

Missiles & Fire Control

Fast Facts

For more than five decades, customers have relied on Lockheed Martin Missiles and Fire Control (MFC) when threats arise. From developing missiles that reach more than Mach 5 to designing aircraft sensors that keep pilots safe to advancing green energy storage, MFC equips the warfighter for every mission.

Doing Business in

outpace advancing
threats and meet
our customers'
evolving concepts
of operation.

21st Century Security

We're leading the way in hypersonics and developing new technology to enhance the future battlespace. Across MFC, we're accelerating 21st Century Security capabilities by leveraging these emerging technologies – artificial intelligence, 5G connectivity and advanced computing – to seamlessly and securely connect all assets in the joint operations.
