backfill of previously excavated areas, including those with significant water infiltration issues.
- Termination of injection piping, contingency conduit, electrical conduit, and potable water lines at the system location.
- Final potable water and electrical connections.
- Re-placement of the shipping container system in Block E and final system connections.

Cost Considerations

Costs will be incurred for the following items based on the adjustments made following the discovery of the USTs. Note this list includes only those items required for the completion of the groundwater treatment system and not those for UST removal, delineation, or source area treatment.

- Termination of piping and securing of the piping remaining above grade (Tetra Tech and subcontractor labor plus minimal materials). This is completed.
- One additional movement of the shipping container system (truck and crane mobilization plus labor).
- Re-mobilization of the roto-sonic drilling crew and Tetra Tech geologist (the installation costs of the six wells are included in the original scope). This will be completed in conjunction with the installation of the wells associated with the additional remediation.
- Re-mobilization of the construction subcontractor (equipment and crew) and the Tetra Tech construction manager. This will also require additional costs for the small number of remaining wells/piping to be completed; e.g., the limited number of well vaults to be concreted in place may preclude the economical use of a concrete truck and will require hand mixing and placement.

- Installation of the injection piping in the UST trench may require some dewatering and water disposal based on the water present beneath the Building D slab and the French drain systems in this area.
- Storage of materials for the remaining six wells (well vaults, well head piping, injection piping, etc); it is likely that the storage will be at the Martin State Airport facility at no cost, but it will require placement and retrieval. This could be considered part of the mobilization.
- Maintenance and/or re-establishment of E&S controls.
- Re-establishment of utility mark-outs.
- Completion of surface restoration; additional costs for spreading of top soil and compost and hydroseeding. These are costs associated with remobilizing equipment and subcontractors.
- There will likely be surplus crushed stone as this will be replaced in the top 6" by top soil and seeding in the UST area trench. The disposition of this stone will be an additional cost.

As much as possible, these costs will be minimized based on the final design/construction of the additional remediation.

Schedule Considerations

Upon approval of the remedy by Lockheed Martin, Tetra Tech will provide a detailed schedule of the additional remediation activities. In general, considering the time required for design, permitting, MDE approval, and equipment procurement, the system start up will occur in approximately May 2014. Operation would continue until September 2014. Following this, it will take approximately one month to mobilize and complete the installation of the groundwater system, including trenching four additional injection wells, ending in October 2014.

As stated above, the tracer testing and injection will now occur in Block I instead of Block E. The schedule calls for the tracer test to begin in mid-February. These injections will require approximately 8 weeks for a mid-April completion. In order to facilitate post-tracer injection testing and develop optimized injection protocols, there is a period of approximately three months between the completion of tracer injection and substrate injection. Substrate injection in Block I will also require 8 weeks. Therefore, the injections will end in September 2014.

Therefore, the system will be available from Block I in September 2014 with Block E activities ending in October 2014. Noting that the schedule for the Block E work has not yet been completely established, we expect a delay of approximately one month in the overall project schedule.

Job Order No. 210-205-5286
Drawing No. N/A
District 15C6
PDM No. N/A

Dear Ms. Shea:

This office has received the following items with regard to construction of sewer and water improvements at the referenced site:

1. Agreement number 14021RAO, an executed copy of which is enclosed,

2. A check in the amount of $624.96 for inspection fees. This amount represents 8% of the approved estimated cost of improvements.

3. A check in the amount $8,593.00 of for security deposit.

This project is covered by the above referenced Baltimore County construction drawing and construction shall be as approved by Baltimore County on this drawing. Operations shall not begin until the Division of Construction Contracts Administration (DCCA) has been notified. Your contractor is hereby advised to call the DCCA at (410) 887-3531 for issuance of a Notice to Proceed.

Please be advised that prior to the return of the security you must:

1. Prepare and submit as-built construction drawings. Notify your engineer as soon as the improvements covered by this agreement are complete.
2. Complete a one-year maintenance period to the satisfaction of Baltimore County;
3. Provide any required deeds to Baltimore County for easements or rights-of-way. PLEASE SEE THE ATTACHED DOCUMENTS RELATED TO THE PREPARATION OF DEEDS.

Should you require additional information, please call Jan M. Cook at (410) 887-3321.

