
SC Supply chain module

Introduction

(SC0.0) If you would like to do so, please provide a separate introduction to this module.

(SC0.1) What is your company's annual revenue for the stated reporting period?

Annual revenue
51,048,000,000

(SC0.2) Do you have an ISIN for your company that you would be willing to share with CDP?

Change from 2017

Yes

(SC0.2a) Please use the table below to share your ISIN.

ISIN country code	ISIN numeric identifier and single check digit
US	5398301094

Allocating your emissions to your customers

(SC1.1) Allocate your emissions to your customers listed below according to the goods or services you have sold them in this reporting period.

Requesting member	Scope of emissions	Emissions in metric tons of CO ₂ e	Uncertainty (± %)
[Drop-down menu of requesting members]	Select from: <ul style="list-style-type: none"> ● Scope 1 ● Scope 2 ● Scope 3 	Numerical field	Percentage field

Major sources of emissions	Verified*	Allocation method	Please explain how you have identified the GHG source, including major limitations to this process and assumptions made
Text field	Select from: <ul style="list-style-type: none"> ● Yes ● No 	Select from drop-down options below	Text field

(SC1.2) Where published information has been used in completing SC1.1, please provide a reference(s).

(SC1.3) What are the challenges in allocating emissions to different customers, and what would help you to overcome these challenges?

Allocation challenges	Please explain what would help you overcome these challenges
Diversity of product lines makes accurately accounting for each product/product line cost ineffective	We do not have an activity-based accounting system for infrastructure costs which would permit us to more accurately track and allocate emissions for each of our product and service offerings. Furthermore, our complex supply chain with many layers presents even more of a challenge because a large proportion of GHG emissions can be attributed to the supply chain.
Doing so would require we disclose business sensitive/proprietary information	In order to overcome emissions allocation challenges, we are more open to working closely with our customers to obtain a better understanding of contract value and emissions associated with that work. Due to the sensitive and classified nature of some of our work for federal government customers, we may not be able to fully disclose information that could contribute to a better emissions allocation estimate.

[Add Row]

(SC1.4) Do you plan to develop your capabilities to allocate emissions to your customers in the future?

No

(SC1.4b) Explain why you do not plan to develop capabilities to allocate emissions to your customers.

Implementing an activity-based accounting system for infrastructure costs to allocate to our emissions to our very large number of programs would involve complex design and implementation, with significant unplanned expenses. Additionally, because a large portion of our GHG emissions from our supply chain, similar tracking systems would have to be implemented across many suppliers.

Collaborative opportunities

(SC2.1) Please propose any mutually beneficial climate-related projects you could collaborate on with specific CDP supply chain members.

Change from 2017

Requesting member	Group type of project	Type of project	Emissions targeted	Estimated timeframe for carbon reductions to be realized	Estimated lifetime CO2e savings	Estimated payback	Details of proposal
<p>Select from:</p> <p>[Drop-down menu of requesting members]</p>	<p>Select from:</p> <ul style="list-style-type: none"> ● Reduce Logistics Emissions ● Change to provision of goods and services ● New product or service ● Relationship sustainability assessment ● Other, please specify 	<p>Select from drop-down options below</p>	<p>Select from:</p> <ul style="list-style-type: none"> ● Actions to reduce customers' operational emissions (customer scope 1 & 2) ● Actions that would reduce our own operational emissions (our scope 1 & 2) ● Actions that would reduce our own supply chain emissions (our own scope 3) ● Actions that would reduce both our own and our customers' emissions ● Other, please specify 	<p>Select from:</p> <ul style="list-style-type: none"> ● 0-1 year ● 1-3 years ● 3-5 years ● Other, please specify 	<p>Numerical field</p>	<p>Select from:</p> <ul style="list-style-type: none"> ● Cost/saving neutral ● 0-1 year ● 1-3 years ● 3-5 years ● Other, please specify 	<p>Text field</p>

(SC2.2) Have requests or initiatives by CDP supply chain members prompted your organization to undertake organizational-level emissions reduction initiatives?

No

Action Exchange

(SC3.1) Do you want to enroll in the 2017-2018 CDP Action Exchange initiative?

No

(SC3.2) Is your company a participating supplier in CDP's 2017-2018 Action Exchange initiative?

No

Product (goods and services) level data

(SC4.1) Are you providing product level data for your organization's goods or services, and, if so, what functionality will you be using?

No, I am not providing data
