Seller hereby irrevocably assigns and promises to assign to Buyer all right, title and interest to all Foreground Intellectual Property. Seller agrees to do all things reasonably necessary to enable Buyer to secure and perfect Buyer's Foreground Intellectual Property rights, including, without limitation, executing specific assignments of title in Foreground Intellectual Property by Seller to Buyer and cooperating with Buyer at Buyer's expense to defend and enforce Buyer's rights in any such Foreground Intellectual Property. All Foreground Intellectual Property assigned to Buyer pursuant to the Order shall be considered Buyer's Proprietary Information (defined hereinafter).

Seller agrees that, for any works of authorship created by Seller or any employees or any others used by Seller in the course of the Order, those works that come under one of the categories of "Works Made for Hire" in 17 U.S.C. §101 shall be considered "Works Made for Hire". For any works of authorship that do not come under such categories, Seller, warranting that it has the right to do so, hereby assigns and promises to assign all right, title, and interest to any copyright in such works to Buyer and will execute, or cause to be executed at Buyer's expense, any documents required to establish Buyer's ownership of such copyright.

- g) Seller hereby irrevocably waives and promises to waive all moral rights to the extent permissible by law, all rights of privacy and publicity, and the like, in all Goods provided to Buyer and in all activities in connection with the Order.
- h) Seller represents and warrants that Seller shall not provide, in the performance of the Order, any software, (including without limitation source code, compiled code, embedded software, firmware, free software, open source software, freeware, general public license-governed software, any electronic hardware, including without limitation free hardware, designs or open source hardware design), in any form that is subject to any obligations or conditions that may provide a legal right to any third party to access such software and/or electronic hardware, or that could otherwise impose any limitation or condition on Buyer's use, reproduction, modification, distribution or conveyance of such software or electronic hardware.
- i) Except as expressly authorized herein, nothing in the Order shall be construed as Buyer granting Seller a license in or any right to use any of Buyer's Intellectual Property other than in the performance of work under the Order.

11. Offset

- a) Buyer may use all or any part of the value of the Order, including the value of any subcontracts placed by the Seller for the Order, for satisfying international offset obligations of Buyer, Buyer's Affiliates, or any entity that Buyer transfers such value to. Seller may use the offset credit generated by the Order or the subcontracting of the Order only upon Buyer's written approval.
- b) Seller shall support Buyer in meeting Buyer's offset requirements in proportion to the value of the Goods supplied by Seller to the value of the end item sold by Buyer into the particular country.

- c) Upon Buyer's request the Seller shall (i) report all subcontract sources outside the United States utilized in the fulfillment of this Order, including the name and location of each such source, amounts paid and committed thereto and identification of the Goods or Services procured, and (ii) require its subcontractors, including those at all lower tiers, to maintain records of the above information.

12. Proprietary Information

- a) In order to deliver the most effective and efficient Goods and Services possible and meet Buyer's requirements for those Goods and/or Services, Buyer and Seller anticipate the need to exchange Proprietary Information (as defined below) for the design, development, testing, manufacture and/or repair of Goods and/or Services, as applicable in connection with such Order and/or the Contract. In recognition of the value of that Proprietary Information, as well as to protect Buyer's goodwill and reputation in its products, Seller agrees to the terms and conditions of this Section 12.
- b) "Proprietary Information" shall mean all information, knowledge or data (including without limitation financial, business, and product strategy information; product specifications; product designs; procedures; studies; tests; and reports) in written, electronic, tangible, oral, visual or other form, (i) disclosed by, or obtained from, Buyer or (ii) conceived, created, acquired, or first reduced to practice in connection with the Order. If Buyer furnishes sample products, equipment, or other objects or material to Seller, the items so received shall be used and the information obtained from said items shall be treated as if they were Proprietary Information disclosed in connection with the Order.
- c) Unless the Seller has received the Buyer's express written consent to the contrary, Seller shall (i) use the Proprietary Information solely for the purposes of the Order, and not for any other purpose (including, without limitation, designing, manufacturing, selling, servicing or repairing equipment for entities other than Buyer; providing services to entities other than Buyer; or obtaining any government or third party approvals to do any of the foregoing); (ii) safeguard the Proprietary Information to prevent its disclosure to or use by third parties; (iii) not disclose the Proprietary Information to any third party; and (iv) not reverse engineer, disassemble, or decompile the Proprietary Information.
- d) Seller may disclose the Proprietary Information to employees, officers, directors, labor personnel of Seller who have a need to know such Proprietary Information for the purposes of performing the Order and who have executed a written agreement with the Seller obligating such entity or person to treat such information in a manner consistent with the terms of this Section.
- e) The Order shall not restrict Seller from using or disclosing any information that, as proven by written contemporaneous records kept in the ordinary course of business: (i) is or may hereafter be in the public domain through no improper act or omission of the Seller or a third party; (ii) is received by Seller without restriction as to disclosure by Seller from a third party having a right to disclose it; (iii) was known to Seller on a non-confidential basis prior to the disclosure by the Buyer; or (iv) was independently developed by employees of Seller who did not have access to any of Buyer's Proprietary Information.