Sincerely,

Colleen M. Kelly

BALTIMORE COUNTY

DEPARTMENT OF PERMITS APPROVALS AND INSPECTIONS

RIGHT-OF-WAY IMPROVEMENT AGREEMENT

for projects not requiring a public works agreement

Project Name: Lockheed Martin GW Remediation **RA No.** 14021RAO
PAI No.:
Job Order No.: 210-205-5286 **DATE:** 2/28/14
Plat Reference(s): 51/43
Total Estimated Cost: 7,812.00
Security Required: $ 8,953.00
NAME OF APPLICANT: Lockheed Martin Corporation

WHEREAS, the named Applicant desires to construct and install, at no cost to the County, all of the improvements located within the referenced project, the same being more fully outlined in Exhibit A which is attached hereto and made a part hereof,

WHEREAS, in accordance with the applicable provisions of the Baltimore County Code and Department of Permits Approvals and Inspections (PAI) Construction Policy Manual, PAI has this received and approved the cost estimates and construction drawings for the improvements covered in right-of-way agreement. PAI has also received all fees applicable to the improvements covered by this right-of-way improvement agreement.

WHEREAS, the Applicant is requesting authorization to proceed with construction of improvements covered herein.

NOW THEREFORE, in consideration of the foregoing and in order to obtain the County's approval for the Applicant to proceed with construction of the improvements, the Applicant confirms its understandings and obligations as follows:

1. With respect to the improvements covered by this right-of-way improvement agreement:

a. The Applicant shall install at its own expense all facilities in said property as shown on the approved construction drawings referenced herein.

b. The Applicant shall perform all work covered by this right-of-way improvement agreement in accordance with the provisions of the PAI Construction Policy Manual and the Department of Public Works (DPW) Standard Specifications and Details for Construction.

c. All work shown on the approved construction drawings shall be performed by a prequalified Baltimore County contractor.

d. Prior to beginning any work covered by this Agreement, the Applicant shall:

1. Schedule an on-site pre-construction meeting with DPW, the Department of Environmental Protection and Sustainability (DEPS) and the prequalified contractor. At this time the Applicant shall provide, in writing to DPW, the name, address and phone number of an authorized site representative.

2. Provide to DPW the pre-qualified contractor's certificate of insurance on a form provided by the County.

3. Obtain a written "notice to proceed" from DPW.

e. The Applicant shall deliver security to PAI as required in Baltimore County Code Section 32-4-312.

f. The County will inspect all phases of construction for which the Applicant has paid the County an inspection fee at a rate of 8% of the approved estimate. It is expressly understood, however, that any inspections performed are solely for the benefit and protection of the County, and that no duty of care is owed to the Applicant, or the Applicant's contractors, customers or purchasers.

2. Notwithstanding any other provisions of this Agreement, the Applicant acknowledges that:

a. No building permits may be issued until required security has been delivered to and approved by the County.

b. Any reductions to security will be made in accordance with the Baltimore County Code Section 32-4-313.

c. Any failure of the Applicant or its contractor to fully comply with any part of this Agreement may cause the issuance of a stop work order by DPW or PAI subject to all relevant provisions of the Baltimore County Code, including but not limited to Article 3, Title 6. The Applicant may also be cited for nonperformance under Section 32-4-309 of the County Code.

d. Any written stop work order, whether posted on the work site, hand-delivered, mailed, or sent by fax to the Applicant, Applicant's contractor, or the Applicant's designated authorized representative named in this right-of-way improvement agreement shall constitute sufficient and adequate service of such stop work order under Section 32-4-305(c) of the County Code, and the Applicant expressly agrees to the adequacy and sufficiency of such service.

e. Upon receipt of any stop work order(s) from the County, the Applicant shall stop work, and cause its independent contractors to stop work, and shall not resume any work thereafter until expressly authorized in writing by the County.

f. In the event of nonperformance, the County may utilize the security in accordance with the Baltimore County Code Section 32-4-309.

3. This right-of-way improvement agreement is not intended to waive or supersede any of the Applicant's obligations under any plat of record, or under applicable law and policies of the County. This right-of-way improvement agreement is not in tended to create or impose any new obligations upon the County.

4. In the event Applicant seeks to construct improvements within any County-owned easement, based upon construction drawings approved by the Department of Public Works, County hereby authorizes and approves a right of entry to Applicant and its agents to perform said improvements thereon.

5. The Applicant shall protect, hold free and harmless, defend and indemnify Baltimore County (including its officers, agents and employees) from all liability, losses, damage, expenses, causes of action, claims or judgments resulting from injury to, or death of, any person or damage to property of any kind, which injury, death or damage arises out of, or is in any way connected with the performance of work under this agreement or the County's grant of the right of entry herein; except that this agreement shall not be applicable to injury, death or damage to property arising from the sole negligence of Baltimore County, its officers, agents and employees.

