

LM 400 Series

Small, Versatile, Capable

LM 400 Series

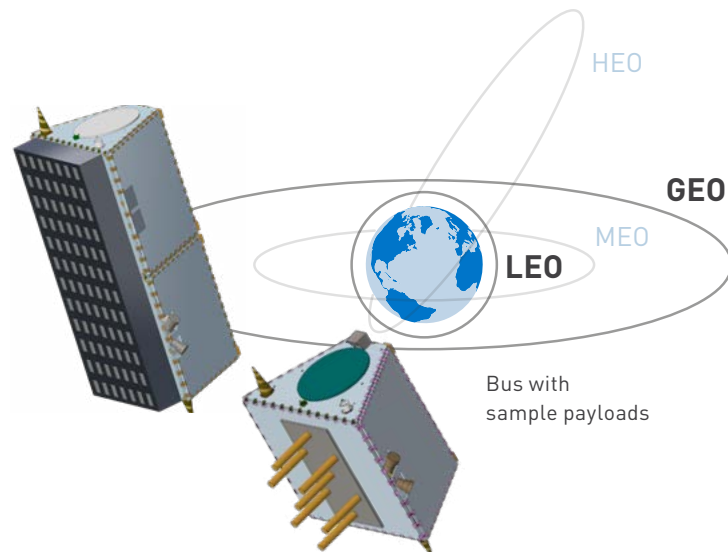

Software-Reconfigurable Payload Interface

SmartSat™ Multi-Core Mission Processing and Planning

Payload Power Accommodations up to 14kW Peak

Deliver up to 20 vehicles to LEO or GEO per launch

High Heritage Design and Components

Missions

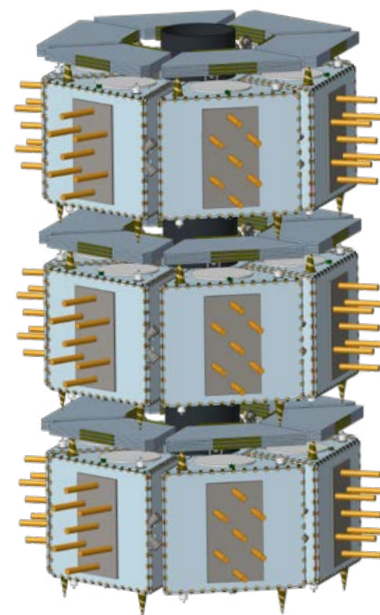

Spacecraft Features

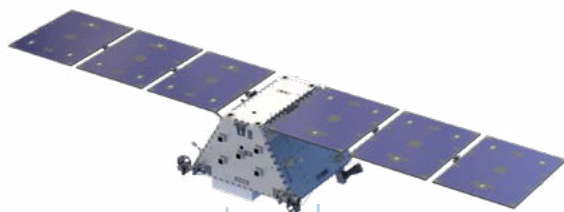

Bus Mass	Up to 1,700kg with payload
Orbit Options	LEO, MEO, GEO
Design Life	2 to 7 years
Delivery	High monthly production rate
Launch Vehicle Compatibility	5m EELV Category B (Multi) 3m Fairing (Single)

Options

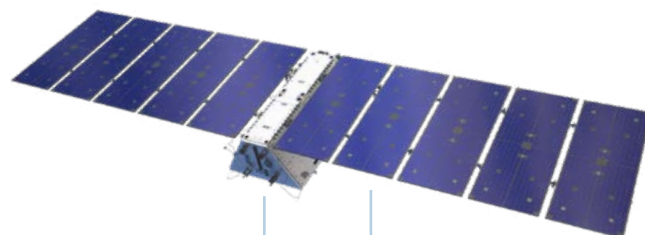

- Extended Structure
- High power (100V)
- Additional EMI/EMC
- Demo/Cost-Optimized Architecture
- Precision Pointing
- High Thrust
- Mission Unique Customization

Sample launch configuration with dispenser

Modular Prop Assembly

Modular Structure
Extended or Standard

Modular Arrays
Fixed or Articulating
