The PAC-3 family of missiles are combat-proven Hit-to-Kill interceptors that defend against incoming threats - including tactical ballistic missiles, cruise missiles, advanced threats and aircraft - using direct body-to-body contact that delivers exponentially more kinetic energy on the target than can be achieved with blast fragmentation mechanisms. Fifteen nations have chosen PAC-3 for missile defense.

**PAC-3®**

**Production**

- 1700+ PAC-3 MSEs
- Increasing to annual production of 650 PAC-3 MSEs

**Performance**

- 90+ successful MSE and CRI flight tests
- Demonstrated Integration F-35 | IBCS | THAAD | AEGIS

**Economic Impact**

- 7,200+ direct & indirect jobs
- 400 Suppliers, 37 states, 5 countries

**PAC-3 MSE Capabilities**

Building on the combat-proven PAC-3 CRI, the PAC-3 MSE expands the lethal battlespace with a two-pulse solid rocket motor, providing increased performance in altitude and range.

- **Maneuverability**
  Larger control fins and upgraded actuators increase agility

- **Precision**
  Engages threats through Hit-to-Kill technology

- **Protection**
  Defends ground forces and critical assets against current and evolving threats

- **Range**
  A large dual-pulse solid rocket motor extends reach and adds thrust
