Receipt
The samples were received on 2/16/2016 3:05 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 1.2º C.

GC/MS VOA
Method(s) 8260B: The laboratory control sample (LCS) for batch 166476 recovered outside control limits for the following analytes: 1,2 DBCP. This analyte was biased high in the LCS and was not detected in the associated samples; therefore, the data have been reported.

Method(s) 8260B: The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch <166476> recovered outside control limits for the following analyte: dichlorodifluoromethane.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Receipt
The samples were received on 2/19/2016 1:50 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 3 coolers at receipt time were 1.6º C, 2.8º C and 3.6º C.

Receipt Exceptions
The container labels lists date sampled as 2/18/16, while the COC lists 2/17/16. Logged per COC. The client was contacted, and the lab was instructed to use the container date.

Receipt
The samples were received on 3/18/2016 3:55 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 3.2º C.

GC/MS VOA
Method(s) 8260B: The %RPD of the laboratory control sample (LCS) and laboratory control standard duplicate (LCSD) for preparation batch 167612 recovered outside control limits for the following analytes: <vinyl chloride and trichlorofluoromethane>.

Method(s) 8260C SIM: The matrix spike / matrix spike duplicate (MS/MSD) recoveries and precision for 167597 were outside control limits. Sample detection for 1,4-dioxane caused the MSD to recover low resulting in the precision to exceed control limits. The associated laboratory control sample / laboratory sample control duplicate (LCS/LCSD) precision are within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Receipt
The samples were received on 4/1/2016 4:40 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 1.5º C.

GC/MS VOA
Method(s) 8260B: The laboratory control sample (LCS) for batch 168133 recovered outside control limits for the following analytes: ethylene dibromide. These analytes were biased high in the LCS but recovered within control limits in the LCSD and were not detected in the associated samples; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.
