

Warrior Capability Sustainment Programme (WCSP)

- Increased lethality with CT40, improved coax arrangement, including fire-on-the-move capability
- Weapon integration and fire control commonality with Ajax
- Reduced crew workload through efficient HMI and quick access to system resources
- Increased system power and intelligent power management
- Ease of system upgrades through electronic architecture, modular protection system, etc.

Warrior Capability Sustainment Programme (WCSP)

The Lockheed Martin Warrior Capability Sustainment Programme is a development programme for the UK Ministry of Defence, introducing major improvements to the current Warrior Armoured Fighting Vehicle. WCSP addresses key capability gaps currently faced by the in-service Warrior; the upgraded vehicles will deliver the very best, world-class, battle-winning capability for the British Army. The key capability and enhancements include the ability to fire on-the-move, and an improved modern environment for soldiers to work in.

The WCSP turret upgrade focuses on several key areas including:

ENHANCED LETHALITY

- Fire-on-the-Move
- Stabilised CT40 Cannon
- Automatic Two Nature Ammunition Handling System
- Stabilised L94A1 Chain Gun
- Reliable 7.62mm Feed System
- Modern Digital Fire Control System

IMPROVED SURVIVABILITY

- State of the Art Armour
- Mine Blast Resistant Seating
- Standard Provision for Warrior Modular Protection System

ENHANCED FIGHTABILITY

- Environmental Control System
- Network Enabled Platform Management System
- Digital Crew Station Displays
- Integrated BCIP
- Crew Briefing System
- Drivers Night Vision System

ENHANCED SITUATIONAL AWARENESS

- Digital Situational Awareness Cameras
- Day and Low Light Capability
- Distribution of all Video Sources to all Crew Members and Mounted Troops
- Drivers Forward and Rear Vision Cameras