6. The pre-printed form of this right-of-way improvement agreement is intended to repeat, verbatim, the language contained in the master right-of-way improvement agreement form, revision dated 10/1/2004, maintained by the Director of PAI for the County. Any inconsistencies between this form and the master form shall be resolved in favor of the master form.

FOR APPLICANT:

WITNESS the signatures of:

I AFFIRM THAT I HAVE REVIEWED THIS AGREEMENT AND THE ATTACHED EXHIBIT A AND UNDERSTAND THAT SECURITY IS REQUIRED IN ACCORDANCE WITH THE BALTIMORE COUNTY CODE SECTIONS 32-4-305, 32-4-312 AND 32-4-313.

Form **W-9**
(Rev. October 2007)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

Give form to the requester. Do not send to the IRS.

Print or type
See Specific Instructions on page 2.

Name (as shown on your income tax return)
Gradeline Construction Company ,Inc.

Business name, if different from above

Check appropriate box: ☐ Individual/Sole proprietor ☒ Corporation ☐ Partnership
☐ Limited liability company. Enter the tax classification (D=disregarded entity, C=corporation, P=partnership) ► .....
☐ Other (see instructions) ►

☐ Exempt payee

Address (number, street, and apt. or suite no.)
P.O Box 374

Requester's name and address (optional)

City, state, and ZIP code
Brooklandville MD. 21022

List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on Line 1 to avoid backup withholding. For individuals, this is your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 3. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN* on page 3.

Note. If the account is in more than one name, see the chart on page 4 for guidelines on whose number to enter.

Social security number
: :

or

Employer identification number
52-2050974

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding, and
3. I am a U.S. citizen or other U.S. person (defined below).

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the Certification, but you must provide your correct TIN. See the instructions on page 4.

Sign Here Signature of U.S. person ► B R Date ► 10/22/13

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Purpose of Form

A person who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN to the person requesting it (the requester) and, when applicable, to:

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),
2. Certify that you are not subject to backup withholding, or
3. Claim exemption from backup withholding if you are a U.S. exempt payee. If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income.

Note. If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

Definition of a U.S. person. For federal tax purposes, you are considered a U.S. person if you are:

- An individual who is a U.S. citizen or U.S. resident alien,
- A partnership, corporation, company, or association created or organized in the United States or under the laws of the United States,
- An estate (other than a foreign estate), or
- A domestic trust (as defined in Regulations section 301.7701-7).

Special rules for partnerships. Partnerships that conduct a trade or business in the United States are generally required to pay a withholding tax on any foreign partners' share of income from such business. Further, in certain cases where a Form W-9 has not been received, a partnership is required to presume that a partner is a foreign person, and pay the withholding tax. Therefore, if you are a U.S. person that is a partner in a partnership conducting a trade or business in the United States, provide Form W-9 to the partnership to establish your U.S. status and avoid withholding on your share of partnership income.

The person who gives Form W-9 to the partnership for purposes of establishing its U.S. status and avoiding withholding on its allocable share of net income from the partnership conducting a trade or business in the United States is in the following cases:

- The U.S. owner of a disregarded entity and not the entity,

Re: Development Closeout

This department's Bureau of Land Acquisition has **NOT** given an approval to our request to verify that they have received the required deeds for conveyance of right of ways to Baltimore County that are required as part of your development project.

You must contact the engineering firm that sealed your development plans and construction drawings required for this project. Have them review the drawings that they prepared and determine if there are any rights of way that must be dedicated to Baltimore County.

If there are rights of way to be dedicated to Baltimore County, you must have your attorney prepare the deeds that are necessary for the conveyances. Please refer to our Right of Way Manual for sample forms of those deeds.

The Right of Way Manual can be found on the county's web site at www.baltimorecountymd.gov. Go to Agencies/Department of Permits and Development Management/Land Acquisition to find the link.

If your engineering consultant determines that there are **NO** rights of way that need to be dedicated to Baltimore County, please have them write a letter to me indicating so.

If you HAVE CONVEYED YOUR DEEDS TO BALTIMORE COUNTY, you will need to take a copy of your recorded plat or, for projects which did not require a record plat, a copy of your approved development plan, and do the following:

1. Highlight all of the rights of way shown on that plat or development plan that are to be conveyed to Baltimore County.
2. Print a copy of the recorded deed for each of those highlighted areas. You can do this on-line at Maryland Land Records. Go to www.MDLandRec.net to access copies of recorded deeds.
3. Send the highlighted plan or plan along with the deeds to Gigi Hampshire in the Bureau of Land Acquisition in room 321 of the County Office Building, 111 W.