- f) If Proprietary Information is required to be disclosed pursuant to judicial process, Seller shall promptly provide notice of such process to Buyer and, upon request, shall fully cooperate with Buyer in seeking a protective order or otherwise contesting such a disclosure. Disclosure of such requested Proprietary Information shall not be deemed a breach of the Order provided that the obligations of this Section are fulfilled by Seller.
- g) Buyer shall have the right to audit all pertinent documentation of the Seller, and to make reasonable inspection of the Seller's premises, in order to verify compliance with this Section.
- h) Obligations in this Section regarding Proprietary Information shall continue until such time as all Proprietary Information is publicly known and generally available through no improper act or omission of the Seller or any third party.
- i) Unless required otherwise by law or the Order, Seller shall promptly return, or otherwise dispose of Proprietary Information as Buyer may direct. Absent contrary instructions, Seller shall destroy all Proprietary Information one (1) year after termination or completion of the Order and provide written acknowledgement to Buyer of such destruction.
- j) Seller agrees to cause all information regardless of form (including, for example, electronic, magnetic and optical media, software, and compilations), containing or derived in whole or in part from Proprietary Information to bear the following legend:

“This document contains the property of Sikorsky Aircraft Corporation and/or its Affiliate. You may not possess, use, copy or disclose this document or any information in it for any purpose, including without limitation to design, manufacture, or repair Goods, or obtain FAA, Transport Canada Civil Aviation (TCCA) or other government approval to do so, without express written permission. Neither receipt, from any source, nor possession of this document, constitutes such permission. Possession, use, copying or disclosure by anyone without express written permission of Sikorsky Aircraft Corporation and/or its Affiliate issuing the Order is not authorized and may result in criminal and/or civil liability.”

- k) Notwithstanding any proprietary or confidential labels or markings, all information of Seller disclosed to Buyer relating to the Order will be deemed non-confidential and the content of the Order may be disclosed by Buyer to Buyer's Affiliates or to Buyer's Customer or Buyer's subcontractors and potential subcontractors provided that Buyer's Customer or subcontractors have a need to access or know such information. Moreover, Buyer may disclose all Seller information, in accordance with applicable governmental regulations, to the FAA, the European Aviation Safety Agency (EASA), TCCA, any other governing international airworthiness certifying authority, and/or any other department or agency of the U.S. Government, including, without limitation, for the purpose of obtaining necessary government approvals.
- l) Seller agrees that it will not accept from any third party, or use, any information that appears to be similar to Proprietary Information without first obtaining Buyer's express written consent, except that Seller may receive solicitations or purchase orders issued by

a partner or higher-tier supplier of Buyer that expressly reference a Buyer Purchase Order and contain obligations no less stringent than this Section. Seller shall promptly notify Buyer if Proprietary Information is offered to Seller by a third party or of the suspected possession of Proprietary Information by a third party.

- m) Seller acknowledges that exposure to Buyer's Proprietary Information and other Intellectual Property will make it easier for Seller to manufacture or repair, or to apply for or assist another entity in obtaining FAA or other government approval for, Goods that are the same Goods or that have the same form, fit and function, as Goods Seller supplies to Buyer pursuant to an Order hereunder. Seller also acknowledges that Buyer's goodwill and reputation which become associated with Goods supplied by Seller pursuant to an Order hereunder once approved for use in Buyer's products make it easier for Seller to manufacture or repair, or to apply for or assist another entity in obtaining FAA or other government approval for those Goods, or Goods that have the same form, fit and function, for use in Buyer's products. Seller agrees that it shall not manufacture or repair Goods that Seller supplies to Buyer pursuant to an Order hereunder, or manufacture or repair Goods having the same form, fit and function, for use in Buyer's products, or apply for or assist another entity in obtaining FAA or other government approval for any such Goods, without first notifying Buyer and obtaining Buyer's written consent. Seller's notification shall (a) describe the Goods to be manufactured or repaired, or for which application for or assistance to another entity in obtaining FAA or other government approval for such Goods is to be provided, (b) identify the corresponding Goods Seller supplies to Buyer and (c) provide Buyer with sufficient information to demonstrate that Seller will manufacture or repair, or apply for or assist another entity in obtaining FAA or other government approval for such Goods (as the case may be) without reference to or use of Buyer Proprietary Information or other Buyer Intellectual Property. If Seller manufactures or repairs any such Goods, or applies for or assists another entity in obtaining FAA or other government approval for any such Goods, for use in Buyer's products without obtaining Buyer's written consent, then it shall be considered a breach of the Order and Buyer shall be entitled to injunctive relief and such other remedies as a court may order. Seller shall not make accessible or sell completed or partially completed or defective Goods manufactured using or containing Proprietary Information to any unauthorized third parties. Goods not provided to Buyer shall be disposed of in a manner that prevents disclosure of Proprietary Information (including by reverse engineering).
- n) Seller shall not make accessible or sell completed or partially completed or defective Goods manufactured using or containing Proprietary Information to any unauthorized third parties. Goods not provided to Buyer shall be disposed of in a manner that prevents disclosure of Proprietary Information (including by reverse engineering).

