

Fast Facts

Javelin™ Anti-Tank Weapon System

Javelin is a versatile, one-man-portable and platform-mounted anti-tank precision weapon system. It is capable of defeating all known and projected armor, as well as soft and irregular targets. Javelin is developed and produced by the Javelin Joint Venture, a partnership of Raytheon Missiles & Defense, a business of Raytheon Technologies, and Lockheed Martin.

Capabilities

One-man-portable
or platform-employed

Effective against
a variety of targets

Range:
65 to 4,000 meters
in most operational
conditions

**Low signature
missile launch:**
offers **minimal
detectability**

**Classroom
training:**
only requires
72 hours

Weather:
Clear to **adverse**

Environments:
All battlefield
obscurants

Firing

Operators launch the missile using its Command Launch Unit (CLU).

Attack Modes

Top-attack targets weakest point

Direct-attack versatility for caves, bunkers or soft targets

Rate of Fire

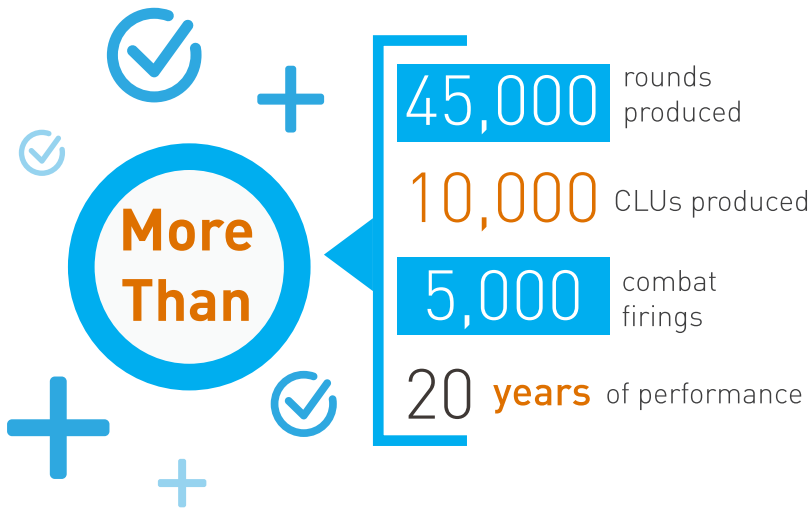

2-per-minute per CLU

Fire-and-Forget

Self-guided round allows for rapid reloading and immediate mobility.

Proven Performance

A mainstay Brigade Combat Team weapon for the U.S. Army and U.S. Marine Corps

In-service with 18 countries

Expected to be in U.S. military operational inventory through 2050

99% operational readiness rate

94% engagement success rate

Economic Impact

63 domestic suppliers in 18 states

6 international suppliers in 3 countries