Chesapeake Avenue, Towson, Md 21204. The Bureau of Land Acquisition will check to make sure that all of the required rights of way as shown on the record plan or approved development plan have, in fact, been recorded.

Finally, please do not contact the Bureau of Land Acquisition for help in determining which, if any, rights of way are required to be conveyed. That office does not maintain copies of your plans and does not have the ability to research such matters.

If you have any questions, you may contact me.

Deed Submittals Must Have:

- Checklist for Deed Packages (see next page) – Must be completed and submitted with all deed packages.
- Project Name
- Identify project as a Major or Minor Subdivision.
- Job Order Number (XXX-XXXX-XXXX)
- Completed State of Maryland Land Instrument Intake Sheets.
  - Intake sheets are needed for every deed that is to be recorded.
  - Sections 6 through 10 must be completed.
- An original Attorney Certification
  - No more than 30 days old (expires in 60 days).
  - The online manual is the "2007" edition.
- An original Engineer Certification
  - Signed, Sealed and Dated.
- Original Mylars (if applicable)
  - Mylar must be 8.5"X14", signed, sealed and dated.
- Partial Releases for fee simple deeds and Substitute Trustee documents must be recorded prior to submittal where applicable.
  - Land Acquisition does not record these documents.

- IMPORTANT: If any of these items do not accompany your Deed Submittal it will be rejected and returned.

Rev. 12/8/08

Baltimore County Department of Permits and Development Management
Bureau of Land Acquisition
111 W. Chesapeake Ave., Room 319
410-887-3253

CHECKLIST FOR DEED PACKAGES

_____ One full size print of record plat, plat to be recorded or minor subdivision plan as applicable.

_____ Original (wet signature) Attorney Certification dated well within 60 days of submittal and formatted exactly as one of the two examples in the "Right of Way Documents Manual" with insurance policy information (company, policy# and amounts) stated.

_____ Original (wet signature) Surveyor's Certification, with insurance policy information (company, policy# and amounts) stated. Record plats must be listed. We will fill in the assigned Right of Way plat numbers.

_____ Job Order number—This is not the PWA# nor the PDM#. Development Plans Review can usually supply the number if the Engineer does not have it.

_____ Original mylars (using the approved Bureau of Land Acquisition plat format) for each Right of Way plat. Mylars must be 8.5" X 14", signed and sealed by the Surveyor.

_____ Original (wet signature) instruments fully signed, WITNESSED, and notarized.

_____ Each instrument signed by the preparing attorney certifying that he/she is admitted to practice before the Maryland Court of Appeals.

_____ Correctly completed intake sheets for each instrument including the property tax account number. The intake sheet is critical to the recording process; we CANNOT accept instruments without them.

_____ Tax account numbers for each reservation on a record plat except roadbeds. However, highway widenings must include the tax account number for the property adjacent to the widening.

_____ Correct County signature page on each instrument as per the manual. Fee deeds, declarations and deeds of release must have the longer "Approved for Legal Form and Sufficiency" (complete with fine print) and the approval line for the County Administrative Officer. Deed and Agreements, stormwater management deeds of declaration and deeds of easement need only "Reviewed for Baltimore County Requirements", Office of the County Attorney. Please carefully follow the Manual format for each kind of instrument; the various Department Heads are not interchangeable and do not appear at all on dedications from Record Plats except for roadbeds and highway widenings.

_____ Please be sure stormwater management reservations have come through their one-year maintenance period and are approved for acceptance by the Department of Environmental Protection and Resource Management (DEPRM) before submitting a deed. Submitting a copy of DEPRM's letter accepting the facility avoids a 15-day delay in processing.

see sheet 2

_____ Please pay outstanding taxes on reservations, etc. We cannot record the deed no matter how small the amount.

_____ All Partial Releases for fee simple deeds and Substitute Trustee documents must be recorded prior to deed package submittal. We do not record these documents.

_____ PLEASE make an effort to submit a correct COMPLETE package. Delays and problems are substantially avoided. Submit packages to the Bureau of Land Acquisition at the address referenced above.

_____ Please be aware the instruments you submit IF they are completely correct and IF they do not need DEPRM's signature, will take at least 6 weeks to go to record. In addition, Land Records is two months behind providing reference numbers. If you plan to sell the property in the near future, we strongly suggest you Save and Except the rights of way dedicated in the package you submitted.

- **IMPORTANT: Items not checked off on this list may lead to the rejection of the Deed Package.**

Your time and cooperation are greatly appreciated.
