F-16 Caution Warning Panel

Incorporating LED technology, Radiant Power Corp (RPC) and Derco have developed an improved replacement Caution Warning Panel (CWP) for the F-16. The Derco/RPC replacement offers substantial maintenance and operational advantages over existing units through the use of Light Emitting Diode (LED) technology and supportable, solid state electronic components.

Product Highlights

- Reduces Foreign Object Damage (FOD) by eliminating high failure peanut bulbs
- Increases supportability with updated internal components
- Significantly reduces heat generation
- Drop in replacement - all blocks, no aircraft modification required
- Day/Night (NVIS) Mode - wide luminance range
- Nine Legends available with possibility of custom legends if needed
- Replaces all legacy F-16 Caution Warning Panel Part Numbers: 16847-001 (Korry), 16VE038005 (Lockheed), 708360-12 (GE)

Derco Support

Derco is the **EXCLUSIVE** authorized distributor of the F-16 Caution Warning Panel for Radiant Power Corp. OEM Authorization letter available upon request. For more information, please contact a Derco representative.