- o) For Proprietary Information exchanged in connection with the Order, the terms of this Section shall supersede any provisions regarding the protection of Proprietary Information in any other agreement between the Parties.

13. Security for BUYER Information Stored by Seller

- b) Seller agrees to install and implement security hardware, software, procedures and policies that will provide reasonable and effective information security. Seller agrees to update such hardware, software, procedures and policies as may be needed from time to time to utilize improved technology and to respond to more sophisticated security threats in order to maintain a level of security protection appropriate for the information involved and the current state of security solutions.
- c) Seller further agrees to:
 - 1) Provide to Buyer a copy of its current information security policy, including its policy regarding physical security for access to devices that may access Buyer Information. Seller shall annually provide Buyer with its then current policy and indicate any plans, including a timetable for implementation, of planned upgrades to comply with the policy. Seller shall implement those reasonable requests for modification of such policy requested by Buyer.
 - 2) Allow Buyer or its designee at any time to conduct (or have conducted) a remote network audit. If the Buyer Information is stored in a shared environment per the agreement of Buyer, then Buyer shall use a third party to conduct such audits. The audits shall include any facilities with Buyer Information including backup storage facilities.
 - 3) Segregate all Buyer Information into a separate database only accessible by Buyer, its agents and those employees of Seller necessary to maintain the equipment and the program on which it runs, unless otherwise agreed by Buyer. Logical segregation of data, if approved by Buyer, may be an acceptable alternative to this requirement. Except for Buyer and its agents, Seller shall use reasonable efforts, as measured by the available technology at the time, to prevent anyone other than its authorized employees from accessing the Buyer Information.

- 4) Assure that all Buyer Information and applicable software is appropriately backed up and recoverable in the event of a disaster.

Encryption algorithms used must be of sufficient strength to equate to 128-bit RC-4 or better.  - 6) Not to store PII on any Seller mobile computing devices (e.g. laptop computers, PDAs (personal digital assistants), etc.)
 - 7) Conduct appropriate background checks on all non-Buyer personnel who will have access to the environment and/or Buyer Information and approve those personnel based on the results of those checks. Seller must disclose to Buyer the procedures used for those employees having access to the Buyer Information.
 - 8) Provide Buyer at the time of signing the Contract with a termination plan that addresses how Buyer Information will be returned to Buyer at the termination or expiration of the Contract, including backup and archival information, and how all Buyer Information will be permanently removed from Seller's equipment and facilities. This plan should include supplying the data to Buyer in an industry recognized non-proprietary database and, if not, a free-of-charge license to use the proprietary data base software to access the data.
 - 9) Describe at the time of signing of the Contract how Seller will meet Buyer's requirement for a secure authentication process for access to Buyer Information or, for less sensitive information, where "Strong Password" data control is sufficient, describe how this requirement will be met.
 - 10) Provide information and cooperation to Buyer in response to any subpoena, investigation or the like seeking Buyer Information and provide information and assistance for Buyer to seek certification and the like relative to its information including information in the possession of Seller. Seller shall promptly notify Buyer upon the receipt of any request requiring that Buyer Information be supplied to a third party.
 - 11) Comply, within a reasonable period of time, with Buyer Information security policies as amended from time to time.
- d) Seller shall not provide Buyer Information to any other entity without the prior written approval of Buyer, except to the extent expressly permitted under Section 12 Proprietary

Information hereof. A request for Buyer approval shall include agreement by Seller and such other entity that all of the requirements of this provision are applicable to their performance and that Buyer shall have the right to perform the audits described above.

- e) Should Seller fail to meet the then current standards for information security, or should Seller fail to pass a Buyer audit on information protection, then Buyer may immediately terminate the Contract and/or any Order in accordance with applicable Termination for Default without prejudice to any other rights or remedies and shall have no further obligation to Seller.
- f) The foregoing provisions do not otherwise diminish or limit Seller's obligations regarding the receipt, use, protection and/or disclosure of Buyer Proprietary Information otherwise set forth hereunder.
