

LOCKHEED MARTIN 

# PAC-3 Edge <sup>TM</sup>

Lockheed Martin's Future Interceptor Offering

# PAC-3 Edge

## OVERVIEW

The PAC-3 Edge is Lockheed Martin's offering for the U.S. Army's Future Interceptor competition. PAC-3 Edge leverages combat-proven PAC-3 Missile Segment Enhancement capabilities and new, industry-leading technology to deliver decisive performance against the advanced, incoming threats.

PAC-3 Edge offers increased protection at higher altitudes, longer ranges and at greater speeds than current short to medium range effectors against next-generation hypersonic, air and missile defense threats. PAC-3 Edge will strengthen the Army's layered defensive capability while complimenting existing IAMD capabilities to ensure a robust defense against incoming threats.

## TIMELINE

Lockheed Martin is planning to deliver this next-level capability by 2031.

## FEATURES

- The highest level of performance and precision through a revolutionary Lockheed Martin-build seeker designed by the Strigo Product Center.
- Increased velocity at endgame inception through advanced propulsion technology including a new, advanced, multi-pulse solid rocket motor from Northrop Grumman.
- Enhanced maneuverability through an upgraded control system design.
- Adds an additional layer of defense against incoming threats in a complex, layered battlespace.
- Leverages successful PAC-3 MSE integration into the Integrated Battle Command System through proven battle management and fire control software.
